Looking Ahead: Traffic Control Setup and Pipeline Installation to Begin in Clairemont in Late May

Current schedules project that traffic control setup and pipeline installation will begin at the intersection of Clairemont Drive and Denver Street in late May. This will be the first portion of work to install the new conveyance pipelines as part of the project.

The first stage of this work involves setting up traffic control to give crews a safe space to work. The traffic control plans are still under review, and once they are finalized and approved another email will be sent outlining the specifics of what will be set up.

That said, the traffic control will allow one travel lane to be maintained in each direction, and businesses and residences will have access to their driveways if they're located in the work zone. Bus stops located within the work zone will be temporarily relocated as-needed. For your safety and the safety of the crews, please follow all posted signage when you're in the work zone.

Once the traffic control is in place, crews will begin to trench into the roadway and install the new pipeline underneath the road. Within the work zone, please expect noise, dust, and construction equipment to be staged. As crews make progress on installing new pipeline, the traffic control elements will be moved along with the work headed eastward on Clairemont Drive.

Day work hours will be from 7:30 a.m. to 4:30 p.m.
If needed, night work hours will be from 9 p.m. to 5 a.m.

Construction notices are posted on morena.purewatersd.org. Please contact purewatersd@sandiego.gov or **833-MOR-PWSD (833-667-7973)** with questions about the City's Pure Water Program and/or the Morena Conveyance South & Middle and Conveyance Bike Lanes project, and a team member will get back to you within one business day.

Visit the project website for more information

Safety of the construction crews and community is our top priority. Please slow down near work sites and follow pedestrian instructions.

About Pure Water San Diego

Pure Water San Diego is the City of San Diego's phased, multi-year program that will provide nearly half of San Diego's water supply locally by 2035. Pure Water San Diego will use proven water purification technology to clean recycled water to produce safe, high-quality drinking water. The Program offers a cost-effective investment for San Diego's water needs and will provide a reliable, sustainable water supply.

Phase 1 includes several projects that will clean recycled water to produce 30 million gallons per day (mgd) of high-quality purified water, reducing the City of San Diego's dependence on imported water.
