Old Town Pedestrian Plan

Pedestrian Master Plan – Phase 4

Old Town Community Description
The Old San Diego Community (Old Town) is bounded on the north by I-8 and Mission Valley, on the west by I-5 and Midway, and on the south and east by the Uptown/ Mission Hills hillsides. It is the site of initial settlement in San Diego and the birthplace of the State of California. This settlement, preserved in Old Town San Diego State Historic Park, is a major visitor attraction which gives the entire area a tourist-serving orientation. The San Diego Trolley, passenger trains, and buses serve this area at the Old Town Transit Center adjacent to the historic park. Taylor Street and San Diego Avenue provide the primary freeway access.

Streets in Old Town generally follow a grid pattern and are busy with visitors on foot patronizing the many restaurants and shops in the area. Old Town also has a mix of office uses, residential uses, and lodging. Slopes toward Presidio Park and nearby residential areas can be quite steep; in places, natural slopes and drainages interrupt the street grid. In the core village area, blocks are generally short, with buildings fronting the street.

Community Outreach
The project was presented at the Old Town San Diego Community Planning Committee Meeting in September 2012. At that time, the Focus Area was presented and community members were encouraged to complete Walk Audits and the Online Survey.

Since Old Town was going through the Community Plan Update process that began before this project, significant community input related to pedestrian issues had already been collected. This input was utilized for the Pedestrian Master Plan process as well.

Old Town residents and business owners were also invited to attend two Open House events held in December 2012 to review the recommendations for their community. At each Open House, recommendations for all Phase 4 communities were presented and participants were encouraged to provide input and complete surveys to share their thoughts and ideas on the plan. The survey feedback collected was specific to each community. Open House participants returned a total of 41 survey forms, including three for the Old Town Community.

Inventory of Missing Sidewalks and Curb Ramps
The City of San Diego and SANDAG provided detailed information regarding missing sidewalks and existing curb ramps. GIS files for existing sidewalks and curb ramps were provided by SANDAG for inclusion in the base mapping efforts. A visual inspection of field conditions was conducted to verify the
accuracy of the information provided and to identify the presence of sidewalk obstructions, pedestrian activity and other pedestrian issues in this community. Missing sidewalks and curb ramps are illustrated in Exhibit OT-1.

Route Types
All roadways within the Old Town Community were classified based on pedestrian functionality as defined in the Phase I Framework Document. There are four key route types included in the Old Town Community: District, Corridor, Connector and Neighborhood. Exhibit OT-2 illustrates the Route Type Classifications defined within the Old Town Community.

Focus Areas
Focus Areas narrow down the routes within each community studied in the Master Plan. In most cases routes that are not within the Focus Area are located in low density residential areas, industrial areas, or areas with low demand for pedestrian activity.

The Pedestrian Priority Model (PPM) was used to calculate a priority score for all routes within the Old Town area. Point values associated with each of the five key priority factors, as defined in the Phase I Framework Document, were summed to provide an overall priority score. Once the routes had an associated score, the mean and standard deviation was calculated specific for the Old Town Community, which was used to determine the Tier 1 (highest ranking) and Tier 2 (second highest ranking) routes. Tier 1 and Tier 2 routes were included in the Focus Area. Focus areas were refined as a result of the existing conditions needs assessment and input from the community. Exhibit OT-3 illustrates the Old Town Focus Area routes.

Improvement Areas
Overlaying the existing conditions, physical conditions assessment and community input, Improvement Areas were defined within the Focus Area for the Old Town Community. Improvement Areas are defined as either intersection improvements or corridor improvements. Intersection improvements focus on a single intersection or a group of intersections within a reasonable proximity of one another. Corridor improvements focus on improvements either along a roadway or through a series of intersections.
The Pedestrian Master Plan improvement concepts address deficiencies and provide recommendations based largely on existing conditions. It should be noted that the Old Town community is undergoing a Community Plan Update (CPU) process that is developing a long term vision of the community. The Pedestrian Master Plan contains recommendations that could be implemented in a shorter time frame than many potentially larger-scale projects being considered for the long term as part of the CPU.

For the Old Town Community, nine Improvement Areas were defined, which are illustrated in Exhibit OT-4 and summarized in the table on the following page. Following the exhibit and table, recommendations for each Improvement Area are described in detail.

**Priority Score**

The Improvement Areas and recommended projects within each improvement area were then evaluated against priority ranking criteria established during Phase I of the Pedestrian Master Plan. Priority scores were based on issues and recommendations associated with walkability, safety, connectivity and accessibility.
## Improvement Area Recommendations

<table>
<thead>
<tr>
<th>Improvement Area</th>
<th>Recommendations</th>
<th>Priority Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>OT-1 Presidio Park Connectivity Improvements</td>
<td>Improve pedestrian walkability from Taylor Street and to the Presidio Park.</td>
<td>18</td>
</tr>
<tr>
<td>OT-2 Taylor Street Safety Improvements</td>
<td>Improve safety on Taylor Street at locations where multi-modal interactions occur to reduce conflicts.</td>
<td>12</td>
</tr>
<tr>
<td>OT-3 Congress Street / San Diego Avenue Merge Intersection Improvements</td>
<td>Evaluate feasibility of modifying geometry and traffic control to reduce pedestrian crossing distances.</td>
<td>16.5</td>
</tr>
<tr>
<td>OT-4 Congress Street Access Improvements</td>
<td>Implement missing sidewalks and evaluate feasibility of adding marked crosswalks to channelized pedestrian crossing.</td>
<td>17</td>
</tr>
<tr>
<td>OT-5 Twiggs Street Intersection Improvements</td>
<td>Modify intersection to provide increased visibility and priority to pedestrians.</td>
<td>17</td>
</tr>
<tr>
<td>OT-6 Juan Street Sidewalk Improvement</td>
<td>Implement recommended improvements included in the Juan Street Rehabilitation Project. In addition, the sidewalks should be widened whenever possible and new marked crossings should be implemented.</td>
<td>21</td>
</tr>
<tr>
<td>OT-7 San Diego Avenue Access Improvements</td>
<td>Conduct feasibility study to reconfigure intersection to reduce crossing distance and increase sidewalk capacity near San Diego Avenue / Conde Street.</td>
<td>24</td>
</tr>
<tr>
<td>OT-8 Mason Street Sidewalk Improvement</td>
<td>Implement sidewalk on east side of Mason Street.</td>
<td>12</td>
</tr>
<tr>
<td>OT-9 Jackson Street Sidewalk Improvements (Mason Street to Presidio Drive)</td>
<td>Implement connectivity improvements to link Presidio Drive and Old Town parks.</td>
<td>7</td>
</tr>
</tbody>
</table>
Exhibit OT-1: Missing Sidewalk and Curb Ramps

San Diego Pedestrian Master Plan Phase 4: Midway - Pacific Highway - Old Town

City of San Diego
Exhibit OT-2: Route Type Classifications
Exhibit OT-3: Focus Area
Recommendaitions: Improve pedestrian walkability from Taylor Street and to the Presidio Park.

(See Table OT-1 for more detailed descriptions)

Note: These concepts are for illustrative purposes only. They are not intended to serve as the only solution and further study and community input may be necessary before engineering design is complete.

- Install ADA compliant curb ramp on southeast corner of Morena Blvd / Taylor St
- Implement sidewalk and ADA compliant curb ramps on north side of Whitman St from Taylor St to Presidio Recreation Center
- Modify intersection at Presidio Dr / Jackson St to remove sweeping right
- Evaluate feasibility of roundabout in lieu of stop control
- Implement crosswalks on southwest corner of Presidio Dr and Jackson St
- Install ADA compliant curb ramp on southeast corner of Morena Blvd / Taylor St
- Install ADA compliant curb ramp on southwest corner of Morena Blvd / Taylor St
Improve safety on Taylor Street at locations where multimodal interactions occur to reduce conflicts.

- **Note:** These concepts are for illustrative purposes only. They are not intended to serve as the only solution and further study and community input may be necessary before engineering design is completed.

**Long term grade separation (SANDAG RTP Project)**

**NEAR TERM IMPROVEMENTS:**

1. **Install pedestrian crossing arms on Taylor St at train tracks**
2. **Modify signal timing to include lead time for pedestrians at Taylor St / Congress St**
3. **Install MUTCD sign “Turning Traffic Must Yield to Pedestrians” on Taylor St for EB right turn**
4. **Modify curb and install ADA compliant curb ramps on northwest corner of Taylor St / Pacific Hwy**

See Table OT-2 for more detailed descriptions.
Re commendations: Evaluate feasibility of modifying geometry and traffic control to reduce pedestrian crossing distances. (See Table OT-3 for more details)

- Evaluate feasibility of installing additional crosswalks and raised curbs on Congress St.
- Add signage to prohibit right turns from San Diego Ave to Congress St.
- Evaluate feasibility of installing curb extensions and raised crosswalks on Congress St.
- Add green to provide right turn lanes from 5th Ave to Congress St.
- Eliminate pedestrian crossing distance

Note: These concepts are for illustrative purposes only. They are not intended to serve as the only solution and community input may be necessary after more thorough design is completed.
Recommendaions: Implement missing sidewalks and evaluate feasibility of adding marked crosswalks to channelized pedestrian crossing.

Evaluate feasibility of installing marked crosswalks on east, west, and south legs of Mason St / Congress St

Widen sidewalk on south side of Congress St from Mason St to Twiggs St

Install marked crosswalks on all legs of intersection and implement sidewalk where asphalt walks exist

Evaluate feasibility of installing marked crosswalks on east, west, and south legs of Mason St / Congress St

See Table OT-4 for more detailed descriptions

Note: These concepts are for illustrative purposes only. They are not intended to serve as the only solution and further study and community input may be necessary before engineering design is complete.
Recommendations: Modify intersection to provide increased visibility and priority to pedestrians. (See Table OT-5 for more detailed descriptions)

Note: These concepts are for illustrative purposes only. They are not intended to serve as the only solution and further study and community input may be necessary for the engineering design to complete.

Implement raised intersection with pavers at Twiggs St / SD Ave

Modify commercial driveway south of Twiggs St / Juan St to provide pedestrian access and improve sidewalk along one side of Twiggs St from Juan St to Mason St

San Diego Ave

Twiggs St

Juan St

Sunset St

实施人行道在 TWIGGS ST / SD AVENUE 的提升交叉口

修改商业车道南侧的 Twiggs ST / Juan ST，以提供人行道访问并改善人行道沿着 Twiggs ST 一侧

San Diego Ave

Twiggs ST

Juan ST

Sunset ST
Recommendations: Implement recommended improvements included in the Juan Street Rehabilitation Project. In addition, the sidewalks should be widened whenever possible and new marked crossings should be implemented.

(See Table OT-6 for more detailed descriptions)

Note: These concepts are for illustrative purposes only. They are not intended to serve as the only solution and further study and community input may be necessary before engineering design is complete.
Recommandations: Conduct feasibility study to reconfigure intersection to reduce crossing distance and increase sidewalk capacity near San Diego Avenue / Conde Street.

Note: These concepts are for illustrative purposes only. They are not intended to serve as the only solution and further study and community input may be necessary before engineering design is complete.

- Conduct feasibility study to reconfigure intersection of San Diego Ave / Conde St / Linwood St
- Install marked crosswalks on all legs at San Diego Ave / Conde St including ADA compliant curb ramps
- Implement median island on corner of Linwood St / San Diego Ave including ADA compliant curb ramps
- Widen sidewalk on east side of San Diego Ave from Linwood St to Arista St 

(See Table OT-7 for more detailed descriptions)
Recommandations:

- Implement sidewalk on east side of Mason Street.
- (See Table OT-8 for more detailed descriptions)
- Note: These concepts are for illustrative purposes only. They are not intended to serve as the only solution and further study and community input may be necessary before engineering design is complete.

- Replace asphalt sidewalk on west side of Mason Street with concrete sidewalk.
- Install ADA compliant curb ramps at all intersections.
- Install street lighting along west side of street.

See Table OT-8 for more detailed descriptions.
Implement sidewalk on west side of Jackson St from Mason St to Presidio Drive

Recommendations: Implement connectivity improvements to link Presidio Drive and Old Town parks.

Note: These concepts are for illustrative purposes only. They are not intended to serve as the only solution and further study and community input may be necessary before engineering design is complete.

See Table 08-9 for more detailed descriptions.
**Improvement Area OT-1:**  
Presidio Park Connectivity Improvements

**Purpose & Need:**  
This area is a main connection to Presidio Park from Taylor Street, however it lacks sidewalks along Morena Boulevard and Whitman Street. The T-intersection of Presidio Drive and Jackson Street features sweeping right turns where vehicles fail to yield to pedestrians. The configuration of the intersection also results in long crossing distances for pedestrians. In this project, pedestrian safety and connectivity would be improved from Taylor Street to the Presidio Park.

![Whitman Street east of Taylor Street](image1)

![Eastbound Presidio Drive at Jackson Street](image2)

![Northbound Jackson Street at Presidio Drive](image3)

**Recommended Improvements:**  
Improve pedestrian walkability from Taylor Street and to the Presidio Park. Improvements are detailed in the table below.
### Table OT-1: Presidio Park Connectivity Improvements

<table>
<thead>
<tr>
<th>Location</th>
<th>Description</th>
<th>Goal</th>
<th>Objective</th>
<th>Est. Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>Morena Blvd / Taylor St.</td>
<td>1) Install ADA compliant curb ramp on southeast corner</td>
<td>A</td>
<td>Improve access &amp; mobility</td>
<td>$3,000</td>
</tr>
<tr>
<td>Whitman Street</td>
<td>2) Implement sidewalk and ADA compliant curb ramps on north side of street to connect Morena Boulevard to Presidio Recreation Center.</td>
<td>A, S, C</td>
<td>Improve access &amp; mobility</td>
<td>$42,000</td>
</tr>
<tr>
<td>Presidio Drive / Jackson Street</td>
<td>3a) Evaluate the feasibility of modifying the intersection to remove sweeping right turn lane and reduce crossing distance.</td>
<td>S</td>
<td>Reduce speed of motor vehicles and reduce pedestrian crossing distance.</td>
<td>$186,000</td>
</tr>
<tr>
<td></td>
<td>3b) Evaluate the feasibility of installing a roundabout at intersection in place of existing stop control</td>
<td>S, W</td>
<td>Improve circulation of vehicles and pedestrians; reduce speed of vehicles</td>
<td>$50,000</td>
</tr>
<tr>
<td></td>
<td>4) Implement sidewalks with ADA compliant curb ramps on north and south side of Presidio between the existing alley adjacent to the Rec Center and Jackson Street. Update sidewalk and curb ramps on east side of intersection to be ADA compliant and stripe new marked crosswalks on all legs.</td>
<td>A, S, C</td>
<td>Improve access &amp; mobility</td>
<td>$42,000</td>
</tr>
</tbody>
</table>

**TOTAL ESTIMATED COST** $323,000

---

*Goal codes: A = Accessibility, S = Safety, C = Connectivity, W = Walkability*
**Improvement Area OT-2:**
Taylor Street Safety Improvements

**Purpose & Need:**
Taylor Street sustains a high level of pedestrian activity to and from the Old Town Transit Center which features bus platforms, and trolley platforms, as well as a stop for the Amtrak and the Coaster trains. Pedestrians use Taylor Street to access the main parking lot for the Transit Center, the State Park and the Rosecrans commercial corridor. Within this project area there are four sets of train tracks that cross over Taylor Street. The tracks lack any type of pedestrian specific crossing signals or signs. When trains approach the station in Old Town, the pedestrian crossing times at the adjacent signalized intersections are reduced (Congress Street and Pacific Highway) making the pedestrian crossing time shorter than normal. Improvements are needed at the southwest corner of Congress and Taylor Street to improve pedestrian visibility and motorists yielding for pedestrians crossing the south leg.

This project would improve the walking conditions along Taylor Street and address safety and walkability issues at both the Pacific Highway / Taylor and Congress / Taylor intersections.

*No signage or pedestrian crossing signals at train tracks on Taylor Street*

*Taylor Street at Congress Street – right-turning vehicles don’t yield to pedestrians*

*Taylor Street at Pacific Highway – crossing signals too short from train preemption*
**Recommended Improvements:**
Improve safety on Taylor Street at locations where multi-modal interactions occur to reduce conflicts.

**Table OT-2: Taylor Street Safety Improvements**

<table>
<thead>
<tr>
<th>Location</th>

<td>$57,000</td>
</tr>
</tbody>
</table>

**TOTAL ESTIMATED COST**

$160,250

[1] A = Accessibility  S = Safety  C = Connectivity  W = Walkability
**Improvement Area OT-3:**
Congress Street / San Diego Avenue Merge Intersection Improvements

**Purpose & Need:**
Congress Street merges into San Diego Avenue immediately south of the main shopping and restaurant corridor in Old Town. High pedestrian activity occurs here from people entering and exiting the center of town. Ampudia Street also intersects this merge, making this a five-legged intersection and resulting in long crossing distances and an unclear path of travel. Both of these factors contribute to an uninviting pedestrian environment. This project would evaluate the feasibility of modifying the geometry of the intersection to improve walkability at this location.

**Recommended Improvements:**
Evaluate feasibility of modifying geometry and traffic control to reduce pedestrian crossing distances.

Table OT-3: Congress Street / San Diego Avenue Merge Intersection Improvements

<td></td>
<td></td>
<td><strong>$82,000</strong></td>
</tr>
</tbody>
</table>

[1] A = Accessibility     S = Safety
    C = Connectivity     W = Walkability
Improvement Area OT-4:
Congress Street Access Improvements

Purpose & Need:
Congress Street is a main connection from the Old Town Transit Center to the entrance of the Historic Old Town State Park. There are also a few shops and restaurants along this road that attract pedestrian activity. The intersections in this area can be very busy on weekends and during peak seasons. Most intersections lack marked crosswalks. Distracted drivers often do not yield for pedestrians walking to and from the Old Town State Park. Sections of Congress Street as well as Twiggs Street include asphalt sidewalks rather than concrete or lack any sidewalk at all. These conditions along with poles and fire hydrants blocking sections of the sidewalk all add to poor walkability in the area.

This project would improve the walking conditions along Congress Street and address access and walkability issues at both Twiggs St. / Congress St. and Mason St. / Congress St. intersections.

Recommended Improvements:
Implement missing sidewalks and evaluate feasibility of adding marked crosswalks to channelized pedestrian crossing.
### Table OT-4: Congress Street Access Improvements

<table>
<thead>
<tr>
<th>Location</th>
<th>Description</th>
<th>Goal (^1)</th>
<th>Objective</th>
<th>Est. Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>Congress Street / Mason Street</td>
<td>1) Evaluate feasibility of installing marked crosswalks on the east, west and south legs of the intersection.</td>
<td>A</td>
<td>Provide clear path of travel for pedestrians through the intersection</td>
<td>$7,500</td>
</tr>
<tr>
<td>Congress Street from Mason Street to Twiggs Street</td>
<td>2) Widen sidewalk on south side. Implement concrete sidewalk on south side where asphalt walkway exists and install ADA compliant curb ramps.</td>
<td>W, A, C</td>
<td>Remove obstacles (poles and fire hydrants) and improve connectivity along segment</td>
<td>$27,000</td>
</tr>
<tr>
<td>Congress Street / Twiggs Street</td>
<td>3) Install marked crosswalks on all legs of the intersection.</td>
<td>A</td>
<td>Provide clear path of travel for pedestrians through the intersection</td>
<td>$3,000</td>
</tr>
<tr>
<td></td>
<td>4) Implement curb extensions with ADA compliant curb ramps on corners of intersections.</td>
<td>W; S</td>
<td>Improve comfort for areas with obstacles (poles and fire hydrants) and improve crossing safety</td>

</tr>
<tr>
<td>Twiggs Street south of Congress</td>
<td>5) Implement concrete sidewalk and ADA compliant curb ramps as needed</td>
<td>C; A</td>
<td>Improve access and connectivity along segment</td>
<td>$18,000</td>
</tr>
</tbody>
</table>

**TOTAL ESTIMATED COST** $139,500

\(^1\) A = Accessibility   \(S =\) Safety
\(C =\) Connectivity   \(W =\) Walkability
Improvement Area OT-5:
Twiggs Street Intersection Improvements

Purpose & Need:
Twiggs Street provides access to the Old Town State Park and connects the Old Town State Park to Presidio Park. The intersection of Twiggs Street at San Diego Avenue is a gateway between the Old Town State Park and the main shopping/eating areas along San Diego Avenue. This intersection currently lacks marked crosswalks on all legs. There are missing curb ramps and sidewalks along Twiggs Street as pedestrians approach Juan Street and Sunset Street which creates poor connectivity and access for all users.

This project would improve the walking conditions along Twiggs Street and address intersection issues to increase visibility and priority for pedestrians.

Recommended Improvements:
Modify intersection to provide increased visibility and priority to pedestrians.

Table OT-5: Twiggs Street Intersection Improvements

<table>
<thead>
<tr>
<th>Location</th>
<th>Description</th>
<th>Goal</th>
<th>Objective</th>
<th>Est. Cost</th>
</tr>

<tr>
<td>Twiggs/Sunset Street north of Juan Street</td>
<td>3) Assess feasibility of implementing sidewalk along one side of street from Juan Street to Mason St</td>
<td>A; C</td>
<td>Improve connectivity from Old Town district to Sunset Street</td>
<td>$15,000</td>
</tr>
</tbody>
</table>

TOTAL ESTIMATED COST: $172,200

(1) A = Accessibility, S = Safety, C = Connectivity, W = Walkability
Improvement Area OT-6:
Juan Street Sidewalk Improvement

Purpose & Need:
Juan Street provides a main connection between Taylor Street and the Old Town State Park and borders the Presidio Recreation Center. Pedestrians are frequently observed crossing Juan Street. This area lacks marked crosswalks and the existing sidewalk is obstructed in many locations by bushes or poles and are poorly maintained. These conditions result in an uncomfortable walking environment and lack of connectivity.

This project would improve the walking conditions along Juan Street.

Recommended Improvements:
Implement recommended improvements included in the Juan Street Rehabilitation Project. In addition, the sidewalks should be widened whenever possible and new marked crossings should be implemented.

Table OT-6: Juan Street Sidewalk Improvement

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

(1) A = Accessibility  S = Safety  C = Connectivity  W = Walkability

Juan Street at Mason Street – obstacles include overgrown bushes and light pole
**Old Town Pedestrian Plan**

### Improvement Area OT-7:
San Diego Avenue Access Improvements

**Purpose & Need:**
San Diego Avenue is a highly traveled pedestrian route from the Historic Old Town State Park to the businesses and residential areas of Old San Diego. Through this area, on-street parking is permitted along most of the corridors and along the side streets. Sidewalks are narrow and often lined with small signs placed by the local businesses, which limits the pedestrian capacity along this route. The intersection of Conde Street and San Diego Avenue is a five legged intersection where it ties in with Linwood Street. This large expanse of asphalt is difficult for pedestrians to navigate.

This project would improve the walking conditions along San Diego Avenue and address access and walkability issues at San Diego Avenue / Conde Street.

**Recommended Improvements:**
Conduct feasibility study to reconfigure intersection to reduce crossing distance and increase sidewalk capacity near San Diego Avenue / Conde Street.

### Table OT-7: San Diego Avenue Access Improvements

</tbody>
</table>

---

[1] A = Accessibility  S = Safety  C = Connectivity  W = Walkability
Improvement Area OT-8:
Mason Street Sidewalk Improvement

**Purpose & Need:**
Mason Street provides connectivity to the Presidio loop from the Old Town State Park. This area lacks sidewalks along some segments. This project would address connectivity issues along Mason Street.

**Recommended Improvements:**
Replace asphalt sidewalk on west side of Mason Street with concrete sidewalk.

<table>
<thead>
<tr>
<th>Table OT-8: Mason Street Sidewalk Improvement</th>

<td>$30,000</td>
</tr>
</tbody>
</table>

**TOTAL ESTIMATED COST**

$175,500
**Old Town Pedestrian Plan**

**Improvement Area OT-9:**
Jackson Street Sidewalk Improvements (Mason Street to Presidio Drive)

**Purpose & Need:**
Jackson Street fronts the Presidio Park and is a connection between the Old Town Historic Park and the Presidio Park. There are missing sidewalks on both sides of the street from Mason Street to Presidio Drive, both of which are key connection points. This project would improve the connection by providing pedestrian facilities along the corridor.

![Jackson Street – no sidewalks](image_url)

**Recommended Improvements:**
Implement connectivity improvements to link Presidio Drive and Old Town parks.

**Table OT-9: Jackson Street Sidewalk Improvements (Mason Street to Presidio Drive)**

<table>
