* Businesses were scored during inspections on a scale from 0 to 5 for each pollutant category. Based on inspection results for all businesses in each category an aggregate score from 0 to 5 was determined for each pollutant. A score of 2 or greater was marked with an "X" due to the increased likelihood of that pollutant being present and possibly discharged.

City of San Diego
Urban Runoff Management Program

The City has identified potential pollutants generated by the site/sources in this inventory. Please see the table at the end of this appendix for pollutants.

Because virtually all lands in the City's Jurisdiction discharge to, or are tributary to, a 303(d) listed water body, lagoon, or water body on environmentally sensitive lands, all sites/sources in this inventory are considered to fall under that category, and additional BMPs have been identified (see Appendix X, "Industrial/Commercial BMPs").
