

## PURE WATER NOTICE: Miramar Reservoir Water Elevation Test

Feb. 3, 2023

On Monday, Feb. 13, the City of San Diego will begin a water elevation test at Miramar Reservoir. The elevation of the reservoir will be increased by two feet for approximately four weeks.

**What To Expect:** This testing will not impact aquatic biology or recreational activities such as boating and fishing. Lower elevation portions of the unofficial dirt trail around the reservoir will be temporarily inaccessible. Please follow posted signage and for safety, please avoid closed trail sections. The boat ramp, docks, fishing floats and five-mile paved access road around the reservoir will remain accessible.

**When:** The elevation of the water in Miramar Reservoir will be increased by two feet starting on Feb. 13, and elevation testing at the reservoir will be underway for up to approximately four weeks. After the elevation testing, the reservoir water level will be returned to its normal level.

**Why:** Pure Water San Diego is the City of San Diego's phased, multi-year program that will provide nearly half of San Diego's water supply locally by 2035. The Pure Water Program will use proven water purification technology to clean recycled water to produce safe, high-quality drinking water. The Program offers a cost-effective investment for San Diego's water needs and will provide a reliable, sustainable water supply.

The City is committed to providing up-to-date information about construction activities. Notices will be regularly posted on [scrippsrancho.purewatersd.org](https://scrippsrancho.purewatersd.org). Please contact [purewatersd@sandiego.gov](mailto:purewatersd@sandiego.gov) or **833-MIR-PWSD (833-647-7973)** with questions about the City's Pure Water Program, and a team member will get back to you within one business day.
