

The City of San Diego Commercial Recycling Profile

1677 Quivira Rd
San Diego, CA 92109

The City of San Diego recognizes the efforts of the Seaforth Marina in Mission Bay, winner of the December 2010 City of San Diego Recycling Champion Award.

The marina, which underwent renovations in 2008, prides itself in a new marina building, office space and restrooms. The renovation project included a new Landing Grille Café, docks and expanded tackle shops at the adjacent Seaforth Sportsfishing Landing.

As part of the renovations, Seaforth employed a new recycling program. All tenants were notified of a new recycling dumpster and recycling service which was added to their regular trash service, and the service was advertised to tenants in bathrooms and the marina office space.

During summer months the parking area is especially crowded, and the available recycling dumpsters and containers provide a successful waste diversion program for the Seaforth Marina.
