Subject: The Clairemont Mesa Public Facilities Financing Plan

Dear: Ms. Robinson:

Thank you for the opportunity to submit the facilities financing priorities for the area represented by the Clairemont Mesa Planning Committee. These projects cover the many improvements needed by Clairemont Mesa as reflected in the 1990 Clairemont Mesa Community Plan. As former Chairman of the Clairemont Mesa Planning Committee, Tim Graves said in his submittal on July 18, 1989, "The Community of Clairemont is in need of many improvements for its people." While some progress has been made since 1989, much more is still required to properly support the needs of our residents.

The following is a general description of the projects by specific category. Two detailed lists are attached as Appendix A (Priorities by Category) and Appendix B (Priorities Combined).

General Description

FIRE STATION PROJECTS

- In the Clairemont Mesa planning area there is an unfunded need of \$3.9 million for fire station projects to adequately serve the population based on the buildout of the currently adopted community plan.
- The three existing fire stations on Clairemont Drive (27), Chateau Drive (36), and Chicago Street (25) all require substantial improvements before initiating the design and construction of a new site near Garnet Avenue and Mission Bay Drive. Station 27 requires renovation, while stations 36 and 25 require reconstruction. All projects are required in order to provide adequate coverage of their service areas. See A and B.

LIBRARY PROJECTS

- In the Clairemont Mesa planning area there is an unfunded need of \$21.1 million for library projects to adequately serve the population based on the buildout of the currently adopted community plan.
- Because we believe good libraries are critical to our community, we have ranked them at the top of all unfunded projects. These projects include the expansion of all three existing libraries – Clairemont Branch, Balboa Branch and North Clairemont Branch. Substantial improvements are required if they are to meet the needs of the Clairemont community.

- Area residents recently met to identify and prioritize our library needs. Our top priority is the design and construction of a new Balboa Branch on the current site and the adjoining lot. The Clairemont Branch and North Clairemont Branch both require land acquisition near their current sites in order to meet the needs of their service areas. The Clairemont Branch is the oldest and smallest library, and lacks a meeting room. Therefore, it is second on our library priority list. See A and B

PARK AND RECREATION PROJECTS

- In the Clairemont Mesa planning area there is an unfunded need of \$116.6 million for park and recreational projects to adequately serve the population based on the buildout of the currently adopted community plan.
- An additional \$10.5 million has been funded for three projects planned for action during 2002. These funded projects include Lindbergh Neighborhood Park - Tot Lot ADA Upgrade, East Clairemont Athletic Area - Phase II completion, and Clairemont Athletic Area - Senior Field Renovation. They are ranked 1, 2 and 3 on our overall priority list.
- We have placed ADA requirements high on our priority list because it is important to make our park and recreation facilities accessible to everyone. In general, our emphasis has been on making needed improvements to existing park and recreation facilities before expanding or acquiring additional sites. There are, however, exceptions. The open space acquisition of 19.16 acres Lakehurst Canyon is ranked 12, the Dogs Off Leash Parks is ranked 23, and Hickman Field Projects ranked 42, 44 and 45. Hickman Field is located in Kearny Mesa, but does service some Clairemont Mesa residents. See A and B.

TRANSPORTATION PROJECTS

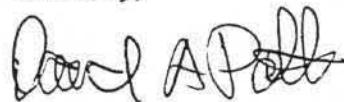

- In the Clairemont Mesa planning area there is an unfunded need of \$15.6 million for transportation projects to adequately serve the population based on the buildout of the currently adopted community plan.
- We emphasize the need to make access available to everyone by placing Curb Ramps - 2,000 Locations at the top of our transportation list and ranked 7 overall. The widening of Balboa Avenue through Clairemont Drive to I-5 is ranked as 46. See A and B.
- NOTE: Additional sidewalk improvements are needed on major thoroughfares, but do not appear on A or B. Landscaping is also needed, however it is not appropriate for this submittal.

COMPLETED AND DELETED PROJECTS

- Seven completed projects and two deleted projects are listed in the February 2002 Clairemont Mesa Public Facilities Financing Plan Draft 3.
- Funding completed: Fire Station \$13,256; Library \$1,753,000; Park and Recreation \$658,000; and Transportation \$149,600.

Overall, in the Clairemont Mesa planning area there is an unfunded need of \$156.9 million for public facilities (including transportation, libraries, park and recreation facilities, and fire station improvements) to serve the population based on the buildout of the currently adopted community plan. This does not include required upgrades to the sewer and water delivery system or the personnel necessary to operate the library, park and recreation facilities, and police and fire stations.

Sincerely,

David A. Potter, AICP
Chairman
