

HVAC Retrofit Projects at Nine (9) City Buildings (2012-2014):

The City's **Facilities Division** staff completed energy efficiency HVAC retrofits in 2013 and 2014 at seven (7) buildings including: Beckwourth/Mountain View, Benjamin/Allied Gardens, and Malcolm X libraries; Eastern Police Station; and Fire Stations 11, 20, and 40. These projects were a result of 2012 energy audits completed by Environmental Services. In addition Facilities and Environmental Services coordinated and added two (2) facility HVAC projects at the San Ysidro Library and Montgomery Field Airport Administration Building that were not audited but were coordinated for efficient unit replacements. In each case, the City's HVAC shop installed high efficiency HVAC units and equipment. The projects qualified for San Diego Gas & Electric (SDGE) rebates, with a majority of the audited project expenses paid for by an American Recovery and Reinvestment Act (ARRA) grant. The City will save approximately 200,000 kWh of energy and \$40,000 annually as a result of these efforts.

Beckwourth/Mountain View Library

Benjamin/Allied Gardens Library

Malcolm X Library

Eastern Police Station

Fire Station 11

Fire Station 20

Fire Station 40

San Ysidro Library

Montgomery Field Airport Administration Building
