

# POWERHEART® AED Storage Solutions

Keep your AED highly visible and easy-to-access

## Primary Users

- Health care facilities
- Sports venues
- Schools
- Recreation facilities
- Places of worship
- Any public place

## Primary Benefits

**Ease of access.** Wall-mount cabinets and sleeves let you keep your AED in one clearly marked location known to everyone responsible for safety at your facility.

**Visibility.** Wall-mount cabinets and sleeves are clearly marked "AED," so even someone new to your facility can identify the AED if an emergency occurs.

**Portability.** The Cardiac Science backpack and carry case solutions make it easy to transport your AED while keeping one or both hands free. These are ideal for transporting your AED to an athletic field or remote location.

**Emergency communication.** The audible alarm and strobe light options on the wall-mount cases ensure that people in your facility are aware of an emergency in progress.

## When seconds count, make sure you can find your AED

Having a highly visible, well-marked cabinet to house your facility's AED can make a life-saving difference when sudden cardiac arrest occurs.

Cardiac Science offers a variety of wall-mount cases, metal sleeves, racks, and baskets to keep your AED visible and accessible to rescuers at all times. The audible alarm and strobe light options for the wall-mount cases can help you make sure that people nearby are alerted that an emergency is in progress.

These storage solutions are ideal for busy facilities including schools, corporations, airports, health clubs, hotels, manufacturing plants, and sport arenas.

## Take your AED into the field

You can extend the assurance of heart safety to events that take place outdoors. Having a backpack or case to transport an AED to an athletic field or outdoor concert, or over rough terrain for search-and-rescue efforts, means not having to waste precious minutes running back to a field house or vehicle should an emergency occur.

Cardiac Science provides a range of carrying options suitable for professional rescue teams, scouting organizations, or community recreation groups.
