

UNIVERSITY
Community Plan Update

congestion	Homeless Persons	NO more development	TRAFFIC!	Overcoming NIMBYs	EVER Increasing Traffic From new high rises and office buildings	Traffic due to increased density of population. ✓	
high cost of housing	Noise	mini dorms and short-term rentals	AIR TRAFFIC FROM MIRAMAR OVER SOUTH UC AND NORTH UC	ODORS From Miramar Dump	Increased burglaries & crime	Preventive fire protection in our canyons	Last Mile for Public transit
Keeping our community clean ★	vehicular traffic & the need for pedestrian/ cyclist safe options	homelessness (particularly in the canyon area)	high cost of housing and rent	traffic congestion - roads not planned for current conditions	Preserve multiple species protections. We need green and wild elements to the whole human beings.	Affordable housing build up where appropriate	Mixed-use housing / no tail / Bus, car
Parking challenges / infringement in areas near trolley stations that don't have added parking. In particular places like the JCC and Good Samaritan Church will be impacted by commuter parking needs. Please address solutions to this.	I'm very concerned about the Miramar JCC flyover over homes in U.C.!!	Preserving neighborhoods	Merging of Developer Impact Funds for both North & South UC use. Needed especially to expand Univ. Comm. Library on Governor Drive.	Stvrs Mini dorms Enforcing bldg code Encroachment of commercial into residential zone	Auto congestion due to poor land use decisions	PRESERVING OPEN LAND FOR NATURE ★	Homeless coming in on trolley! also living in canyons causing fires from cooking
Bike lanes are intermittent, forcing cyclist to ride on roads or sidewalks	Reduce car use by increasing live/work in UC. Parking on periphery in UC w/ shuttles Uber to work.	No separated bike lane makes Gessesse is makes biking dangerous for my kids.	Speed on Governor Dr unsafe for children unsafe for all Slow it down & Beautify!	Traffic on Gessesse especially southbound through Governor in the evening.	Matching up parking with # occupants in neighborhoods.	A lot of people reporting car break ins. Keep how do we keep our area safe. It has always been a safe neighborhood lets keep it that way!!! ☺	We are losing native vegetation, wildlife. Need more native plants. They are hard to protect from fire - another drawback.
Transportation! Run shuttles up & down Governor to get people from West to East. No bus service on the East end!!	People are afraid of change.	Providing adequate access to/from SUC - especially in case of emergency evacuation - (fire, accidents posing danger encroachment of Gessesse).	Traffic - Add parking so folks can use trolley from all parts of town	Water use Encroachments on MSCP Maintain natural habitat	No bike paths on La Jolla Village Dr Dangerous Nobel bike paths incomplete w/ cars parking on them	Too many hotels at bus stops	
WAY TOO MANY DOGS! Too much barking - out of control
