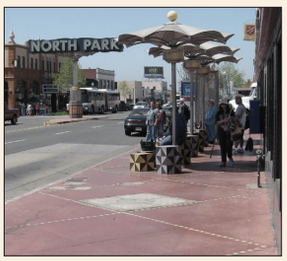
CITY OF SAN DIEGO

PEDESTRIAN MASTER PLAN

Phase 2

Fact Sheet



The City of San Diego is developing a Pedestrian Master Plan to guide the way the City plans and implements pedestrian improvement projects. The Pedestrian Master Plan will help the City enhance neighborhood quality and mobility options by facilitating pedestrian improvement projects. The Plan will identify and prioritize improvement projects based on technical analysis and community input and will improve the City's ability to receive grant funding to implement pedestrian projects.

The City, in consultation with Alta Planning + Design, is currently in Phase 2 of the planning process. During Phase 1, the City developed the PMP-Citywide Framework Report which provides a foundation for identifying and prioritizing pedestrian projects in each San Diego community. The PMP-Citywide Framework Report was completed in December 2006 and is available online at: http://www.sandiego.gov/planning/programs/transportation/pdf/pmptoc.pdf

Phase 2 of the process will involve inventorying 7 communities in the city to understand pedestrian needs, identify problems and create a prioritized list of pedestrian projects specific to each community.

- City Heights
- Normal Heights
- Southeastern San Diego
- Golden Hill
- Greater North Park
- Uptown
- Barrio Logan

Eventually the Pedestrian Master Plan will include a chapter for each City of San Diego Community Planning Area.

As the Pedestrian Master Plan Community Chapters are developed, the City will hold a public workshop for each community in order to collect public input. Please participate in helping to improve the pedestrian environment and increase opportunities to choose walking as a mode of transportation.

To learn more about the project, track progress, complete a survey and provide input visit: http://www.sandiego.gov/planning/programs/transportation/mobility/pedestrian.shtml or contact:
