Subject: Funding and Support for CAP

Dear Mayor Faulconer,

Families in 71 cities and nine counties around California currently enjoy cost-competitive electric bills, cleaner energy, local jobs and the freedom of energy choice with Community Choice Energy. This tried and true program has given cities the ability to reinvest millions of dollars back into their neighborhoods.

The families and small businesses of San Diego deserve that choice, and we thank you for taking the next step to take control of our energy destiny.

Never before have we had the opportunity for choice, competition, local renewable energy development using local labor and community control, and Community Choice Energy is the only proven way to get to our Climate Action Plan goal of 100% renewable power by 2035.

We look forward to the development of a business plan and funding for CCE without delay, and applaud your continued leadership in the support for San Diegans to have the freedom to choose our own electricity provider.

Sincerely,

Mala Kruss Wingerd
