

The City of San Diego
MEMORANDUM

DATE: October 22, 2019

TO: James Nagelvoort, Director, Public Works

FROM: Claudia C. Abarca, Deputy Director, Public Works Contracts *CAbarca*

SUBJECT: **REVISED:** Sole Source Agreement for Asbestos Cleanup, Monitoring, and Miscellaneous Abatement with Argus Pacific Contracting (101 Ash Street)

Estimated Amount: \$184,450

Contractor: Argus Pacific Contracting

Contract Completion Date: December 31, 2019

Pursuant to SDMC §22.3108 (a), "Exceptions to Advertisement and Competitive Award of Public Works Contracts", this is to certify that a sole source agreement with the contractor named above is necessary and that strict compliance with a competitive process would be unavailing or would not produce an advantage, and soliciting bids or proposals would be undesirable, impractical or impossible for the following reasons:

JUSTIFICATION:

The original sole source request for the agreement with Argus Pacific Contracting was in the amount of \$100,000 and was to hire an abatement and monitoring contractor to properly remove, clean and dispose of any asbestos containing materials (ACM) as well as provide visual and air quality monitoring services throughout the building located at 101 Ash Street. Once on site, it was identified that mastic containing ACM was present under the carpet on the third floor. The presence of this material results in additional work and fees from what was previously identified. The additional work is expected to cost approximately \$84,450 making the new estimated total \$184,450.

AGREEMENT VALUE & DURATION:

Unless a modification to the agreement and this sole-source request is issued, the total fee for these services shall not exceed the amount noted above. The term of the agreement will be in effect from date of the agreement execution and shall not exceed the contract completion date noted above.

**THE CITY OF SAN DIEGO****M E M O R A N D U M**

DATE: October 17, 2019

TO: Claudia Abarca, Deputy Director, Public Works/Contracts

FROM: Julie Ballesteros, Assistant Deputy Director, CMFE Division

SUBJECT: Request for Sole Source Agreement with Argus Contracting to provide asbestos cleanup, monitoring and miscellaneous abatement for the building's Operations and Maintenance.

This memorandum requests authorization for a sole source minor repair contract to provide asbestos cleanup, monitoring and miscellaneous abatement throughout 101 Ash Building, so that the building's Operations and Maintenance (O&M) work can be conducted safely throughout the building.

Various O&M work is required throughout all levels of 101 Ash Street Building in order to maintain the operations of the building. Due to the presence of Asbestos Containing Material (ACM) throughout the building, it is imperative that an abatement and monitoring contractor is hired to properly remove, clean and dispose any ACM, as well as to provide visual and air quality monitoring services prior to any O&M work is performed by others. The amount requested for this work is not to exceed \$100,000.

In addition to the various O&M work required throughout the building, mastic containing ACM was also identified under the third floor carpet in 101 Ash St. The mastic found is a general glue-like flooring adhesive that contains ACM. It has been determined that this mastic must be removed now as a preventative maintenance to the building, as this may cause significant issues if removed at a later time. This work is not to exceed \$84,450.

Argus Pacific Contracting (Argus) is a Consulting and Abatement contractor that has the required level of expertise and resources to provide ACM abatement, cleaning, and disposal services, as well as visual and air quality monitoring services. Providing a clean and stable working condition is crucial for the O&M vendors to continue with current and future O&M work throughout the building. If this work cannot be performed or is delayed, multiple O&M work cannot be performed and consequently the building cannot be occupied by City San Diego employees by the allotted time.

Therefore, it is requested that a sole source contract in the amount not to exceed \$184,450.00 be awarded to Argus for these services.

1. Hazardous substances, hazardous wastes, or items, and equipment containing hazardous substances or hazardous wastes shall be handled in such a way as to minimize the possibility of a release.
2. Hazardous substances shall always be kept in an approved, compatible, and closed container with a legible label identifying the contents. No interim containers shall be acceptable.
3. Containers used to package hazardous waste shall be compatible with the waste (22 CCR 66265.172), maintained in good condition (22 CCR 66265.171), and kept closed unless adding or removing waste (22 CCR 66265.173).
4. Different waste types shall be stored in separate containers and incompatible wastes shall never be combined or stored near each other.
5. Any packaging used to store and or transport hazardous waste off-site such as a container, roll-off bin, tank or other device, shall comply with 49 CFR Parts 173, 178, 179 and be labeled and prepared for transportation in accordance with 22 CCR Article 3.
6. A hazardous waste label shall be affixed to the container and filled out when the first amount of hazardous waste or hazardous substance is placed in the container. The label shall include the generator information, contents of the container, physical state and hazardous properties of the waste, and the initial accumulation date. The Contract appendices contain a sample hazardous waste label.
7. The Contractor shall use a numbering system to identify each hazardous waste container. Each hazardous waste container shall be marked with an identification number specific to that individual container.
8. Additional pre-transportation labeling and marking or using placards shall be conducted prior to transporting hazardous waste off-site and in accordance with 22 CCR Chapter 12, Article 3 and 49 CFR.

9. Containers, containment systems, and tanks of hazardous materials and hazardous waste shall be managed in a way which minimizes the threat of fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste to the air, soil, or surface water which could threaten human health or the environment (22 CCR 66265.31).
10. Secondary containment shall be provided at a minimum for storage areas containing 55 gallons or more of hazardous material or hazardous waste. The secondary containment area shall be capable of holding the contents of the largest container plus 10% of that volume or in accordance with applicable regulations (22 CCR 66264.175).
11. Secondary containment areas shall be maintained so any releases will be confined within the secondary containment area. Rips, tears, cracks, breaks, etc. that compromise the integrity of the secondary containment shall be immediately repaired.
12. Secondary containment systems shall be maintained free of dirt, debris or liquids. If any chemical is released into the secondary containment system, it shall be removed immediately.
13. Material used in or around the secondary containment area which has been contaminated with a hazardous material or hazardous waste shall not be disposed until a hazardous waste determination has been performed in accordance with these specifications. Contaminated materials include, but are not limited to, plastic sheeting, absorbents, dirt, sand, and kitty litter. Contaminated materials found in or around containment areas shall be immediately cleaned-up.
14. The Contractor shall perform weekly inspections of their hazardous material and hazardous waste storage areas to comply with the regulations (22 CCR 66265.174). If the project exceed seven calendar days, an inventory of hazardous waste containers will be kept noting each waste container and its accumulation start date. Inspections shall be documented and copies provided to the City upon request.

If the Contractor encounters, causes the release of, or has knowledge of a release or an imminent release of hazardous substances, Work in the area shall immediately cease except in an emergency. Any substance which is toxic, corrosive, an irritant, a strong sensitizer, flammable, combustible, or radioactive or may cause substantial personal injury or substantial illness as a proximate result of any customary or reasonable foreseeable handling or use is considered a hazardous substance. The Contractor shall immediately notify the Engineer and County of San Diego, Department of Environmental Health (DEH) at (619) 338-2222 (during business hours) or by calling 911 (outside business hours). If there is an immediate fire, explosion, health or safety threat, the Contractor shall notify the Fire Department via 911.

A waste determination shall be performed on all potential hazardous waste or regulated waste generated at a Site within 10 days of generation, but not later than the end of the project, to determine if it meets hazardous waste criteria in accordance with 22 CCR Division 4.5 or any other pertinent law or regulation which could restrict the disposal of the waste to a municipal landfill, sewer discharge, or storm drain discharge. The results of all waste determinations shall be submitted to the City for concurrence prior to any disposal or discharge of the waste in question.

Incomplete or inconclusive waste determinations conducted by the Contractor, as determined by the City, will be returned to the Contractor for additional information or testing. The City's approval of the final determination of the waste and the disposal or discharge location shall be required.

K. HAZARDOUS WASTE ACCUMULATION TIME

Each container of hazardous waste shall be shipped off-site for disposal by a registered hazardous waste transporter within 90 days of the date of initial generation or by the end of the Project, whichever comes first.

L. TRANSPORTATION REQUIRMENTS

The City will provide the Contractor with the EPA Generator Identification number for project site. This number is site specific and shall only be used on hazardous waste disposal documentation for the appropriate site where the waste was generated. A hazardous waste manifest or, when appropriate, a bill of lading, non-hazardous waste manifest or other appropriate disposal documentation shall be completed in accordance with 22 CCR Chapter 12, Article 2 and 49 CFR for any shipment of hazardous waste leaving the Site.

The Resident Engineer will sign the hazardous waste manifest or disposal documentation as representing the hazardous waste generator at the time the hazardous waste is being removed from the Site. Pre-signed hazardous waste manifests or bills of lading are not acceptable.

The Contractor shall only ship hazardous waste using a City pre-approved licensed hazardous waste transporter with a valid insurance certificate showing a minimum of \$1,000,000 Environmental Pollution Liability insurance unless specified otherwise in 5-4, "Liability Insurance." The hazardous waste shall be sent only to a City pre-approved treatment, storage, and disposal facility (TSDF) in accordance with 22 CCR Chapter 13.

Any contractor who allows the transportation or disposal of hazardous waste from a City site by an unlicensed hazardous waste transporter, upon conviction, shall be subject to 1 year in prison and fined up to \$100,000 per day (HSC 25163, 25189.5).

M. MANAGEMENT OF SPECIFIED WASTES

Hazardous material that is removed from empty hazardous materials containers shall be used as hazardous material or disposed of as a hazardous waste. The Contractor shall mark each container with the date it was emptied and manage the container at the end of the project by using any of the following methods:

1. Reclaim the scrap value of the container;
2. Send the container off-site for reconditioning or remanufacturing;
3. Send the container back to the manufacturer; and
4. Dispose of as hazardous waste.

For containers five (5) gallons capacity or less, once the container is empty, it may be disposed of to the regular trash.

Aerosol spray containers may be disposed of in the regular trash if the contents and propellant have been emptied to the maximum extent practical under normal use (i.e., the spray mechanism was not defective and thus allowed complete discharge of the contents and propellant). Aerosol spray containers shall not be punctured, crushed or altered in order to remove or release any remaining contents or propellant for the purpose of emptying the container for disposal to the trash.

A compressed gas cylinder is empty when the pressure in the container approaches atmospheric pressure.

N. REGULATORY REPORTING FOR CHEMICAL RELEASE OR THREATENED RELEASE

Chemical releases or threatened releases involving a gas, liquid or solid hazardous materials or hazardous waste shall be immediately assessed utilizing the County Department of Environmental Health's Assessment Form as a guide to determine if the incident requires regulatory reporting to the California Emergency Management Agency, County Department of Environmental Health, Hazardous Materials Division, the National Response Center and any other pertinent regulatory agency. See the Contract appendices for a copy of County Department of Environmental Health's Assessment form.

Lack of timely reporting a chemical release or threatened release shall be subject to fines and penalties by the County of San Diego and any other pertinent regulatory agency.

Chemical releases or threatened releases involving a gas, liquid, or solid hazardous materials or hazardous waste shall be immediately reported to the City.

Chemical releases caused by the Contractor and any contaminated media (rags, absorbents, soil, etc.) shall be immediately contained, cleaned up, and handled as hazardous waste at the Contractor's expense. The waste shall be handled as hazardous waste unless a complete hazardous waste determination, as approved by the City, is performed indicating the waste to be non-hazardous.

A Chemical Release Report Form or similar document shall be completed and faxed to the City at the designated number within 4 hours of the occurrence of the chemical release for all incidents of hazardous materials or hazardous wastes in quantities equal to or exceeding 5 gallons in quantity or for any size release that required regulatory reporting as determined by the County Department of Environmental Health's Assessment form. The Contract appendices contain a blank Chemical Release Report Form.

O. SUPPORT ACTIVITIES

The Resident Engineer will not be responsible for construction means, methods, techniques, sequences, procedures or for safety precautions and programs about the Work. The presence of any City's Representative shall NOT excuse the Contractor in any way for defects or EPA or CAL OSHA safety or asbestos or lead exposure violations discovered during the abatement operations. It is understood that the City will not be responsible for job or site safety on this project. Job and site safety will be the sole responsibility of the Contractor.

The Resident Engineer will be empowered to represent the City and will carry out the following:

1. Enforce the contract requirements and state, local, and federal regulations.
2. Agree with the Contractor on pre-abatement conditions of the work area and determine scope of work.
3. Inspect the project site.
4. Review work progress.
5. Observe activities during abatement. Perform bulk, dust or air sampling as required. Contractor shall provide power extension cords for sampling if required.
6. Perform final inspection and clearance sampling as appropriate.
7. Request, review and maintain Contractor submittals.

The Resident Engineer shall have the authority to stop any project activities if they are not being performed in accordance with regulations or the requirements of each specification.

The Resident Engineer shall have the authority to modify project specifications to conform to problems as they arise during the course of the project.

Final clearance inspection and sampling must be performed by a City designated representative. It will not be performed by the Contractor (although the Contractor may and should perform their own clearance testing). In most cases clearance consists of two (2) steps; visual examination and environmental sampling.

- i. Visual Examination for Determination of Completed Work: This is a determination that the work specified in the scope of work has been completed satisfactorily. For surfaces that are to be re-painted, it is important this examination occurs prior to the re-painting (to determine that either all the paint has been removed (abatement) or that the deteriorated paint has been stabilized (interim controls). Next the surfaces should be examined for settled dust and debris. If dust or debris is visually noted, the Contractor will be required to re-clean prior to samples being collected.

If no such dust/debris is found, the City Designated Representative will complete a Certificate of Visual Inspection for the area or for multiple areas. The Certified Supervisor will also sign this Certificate.

Substances requiring analytical testing shall be sampled and tested in accordance with the sampling and analytical testing requirements in these specifications.

- i. Environmental Sampling: The number and location of samples will be determined on a case-by-case basis. The numerical criteria will also be determined on a case-by-case basis (determined at beginning of project by the Resident Engineer). Most clearance sampling in occupied space will require at least twenty-four (24) hours from sampling before results are provided.

If clearance samples fail clearance thresholds then the contractor is responsible for costs associated with re-cleaning the work area and additional clearance sample laboratory costs.

Area air monitoring may be required on a case-by-case basis and will be performed by City designated representative.

P. MATERIAL SAFETY DATA SHEETS

Prior to work commencing, the Contractor must submit one (1) copy of the material safety data sheet (MSDS) for each product bid. Only those products whose label and MSDS clearly state the contents, hazard potential, and protective measures required shall be considered for purchase.

The Contractor must also send with each shipment one (1) copy of the MSDS for each item shipped. Failure to comply with this procedure will be cause for immediate termination of the contract for violation of safety procedures.

Q. QUALITY ASSURANCE MEETINGS

Contractor will be required to schedule meetings per **section 3-6.1 Project Meetings** of THE WHITEBOOK. These meeting should be scheduled no later than three (3) days from date of commencement of work. At these meetings, the Resident Engineer will provide Contractor with feedback and will note any deficiencies in contract performance and provide Contractor with an opportunity to address and correct these areas. Additional quality assurance meetings may be required, depending upon Contractor's performance.

R. SUSPENSION OF WORK

See **section 3-13.31 Defective Work** of THE WHITEBOOK.

S. COOPERATION AND TRANSITION

Contractor shall cooperate with the City at the expiration of the Contract and the incumbent Contractor to accomplish a smooth phase-out and transition of responsibility and requirements, if applicable.

T. PRICING INSTRUCTIONS
