### *San Vicente Reservoir Reopens to Public Recreation*

SAN DIEGO – San Vicente Reservoir reopens to public recreation on Friday, March 31, 2006. Due to a recent sewage spill upstream near Ramona, the Water Department had temporarily closed San Vicente Reservoir to all water-based recreation such as water skiing, wakeboarding, and fishing to ensure public health and safety. Water quality samples collected on Monday, Tuesday, and Wednesday were all within acceptable limits resulting in the reopening of the reservoir for public recreation.

The sewage spill, estimated at 82,500-gallons, occurred Monday morning, March 27, near the 24000 block of San Vicente Road in Ramona. The spill, which was caused by vandalism of a sewer main, was remedied by crews from the Ramona Municipal Water District who removed the debris that was obstructing the sewer line. The spill flowed into San Vicente Creek, which ultimately flows into San Vicente Reservoir. San Vicente Reservoir is currently not supplying water to the City's distribution system. The California Department of Health Services and the County Department of Environmental Health were notified of the spill and are being kept apprised of water quality test results.

*For more information on San Vicente Reservoir, please call the City of San Diego at (619) 527-3121. For more information on the sewage spill, please call the Ramona Municipal Water District at (760) 788-2211.*

*The Water Department maintains the water system that serves San Diego, and provides treated water service to the City of Del Mar, and wholesale water service to the California-American Water Company delivering water to Coronado, Imperial Beach, and portions of southern San Diego. This includes the treatment and delivery of more than 200 million gallons of water that is transported daily through more than 3,000 miles of pipelines. For more information about the Water Department's programs and services, please visit [www.sandiego.gov/water](http://www.sandiego.gov/water) or call (619) 515-3500 for general information.*
