City of San Diego

## Water Purification Demonstration Project

### ***Did you know?***

The City of San Diego imports approximately 85 to 90 percent of its water supply and recent court ordered restrictions have reduced the amount of water that reaches San Diego.

### ***What is being done?***

San Diego's Water Purification Demonstration Project is examining the use of advanced water purification technology on high quality recycled wastewater to provide a safe, local and sustainable water supply for the future.

### **We would like to make a presentation to your group**

The presentation will include:

- ◇ San Diego's need for a local, reliable water supply
- ◇ The purpose of the Water Purification Demonstration Project
- ◇ The advanced water purification process
- ◇ The potential use of advanced purified water for Reservoir Augmentation in the future

Recycled Wastewater
