## **Multiple Species Conservation Program Annual Report Workshop**

You're invited to learn about regional habitat conservation accomplishments and goals at the Multiple Species Conservation Program (MSCP) Annual Report Workshop.

Join us Tuesday, August 11 to hear presentations by local jurisdictions, state and federal agencies on completed, current and future projects.

This is an opportunity for the public to gain insight into San Diego County's unique habitats, and the role of the MSCP in preserving both open space and biological diversity.
