

How New CERT San Diego Academy Graduates Qualify For Their DSW Card

New CERT San Diego Academy graduates must follow these steps to qualify for their DSW card **within the first year after their graduation date.**

- 1) Attend two team meetings with your designated community team. Team Assignments are made available to all students at the Final Drill. (If students leave the Final Drill early, it is their responsibility to make arrangements to receive this information through the CERT San Diego Program office.) You must submit your hours to your Team Leaders each month in order to get credit.
- 2) Attend two qualifying Continuing Education* classes. Remember! You must submit your hours to your Team Leaders each month in order to get credit.

When the requirements above are met, new graduates will contact their community Team Leader, verify dates, times, and information related to the qualifying events, and tell the team leader what academy they graduated from. Some team leaders may request to have you send them this information in an electronic document. Kindly cooperate with your team leader's request!

After that, community Team Leaders will turn in this information to their appropriate Battalion Liaison, who will then process, verify, and turn in the data to the CERT San Diego program office.

Recordkeeping Responsibilities

Graduates are responsible for maintaining their training records and turning in this information in each month to their community Team Leaders. The Date, Name of Event, and Length of Time need to be turned in. **If this is a pre-approved, non-CERT SD sponsored training, some form of letter of completion must be provided.**

Please note that the CERT San Diego program office will not process any DSW renewals unless they follow the chain of command mentioned above. DSW cards are processed** the first week of each month.

* Definition of a qualifying Continuing Education: Classes, seminars, exercises/drills that cover or expand on topics in the CERT Academy and relevant to our location; must be at least two hours long; and available to the public (ie, training offered at or required for work does not qualify; some trainings offered by Red Cross does qualify).

**Turn-around time after batches are submitted to OES may vary.
