Maintenance Assessment District

Preamble

Pursuant to §65.0220 of the “San Diego Maintenance Assessment District Procedural Ordinance” (being Division 2, Article 5, Chapter 6 of the *San Diego Municipal Code*) and City of San Diego Council Resolution No. R-310618 passed on July 22, 2016, authorizing the continued levy of assessments for the life of the FIRST SAN DIEGO RIVER IMPROVEMENT PROJECT MAINTENANCE ASSESSMENT DISTRICT (hereinafter referred to as “District”), and in accordance with applicable provisions of “Proposition 218” (being Article XIID of the California Constitution), and provisions of the “Proposition 218 Omnibus Implementation Act” (being California Senate Bill 919) (the aforementioned provisions are hereinafter referred to collectively as “applicable law”), and in accordance with Resolution No. _____, adopted by the CITY COUNCIL OF THE CITY OF SAN DIEGO, COUNTY OF SAN DIEGO, STATE OF CALIFORNIA, and in connection with the annual proceedings for the District, EFS Engineering, Inc., as Assessment Engineer to the City of San Diego, submits herewith this annual report for the District as required by §65.0220 of the “San Diego Maintenance Assessment District Procedural Ordinance.”

DATE OF FINAL PASSAGE BY THE CITY OF SAN DIEGO,
COUNTY OF SAN DIEGO, STATE OF CALIFORNIA, ON THE
_____ DAY OF _____, 2021.

Elizabeth Maland, CITY CLERK
CITY OF SAN DIEGO
STATE OF CALIFORNIA

Executive Summary

Project: First San Diego River Improvement Project
Maintenance Assessment District

Apportionment Method: Equivalent Benefit Area (EBA)

	FY 2021	FY 2022 ⁽¹⁾	Maximum ⁽²⁾ Authorized
Total Parcels Assessed:	2,017	2,017	--
Total Estimated Assessment:	\$156,538	\$156,538	--
Total Number of EBAs:			
<i>Aesthetics Zone 1</i>	93.83	93.83	--
<i>Aesthetics Zone 2</i>	91.12	91.12	--
<i>Flood Control</i>	19.12	19.12	--
Assessment Per EBA:			
<i>Aesthetics</i>	\$422.94	\$422.94	\$726.92 ⁽³⁾
<i>Flood Control</i>	\$4,096.84	\$4,096.84	\$7,041.63 ⁽³⁾

⁽¹⁾ FY 2022 is the City's Fiscal Year 2022, which begins July 1, 2021 and ends June 30, 2022. Total Parcels Assessed, Total Estimated Assessment, and assessment apportionment factors may vary from prior fiscal year values due to parcel changes and/or land use re-classifications.

⁽²⁾ Maximum authorized assessment rate subject to cost-indexing as approved by property owners at the time of District formation.

⁽³⁾ Prior fiscal year's maximum authorized annual assessment rate increased by cost-indexing factor of 1.70%.

Annual Cost-Indexing: The maximum authorized assessment rates are cost-indexed and will increase (or decrease) annually based on the annual change in the *San Diego Consumer Price Index for Urban Consumers* (SDCPI-U).

Background

The First San Diego River Improvement Project Maintenance Assessment District (District), originally known as the “First San Diego River Improvement Project Landscape Maintenance District,” was established by the City of San Diego (City) on June 2, 1987 by City Council Resolution R-268499. The District was subsequently re-formed on July 21, 1998 by City Council Resolution R-290469 primarily for purposes of compliance with Proposition 218 and to permit future cost-indexing. The purpose of the District was, and still is, to fund specifically identified improvements and activities within the boundary of the District.

In conformity with §65.0221 of the “San Diego Maintenance Assessment District Procedural Ordinance,” the City adopted Resolution No. R-310618 on July 22, 2016, approving the annual budget and assessments for Fiscal Year 2017, and authorizing the levy of the assessments for the life of the District, consistent with the benefit findings and assessment apportionment method contained in the approved formational and all subsequently updated Engineer’s Reports (Engineer’s Reports). The Engineer’s Reports are on file with the City Clerk, and incorporated herein by reference.

The District is authorized and administered under the provisions of the “San Diego Maintenance Assessment District Procedural Ordinance.” This annual report has been prepared pursuant to the requirements of §65.0220 of the “San Diego Maintenance Assessment District Procedural Ordinance.”

District Boundary

The District boundary is generally depicted in **Exhibit A**. The District Boundary Map and Assessment Diagram are on file in the Maintenance Assessment Districts section of the Parks and Recreation Department of the City, and, by reference, are made a part of this annual report.

Project Description

The authorized assessments will be used to fund specifically identified improvements and activities within the District. The District improvements and activities generally consist of the following:

River Channel

- Dredging of the river bottom to be conducted every five (5) years or as necessary to maintain the flow capacity of the river.

- Revegetation and wildlife monitoring and reporting as required by State and Federal permits issued in conjunction with the First San Diego River Improvement Project (FSDRIP).
- General landscape maintenance, monitoring and revegetation as necessary.
- Maintenance and repair of the irrigation system as necessary.
- Trash and debris clean up.
- Restoration work in the event of embankment erosion affecting the channel, the river islands or the buffer zone.

Buffer Zone

- General landscape maintenance, monitoring and revegetation as necessary.
- Maintenance and repair of the irrigation system as necessary.
- Trash and debris clean up.
- Maintenance of picnic tables, benches and trash receptacles as needed.

The approximate location of the improvements is generally shown in **Figure 1**.

For additional detail as to the location, type of improvements, and activities performed by the District, please refer to the maps, improvement plans, engineering drawings, maintenance specifications, the Engineer's Reports and other associated documents on file with the Maintenance Assessment Districts section of the Parks and Recreation Department of the City. These documents, collectively, are incorporated herein by reference and made part of this annual report.

Separation of General and Special Benefits

The identified improvements and activities provide benefits to the parcels located within the District. These benefits are "special benefits" to the extent that they are above and beyond the City's standard level of service, and exclusive of those "general benefits" provided to the public at large or properties located outside the District. By law, only "special benefits" are assessable.

The assessments presented in this annual report are based on the cost of improvements and activities determined to provide "special benefits" in accordance with the Engineer's Reports. For additional detail relative to the separation and quantification of general and special benefits for the District, please refer to the Engineer's Reports, on file with the Maintenance Assessment Districts section of the Parks and Recreation Department of the City.

FIGURE 1

Cost Estimate

The estimated annual budget (Revenue & Expense Statement) is included as **Exhibit B**. The “Other Contributions (Non Assessment Source)” revenue contained in the budget includes the value of improvements and activities determined to provide “general benefits.” The District budget with full detail is available for public reference in the Maintenance Assessment Districts section of the Parks and Recreation Department of the City.

Prior to Fiscal Year 1999, funds for anticipated dredging operations were collected on an annual basis and set aside in reserve until needed. In Fiscal Year 1999, property owners within the District voted to suspend annual replenishment of the Dredging Reserve Fund, until such time as the current fund is depleted (or upon determination of insufficiency of the fund balance). At such time as the depletion of the reserve fund (or upon determination of insufficiency of the fund balance), an increase of assessments would be required to replenish or increase the Dredging Reserve Fund. Under applicable law, this action would require ballot approval of the property owners.

Annual Cost-Indexing

The maximum authorized assessment set forth in the Engineer’s Reports is permitted to increase annually based on the published change in the “San Diego Consumer Price Index for Urban Consumers” (SDCPI-U). The annual change in second half SDCPI-U values, as compiled by the *U.S. Bureau of Labor Statistics* (see www.bls.gov), for the prior year period was from 300.718 to 305.823 (a 1.70% increase). In accordance with the approved cost-indexing provisions, the maximum authorized assessment rate has been increased by 1.70%.

Method of Apportionment

Estimated Benefit of Improvements

The Open Space section of the City’s Mission Valley Community Plan and the general Market Objectives section of the First San Diego River Improvement Project Specific Plan establish several goals for the San Diego River system. The improvements and activities are to enhance Mission Valley as a regional commercial center as well as attract residential development. It is intended that the variety of mixed uses will not only attract current San Diego residents to Mission Valley, but visitors and companies from across the country. Enhancement of the river system being maintained by this District is consistent with the

plans' goals for flood safety, pleasing aesthetics, and enhancement/preservation of the natural habitat and resources provided by the San Diego River.

Mission Valley (Valley) is primarily an urbanized commercial center with varying mixed uses including high-density residential uses. The San Diego River is the most prominent open space element in the Valley and is a significant aesthetic and economic asset to the community. It provides visual and physical relief from the intensifying urbanization of the Valley. As a linear green space, the river corridor unifies the community, accentuating the natural setting of the Valley. The river also provides opportunity for recreational uses. With the limited number of parks in this area, the linear pathways, benches, picnic tables, and other improvements constructed and maintained by FSDRIP provide the community its most significant public recreational area.

Construction of FSDRIP flood control channel improvements has benefited specific parcels by controlling flooding and reducing the floodway width, which has generated additional land area outside the floodway and above the 100-year flood plain. These new land areas are now suitable for development. Existing developed lands subjected to potential flooding by a certain potential frequency of flood have experienced a reduction in the potential frequency of flooding. The lands benefiting from improvement of the flood control channel was determined by review of engineering flood maps. These maps were also used to determine the varying levels of benefit received by review of the various classifications of flood zones. Those parcels within the District that are not subject to potential flooding do not benefit from the flood control/safety aspect of the improvements maintained by the District.

The project and subsequent maintenance have also provided a walking/jogging/biking trail, picnic tables, park benches, enhanced open space, an enhanced linear view corridor, and enhancement/preservation of the river's natural habitat and resources. The trails are a significant component of the Valley's pedestrian circulation system and recreational system. These improvements and activities are not essential to the functionality of a flood control channel. These improvements and activities are amenities that provide pleasing aesthetics, community recreational uses and an enhanced community identity to a greater area than the area benefiting from just flood protection. The greater area benefiting from these District activities has been limited to the Community Plan Development Intensity District G and those portions of Districts H and I lying westerly of Qualcomm Way. Major transportation corridors divide the Valley into several districts. The major transportation corridors (Interstate 8, State

Route 163, Friars Road along with the easterly limits of FSDRIP, and Qualcomm Way) provide the boundary of this greater area of benefit.

In conclusion, there are two distinct sets of benefits and two distinct sets of parcels which have distinct special benefits conferred upon them. All parcels within the District benefit from the aesthetic enhancement, natural resource preservation, and recreational use of the San Diego River system and the enhanced community image provided by the District improvements and activities. A subset of parcels within the District boundary receives flood control benefits.

Apportionment Methodology

As previously stated, special benefit received from the maintenance of the FSDRIP improvements is comprised of two components.

Flood Control/Safety – By containing the 100-year frequency flood levels and bettering other flood zones the FSDRIP channel provides greater public safety, has reduced the economic damage associated with flooding, and has allowed additional development to occur in areas previously restricted from any economic benefit. Maintenance of the river channel and vegetation insure the integrity of the system.

Community Aesthetics – The linear, river open space provides both a physical and visual relief from the existing urban development, preservation/enhancement of natural habitat and resources, new opportunities for recreational uses, and enhancement of the community's aesthetic and image.

The total cost associated with District improvement and activities will be assessed to the various parcels in proportion to the sum of the special benefit assessment for Flood Control/Safety and the special benefit assessment for Community Aesthetics Enhancement as shown in the following equation:

$\begin{array}{r} \text{Total Assessment} \\ = \\ \text{Flood Control/Safety Assessment} \\ + \\ \text{Community Aesthetics Enhancement Assessment} \end{array}$
--

Allocation of Costs

All costs associated with dredging, monitoring of silt conditions, and maintenance of appurtenant drainage facilities shall be allocated to the Flood Control/Safety component of assessments. No funds from the current year assessments are allocated for these functions. All dredging, monitoring of silt conditions, and maintenance of appurtenant drainage facilities for the current year, if needed, will be

funded from the Dredging Reserve Fund.

Costs associated with maintenance of the landscaping/vegetation are associated with both the Flood Control/Safety component and the Community Aesthetics Enhancement component. Maintenance of the vegetation is essential to the proper function of the flood channel and fulfillment of the project’s permit/mitigation requirements. The same landscaping/vegetation is the key element to the enhancement of the community aesthetics and natural habitat/resource preservation. Areas specific to one functional component cannot be separated from areas specific to the other functional component through engineering analysis. Both components benefit mutually from the maintenance of all landscaping/vegetation maintained by the District. Therefore, costs associated with maintenance of the landscaping/vegetation have been allocated fifty percent (50%) to the Flood Control/Safety component and fifty percent (50%) to the Community Aesthetics component. **Figure 2** illustrates the allocation of District costs.

Land Use

All parcels within the District have been assigned a land use/zoning classifications. **Table 1** summarizes the various land use/zoning classifications and illustrates those that receive special benefit from the improvements and activities and those land uses that have been determined to not receive benefit from the improvements and activities.

TABLE 1: Land Use Classifications and Codes

Land Use/Zoning	Code	Special Benefit Received
Residential – Condominium	CND	As described below
Residential – Multi-Family & Apartment	MFR	As described below
Commercial – Office & Retail	COM	As described below
Industrial & Institutional	IND	As described below
Open Space	OSP	None
Street/Roadway	STR	None
Undevelopable	UND	None

Residential – Condominium

Condominium parcels have been segregated by condominium development. The aggregate area of each development has been divided by the total number of condominiums within the development. Each condominium has been assigned an average parcel area, which is common for each condominium for each development.

Street/Roadway

While those traveling streets and roadways enjoy the District improvements and activities during their travel, the actual benefit of this enjoyment does not accrue to the land underlying the streets and roads. Accordingly, the Street/Roadway category receives no benefit and has been assigned a Land Use Factor of zero.

The Metropolitan Transit Development Board's (MTDB) Light Rail Vehicle right-of-way is considered a public right-of-way similar to public streets and has been determined to not receive benefit. These areas held in easement by MTDB have been removed from a parcel's total area for assessment calculations.

Undevelopable

Areas classified undevelopable are areas of a parcel with the floodway area and have been removed from a parcels total area for an assessment calculation.

Flood Control/Safety Apportionment Method

The Flood Control/Safety assessment is a function of the portion(s) of a parcel's area (or condominium unit area discussed later) enhanced by a change(s) of flood zone classification (termed Special Benefit Area) multiplied by an assigned Benefit Factor. As some parcels include portions that differ in change of flood zone classification and/or have a combination of areas with flood zone changes, for each affected parcel a Composite Benefit Factor is calculated as the area-weighted average of the Benefit Factor for all flood zone classification areas of change. The Special Benefit Area is multiplied by the Composite Benefit Factor to determine the Flood Control/Safety Equivalent Benefit Area (EBAs) of a parcel. A parcel's total EBAs is multiplied by a Unit Cost, which is each EBAs proportional share of costs allocated to Flood Control/Safety in relation to all EBAs within the District. The result is the parcel's Flood Control/Safety assessment. Calculation of the Flood Control/Safety assessment is depicted in the following equations:

$$\begin{array}{c} \text{Flood Control/Safety Assessment} \\ = \\ \text{Flood Control/Safety Equivalent Benefit Area (EBA) x Unit Cost} \end{array}$$

$$\begin{array}{c} \text{Unit Cost} \\ = \\ \frac{\text{Total Flood Control/Safety Cost Allocation}}{\text{Total Flood Control/Safety Equivalent Benefit Area}} \end{array}$$

$$\begin{array}{c} \text{Flood Control/Safety Equivalent Benefit Area (EBA)} \\ = \\ \text{Special Benefit Area x Composite Benefit Factor} \end{array}$$

$$\begin{array}{c} \text{Composite Benefit Factor} \\ = \\ \frac{\text{Benefit Factor}_1 \times (\text{Benefit Area}_1 + \text{Benefit Area}_2) + \text{Benefit Factor}_2 \times (\text{Benefit Area}_2 + \text{Benefit Area}_1) + \dots}{4} \end{array}$$

Flood Control/Safety Special Benefit Area

The special benefit realized by a parcel, in the Flood Control/Safety component, is the enhancement of a given area's flood zone classification. An enhancement of flood zone classification can increase the safety and economic use of an area. Identification of such areas has been determined through the use of the Flood Insurance Rate Maps (FIRM) prepared by the Federal Emergency Management Agency.

The 1983 FIRM map shows the various flood zone boundaries in a

pre-FSDRIP condition. The 1997 FIRM map reflects the changes to the flood zone boundaries between Qualcomm Way and State Route 163 as a result of the construction of FSDRIP improvements. Combining (intersecting) the two maps illustrates the areas which experienced a change/enhancement in flood zone classification and received the resulting Flood Control/Safety special benefit. These areas are shown in **Figure 3**.

Composite Benefit Factor

The Composite Benefit Factor is the weighted average of a parcel's Benefit Factors times the Special Benefit Area. **Table 2** details the effect of a flood zone classification, the benefits changes/enhancement in flood zone classification, and the Benefit Factors assigned to each change in flood zone classification. The Benefit Factors assigned estimate the proportional economic and safety benefit from a change in flood zone classification, relative to other such changes.

The four basic flood zone classifications within the District are the Floodway Zone, 100-year Flood Zone, 500-year Flood Zone, and Outside the 500-year Flood Zone. As a result of improvements to the San Diego River through FSDRIP, zone classifications of various parcels within the District have changed. Zone classification changes have been given a rating that is based upon the magnitude of benefit realized.

The maximum achievable degree of benefit, from the Floodway Zone to Outside the 500-year Flood Zone, is assigned a relative benefit value of 100. Property that was within the Floodway and is now classified to be within the 100-year Flood Zone is given a relative benefit value of 75. A zone classification change from the 100-year to the 500-year is given a relative benefit value of 20 and from the 500-year Zone to Outside 500-year is given a relative benefit value of 5. A portion of property that has changed from the Floodway to the 500-year Zone is given a relative benefit value of 75 plus 20, or 95.

There are five possible combinations of Flood Zone classification changes (as shown in **Table 2**) with the sum of total relative benefit values of 315. Each Flood Control/Safety Benefit Factor is calculated as the ratio of relative benefit divided by 315. With respect to the preceding example above, 95 divided by 315 equals a Benefit Factor of 0.30. **Table 2** details the effect of the varying flood zone classifications on an area and the magnitude of benefit for moving from one zone to another.

TABLE 2: Flood Control/Safety Benefit Factors

Within Floodway	Within 100-Year Flood Zone	Within 500-Year Flood Zone	Outside 500-Year Flood Zone
- No Economic Benefit from Land - Restricted from Development	- Can Develop with Certain Restrictions – Building Above 100-Year Level - Remainder of Parcel Subject to Flooding - Flood Insurance Required to Finance	- No Flood Related Building Restrictions - Lesser Potential for Flooding - Flood Insurance not Required to Finance	- Negligible Risk of Flooding - No Flood Related Restrictions

Benefit Factor	Relative Benefit Value Scale			Total
	75	20	5	
0.32	75	20	5	100
0.30	75	20		95
0.24	75			75
0.08		20	5	25
0.06		20		20
1.00	TOTAL		TOTAL	315

The following is a sample parcel calculation, which illustrates the operation of these factors and formulas.

Sample Flood Control/Safety Assessment Calculation

The District includes a 3.25-acre parcel called XYZ that has partially benefited from the Flood Control/Safety improvements made to the San Diego River. A portion of XYZ (0.76 acres) was within the floodway, and as a result of FSDRIP, has moved to the 500-year flood zone. Another portion of XYZ (0.21 acres) has realized the benefit of moving from the floodway to the 100-year flood zone. The remainder of parcel XYZ (2.28 acres) realizes no change in benefit from the improvements, and is not included in the Flood Control/Safety benefit area calculation. The following sample calculation demonstrates the methodology used to determine the total Flood Control/Safety assessment for parcel XYZ:

Total Parcel Area: 3.25 ac.

Benefit Area (floodway to the 500-yr. flood plain): 0.76 ac.

*Corresponding Benefit Factor (from **Table 2**):* 0.30

Benefit Area (floodway to the 100-yr. flood plain): 0.21 ac.

*Corresponding Benefit Factor (from **Table 2**):* 0.24

Total Flood Control/Safety EBAs for District: 19.12175 ac.

Total Flood Control/Safety Cost Allocation: \$78,338

Composite Benefit Factor:

$$= ((0.30 \times 0.76) \div (0.76 + 0.21)) + ((0.24 \times 0.21) \div (0.76 + 0.21)) = 0.2870$$

Flood Control/Safety Equivalent Benefit Area:

$$= 0.2870 \times (0.76 + 0.21) = 0.2784$$

Flood Control/Safety Unit Cost:

$$= \$78,338 \div 19.12175 = \$4,096.84$$

Flood Control/Safety Assessment:

$$= 0.2784 \times \$4,096.84 = \$1,140.56$$

Community Aesthetics Apportionment Method

The Community Aesthetics Enhancement assessment is a function of the parcel area (or condominium unit area discussed later) multiplied by a Zone Factor establishing the Equivalent Benefit Area (EBA) of a parcel. A parcel's total EBA is multiplied by a Unit Cost, which is each EBAs proportional share of allocated costs to all EBAs within the District. The result is the parcel's Community Aesthetics Enhancement assessment. The Community Aesthetics Enhancement assessment is depicted in the following equations:

$$\begin{array}{c} \text{Community Aesthetics Enhancement Assessment} \\ = \\ \text{Equivalent Benefit Area (EBA) x Unit Cost} \end{array}$$

$$\begin{array}{c} \text{Equivalent Benefit Area (EBA)} \\ = \\ \text{Parcel Area x Zone Factor} \end{array}$$

$$\begin{array}{c} \text{Unit Cost} \\ = \\ \frac{\text{Total Community Aesthetics Enhancement Cost Allocation}}{\text{Total Community Aesthetics Equivalent Benefit Area}} \end{array}$$

Zone Factor

The Zone Factor as developed for use in the Community Aesthetics Enhancement component of the assessment is dependent upon the proximity of the property with respect to the FSDRIP green belt and pedestrian walkways. Those parcels separated from FSDRIP by major and collector streets are determined to receive lesser benefit than those parcel interior to the nearest major or collector streets. **Exhibit A** shows the location of the zone boundaries in relationship to the District boundary and all parcels within the District. Zone 1 is estimated to receive twice the benefit of Zone 2.

Zone 1 is defined as those parcels that are between FSDRIP and Camino de la Reina on the south and Hazard Center Drive, Mission Center Court, Station Village Inn and Rio San Diego Drive on the north.

Zone 2 is defined as those parcels between Friars Road in the north and the Zone 1 boundary and Interstate 8 in the south and the Zone 1 boundary.

Summary Results

The District Boundary is presented in **Exhibit A**.

An estimate of the annual costs of the improvements and activities provided by the District is included as **Exhibit B**.

The assessment methodology utilized is as described in the text of this annual report. Based on this methodology, the assessments for each parcel were calculated and are shown in the Preliminary Assessment Roll (**Exhibit C**).

Each lot or parcel of land within the District has been identified by unique County Assessor's Parcel Number in the Preliminary Assessment Roll and on the Boundary Map and Assessment Diagram referenced herein.
