

THE CITY OF SAN DIEGO

Draft Vernal Pool Habitat Conservation Plan Draft Technical White Papers and Draft Preserve Boundary Maps

City of San Diego Vernal Pool Habitat Conservation Plan (HCP) is envisioned as a comprehensive planning approach to preserve threatened and endangered vernal pool species and their habitat within the City's jurisdiction. A series of Technical White Papers (TWPs) were prepared by AECOM to provide information on the current status of vernal pools within the City of San Diego and to provide analysis and recommendations that will be used in the formulation of the draft HCP. In addition, six scientific reviewers provided independent written comments on TWPs. The TWPs and scientific reviewers assigned are:

Technical White Paper Descriptions and Scientific Reviewer Assignments		
TWP 1	Draft focal species status update in the City of San Diego	Ellen T. Bauder, Ph.D.
		Marie Simovich, Ph.D.
TWP 2	Draft assessment of conservation of seven focal species	Ellen T. Bauder, Ph.D.
		Marie Simovich, Ph.D.
TWP 3 & TWP 4	Draft adaptive management and monitoring strategy	Mark Doderer, M.S.
		Andrew J. Bohonak, Ph.D.
TWP 5	Draft cost evaluation for implementation of management and monitoring strategy	Christina M. Schaefer, MLA, M.Sc.
TWP 6	Draft recommendations for conditions of coverage	Andrew J. Bohonak, Ph.D.
		Paul Fromer, M.S.

For each TWP, there is a Draft TWP, scientific reviewer comments, and a Final Draft TWP that incorporates substantive comments specific to the scope and intent of the TWPs.

The documents are included on this CD and posted to the City of San Diego Web site at www.sandiego.gov/planning/mscp. Copies of the draft preserve boundaries were also included on the CD and Web site.
