I. MISSION STATEMENT

The San Diego Police Department Property and Evidence Unit will efficiently, accurately and professionally maintain security and control in the Property and Evidence Room while being held accountable for the receipt, storage, safekeeping, release, and disposal of all property/evidence items impounded with the Department.

GOALS

- Maintain security and control within the property and evidence rooms.
- Accurately and efficiently track all impounded property and evidence.
- Maintain current policies and procedures regarding property and evidence.
- Provide accurate training to officers and detectives regarding impounding and dispositioning property and evidence
- Provide outstanding customer service to both internal and external customers

OBJECTIVES

Ensure that all employees are competently trained in unit procedures and department policies as they relate to impounding and processing property and evidence. Maintain standards that require both the documentation and property processing be done accurately, efficiently and properly. Supply the employees with the knowledge and empowerment to provide each customer superior service.

Provide the employee with the training offered by the International Association for Property and Evidence so that when eligible, each employee can become a certified specialist.

STAFFING & RESPONSIBILITIES

The Property Unit staffing:

Senior Police Property and Evidence Supervisor – 1 Police Property and Evidence Supervisors – 2 Police Property and Evidence Specialists, full-time – 13 Police Property and Evidence Specialists, limited-hourly – 4 Police Investigative Service Officers – 2

The following are the primary duties for each of the positions:

Senior Police Property and Evidence Supervisor:

- A. Responsible to the Commanding Officer, Operational Support Division, for the operation and functions of the property section and the Gun Desk.
- B. First line supervisor to the PISO's and Property Supervisors. Responsible for assisting with the selection process, training and evaluation of subordinates.
- C. Determines appropriate handling and disposition of impounded property, according to law and department policy.
- D. Responsible for conducting auctions and/or internet sales of property/evidence, with value, authorized for disposal.
- E. Submits necessary reports as required; i.e., quarterly management reports, weekly management reports, audits, inventories, inspections, reports, statistics, budget requests, responses to correspondence and media requests.
- F. Responds to CPRA's after obtaining the requested information, reviewing it for exemptions and having it approved by the required individuals.
- G. Coordinates and may provide classroom training to new officers, new detectives and field training officers.
- H. Prepares documents for purchases required by the unit.
- I. Supervises the destruction of firearms and contraband.
- J. Maintains Disposal Contact List for each command and investigative unit.

- K. Assists with updating detective assignments in EvidenceOnQ. Upon receiving retirement or termination notification, updates that officer/detective's impound assignments in EvidenceOnQ.
- L. Communicates with the commands regarding the timely review of the disposal notice emails.
- M. Communicates and coordinates with the software provider of the impound management system (FileOnQ).
- N. Coordinates and develops queries in EvidenceOnQ necessary to obtain statistics.
- O. Reviews the unit's Operations Manual and Department Policies and Procedures relating to the Property and Evidence Unit for revisions.
- P. Reviews and approves leave slips and approves subordinate payroll entries in SAP.
- Q. Reviews, completes and approves subordinate entries of Department inspections.
- S. Responsible for coordinating the Property Unit audits, inventories and inspections.
- T. Reviews, approves and facilitates conversion requests.

Police Property and Evidence Supervisors:

- A. Responsible to the Sr. Property Supervisor for assisting in the operations and functions of the Property and Evidence Unit.
- B. First line supervisors to the Property and Evidence Specialists. The Supervisors are responsible for assisting in selection, training and evaluating of subordinates.
- C. Determines appropriate handling and disposition of impounded property and evidence, according to law and department policy.
- D. Submits necessary reports as required, staff inspections, statistics, reports and responses to correspondence.
- E. Assists in training of all Police Property and Evidence Specialists.
- F. Provides classroom training to new Police Officer recruits and Field Training Officers. Assists with the training of new Detectives.

- G. Oversees certain Property Unit functions; i.e., mail desk, maintaining of logs and files, requests for disposition of evidence.
- H. Assists with the preparation for auctions and/or internet sales of property/evidence, with value, authorized for disposal.
- I. Assists in gathering statistics necessary to respond to CPRA's.
- J. Assisting in the preparation of documents required for purchasing items for the unit.
- K. Assisting with the supervision of the destruction of firearms and contraband.
- L. Responsible for the overview of the EvidenceOnQ Request Monitor review and updating.
- M. Assists with the updating of retention codes, reassignment of detectives, and specific types of impounds in EvidenceOnQ.
- N. Coordinates the relocation of evidence controlled temperature storage locations, long term storage locations or other facilities.
- O. Assists in the weekly Hazardous Material inspections.
- P. Assists in the facilitation of conversion requests.

Police Property & Evidence Specialists:

- A. Receives various types of property and evidence that have been found, recovered, turned in, or removed from prisoners by Police Officers.
- B. Checks property and evidence received from police officers or other personnel and verifies that all items that are entered in the "EvidenceOnQ" impound record match what has been received, and that both have been completed according to San Diego Police Department procedures.
- C. Determines appropriate methods of storage for various types of evidence and property (e.g., computers, guns, bloodstained clothing, money, drugs, etc.) based upon San Diego Police Department Policies and Procedures.
- D. Stores impounded property and evidence in the appropriate storage areas of the property room (e.g., gun room, safe, refrigerator, freezer, etc.) and scans the bin barcode, where stored, with the MobileOnQ handheld device.

- E. Scans incoming property and evidence to indicate that the item has been received, verified and then binned to a specific location to ensure that the property can be located when required.
- F. Maintains the "EvidenceOnQ" database, daily custom queries, property tag file bins and inventory records regarding property and evidence in SDPD custody, the storage location, and any disposition.
- G. Checks out property to police officers and laboratory staff by completing the necessary entries in EvidenceOnQ or on the paper property tag and evidence checkout log and obtains the receiving parties signature.
- H. Receives evidence returned by officers or other personnel. Verifies that all items checked out have been returned. Completes necessary entries in EvidenceOnQ or on the paper property tag and evidence check out log and obtains the returning parties signature.
- I. Maintains a chain-of-custody record with either the property tag or EvidenceOnQ system.
- J. Drives van, pickup or stake bed truck to transport property and/or evidence from area stations to the headquarters Property Room as needed, or to another facility if being transferred.
- K. Moves property, evidence, and supplies (up to 50 lbs.) by lifting and carrying it, from one place to another for storage, release or disposal. Climbs ladders to store materials.
- L. Packages and mails evidence and found property to various investigative agencies or property owners, as requested, according to established departmental and other mailing service standards.
- M. Types memos, transport lists, and other documentation and forms.
- N. Uses law enforcement and other computer programs to access and conduct research and/or make inventory entries.
- O. Operates a forklift or pallet jack to move and unload property to be stored, destroyed or released.
- P. Maintains logs and records as requested.
- Q. Specialists working at an area station provide property related services to that command.

- R. Releases property to the rightful owner, upon receipt of a Property Release Form (PD-184) and a request/authorization entry in EvidenceOnQ for the release, from the investigating officer.
- S. Verifies the serial numbers and/or property description for an item against the entries in EvidenceOnQ record prior to release or disposition of that item.
- T. Complies with the applicable Penal Code requirements when property is impounded without serial numbers or where the serial numbers have been removed (e.g., guns, stereos, bicycles).
- U. Records the final disposition of each item on the property tag or in EvidenceOnQ. With property tag impounds, the final disposition is documented on the original tag, and then, using the six digit property tag number, files it in reverse numerical order in the dead file.
- V. Records the identified information on the appropriate form when property, authorized for disposal, is being converted to Police Department official use.
- W. Assists at public auctions for the sale of found/recovered unclaimed property (e.g., transports items by van or truck to the auction site, etc.) or assists in the preparation of property for pick up by an on-line auction company.
- X. Oversees and witnesses actual weapon destruction in order to document that the action took place as instructed by the supervisor.
- Y. Provides information on policies regarding impounded property to various law enforcement officers and/or the general public.
- Z. Appears in court, when subpoenaed, to testify regarding the chain of custody on specific evidence.
- AA. Documents impound discrepancies and notifies the impounding officer what is necessary to correct the impound.

Gun Desk Police Investigative Service Officers:

A. Responsible to the Senior Property Supervisor for the daily operation of the Gun Desk.

- B. Maintains computerized inventory and status of all firearms impounded with the San Diego Police Department. Prepares monthly statistics as needed.
- C. Does appropriate computer checks on all impounded firearms and on all subjects that are involved with firearm impounds.
- D. Communicates via phone, in writing and in person with other law enforcement agencies, department personnel and the public regarding the status of wanted or recovered firearms.
- E. Authorizes release and disposal of all firearms impounded by the San Diego Police Department, according to law and department policy and procedure.
- F. Assists citizens in voluntary handgun registration, using Department of Justice forms.
- G. Assists department personnel with paperwork and procedures regarding 5150/DV petitions.
- H. Assists citizens with the state law enforcement gun release process.
- I. Provides training to department personnel on firearms laws.
- J. Assists with the Gun Buy–Back programs, as requested.
- K. Assists with pulling and processing of firearms identified for destruction.
- L. Attends and participates in the firearm destruction trips.

III. RULES AND REGULATIONS

WORK SCHEDULE

All Property employees all start and end their shift at San Diego Police Department headquarters and may either be assigned to work their entire shift at headquarters or portions of their shift at an area station or several area stations. All employees have specific schedules that must be adhered to or a supervisor must be notified if there is a deviation. If an employee is unable to work their scheduled assignment due to illness or personal emergency a Police Property and Evidence Supervisor must be notified. In the event that a supervisor cannot be reached, the absence must be called in to the Watch Commanders office.

The permanent, full-time Property and Evidence Specialists may work the 5/8 schedule or the 36-44 schedule, with every other Friday off.

VACATION SCHEDULE

Annual leave is based upon seniority by class within the department (Article 18 of MOU). Denials will be documented in order, on the supervisor's vacation schedule.

EXPECTATIONS

MORNING MEETING: All staff are expected to attend the morning meeting. All specialists, regardless of their location assignment, are to assist with clearing the impound room and lockers of newly received items prior to the morning meeting. Prior to the meeting, tasks within the office area are to be performed. The supervisors start their shift at 0630. They will receive and document any sick calls, determine necessary schedule changes and deal with other urgent matters prior to starting the meeting. Staff are to be productive but generally remain in the main office area prior to the start of the meeting. The meeting is not scheduled to start at a specific time but generally will commence between 0630 and 0645.

BREAKS AND LUNCHES: There should be a minimum of three specialists in the office at all times. Lunches and breaks are not to be taken at workstations, with the exception of area station assignments. Eating at the area station desk is strongly discouraged. If specialists are at their desk/workstation, they are expected to be working. If evidence is being processed at a desk or work station, eating in that area is a bad practice and could cause contamination of evidence. When drinking a beverage in the work area, it must have a secure lid. Since several staff members end their shift at 3:00 p.m., all staff should conclude their lunch or break by 3:00 p.m. so that they are available to assist customers, either at the counters or on the telephone. Combining lunch and breaks is not permitted. Taking a lunch or break at the end of the shift is also not permitted. Combining a lunch break with time off for early departure is generally not permitted, unless the departure time is close to lunch. [Example: don't ask to take your lunch at 2:30 and use one hour of leave]

Specialists assigned to an area station are to be available to assist unloading the overnight bins, stocking the impound room, helping customers and answering telephones, prior to leaving for their station(s) and once they have returned, binned their transfers and taken their lunch break.

Specialists assigned to headquarters are to be available to assist at the counters and answer telephones, unless they have been assigned to a special project, by a supervisor, and have been excused from assisting customers.

The specialist assigned to the morning counter, afternoon counter or public counter is to be the first person to assist. If they are helping a customer, all others are expected to assist with customer service.

Whenever leaving the Property Room for longer than a break , whether it be for a lunch break, at the end of the day, to pick up supplies, to pick up SART kits, for an appointment, a meeting, or to go to an area station, it is that individual's responsibility to update their status on the in/out white board. Upon returning to the Property Room, the individual needs to update their presence on the board. Remember if there is a fire drill, everyone needs to be accounted for. This becomes very critical if there is any emergency and the staff member needs to be located or accounted for.

CLOSING: The officer/lab and public counters close at 3:00 p.m. or after the last person's transaction is complete. **Security is everyone's responsibility**. Prior to everyone leaving at 4:00 p.m. or at 3:00 p.m. on Fridays, the following steps must be taken to prepare for end of shift closure:

- Forward the phones to voice mail
- Lock the door to the public stairwell
- Turn out the lights in the public waiting room
- Lock the door to the public waiting room
- Deadbolt the back door to the warehouse, insert the wooden board
- Turn out the warehouse lights and close the door
- Turn out the lights in the kitchen area
- Turn off the office lights
- The last person out needs to lock the dead bolt to the main entrance. If the last person out doesn't have a key, they are to deadbolt the door and then exit through the viewing room.

<u>UNIFORM / ATTIRE</u>

Property and Evidence Unit employees are to maintain a professional appearance at work. All employees are to follow the guidelines as stated in the current MOU, appendix D. Many staff members chose to purchase sport-tek polo shirts with the City seal or a San Diego Police Department Property and Evidence logo. This is optional, there is no uniform allowance. In addition, Property Specialists that are loading or unloading property must wear safety shoes that are provided by the department. If a specialist is wearing a sport-tek polo shirt with the SDPD Property & Evidence logo, they may wear shorts with them, providing they match or appropriately coordinate with the logo shirt. SETC uniform shorts are suggested and encouraged. The shorts must be professional in appearance, no stripes, plaids, prints. The length must be appropriate for work. The goal is to present a professional appearance similar to SETC uniform, UPS driver uniforms, Post Office staff uniforms, Fed-Ex staff uniforms, etc. If a professional appearance with the shorts is not maintained, the privilege may be revoked.

AVAILABILITY FOR CALLBACK

Designated Property and Evidence Unit staff members are available for callout. Staff must be within sixty minutes of the work location. No take home cars are authorized for Property Unit staff. A current roster of the designated callback staff is on file at the Watch Commanders office. The following criterion for callout is in place:

- A. An impound of property too large to fit inside the property bins.
- B. An immediate and critical need to have property viewed or released. The immediate need should be evaluated by a Police Property and Evidence Unit Supervisor prior to call back.
- C. Emergency inside of a locked or alarmed property room facility requiring access.
- D. Evaluation of a hazardous material situation.
- E. General citywide emergency call backs. Callouts for a specific area station should be initiated with a Police Property and Evidence Unit Supervisor. The supervisor will then contact the specialist currently assigned to that area station, if appropriate.

COUNTER ASSIGNMENTS

OFFICER COUNTER (Interior Customer Service)

The staff member assigned to the officer counter is the first point of contact to assist law enforcement and lab personnel. They are responsible for having non-Property Unit personnel sign the HQ entry log and confirm they are given an escort when given access inside the Property Room. They are to ask their co-workers for additional assistance when they have more than one customer or if they will be away from the counter and their desk to pull property, bin property or take a break. In addition to these duties, the specialist/clerk is also responsible for:

AM OFFICER COUNTER:

- Unlocking and opening the internal counter by 7:00 a.m.
- Cleaning and wiping down the counter top and the officer impounding work stations
- Scraping off any evidence seal tape (razor in the impound table supply drawer)
- Checking and re-stocking the impound table supplies (drawers, shelves and box locations)
- Cleaning and wiping down the impound bins

PM OFFICER COUNTER:

- Cleaning and wiping down the counter top and officer impounding work stations
- Scraping off any evidence seal tape (razor in the impound table supply drawer)
- Checking and re-stocking impound table and drawer supplies for overnight (especially CD's)
- Closing and locking the counter after 3:30 p.m. after everyone has been assisted.

PUBLIC COUNTER

The staff member assigned to the public counter assignment is the first point of contact to release property to the public. They are to ask their co-workers for additional assistance when they have more than one customer or if they will be away from the counter and their desk to pull property, bin property or take a break. In addition to these duties, the specialist will be responsible for:

- Unlocking the door and turning on the lights by 8:15 a.m.
- Keeping customers moving, don't allow them to loiter in the waiting room
- Removing and recycling any boxes left behind from a release
- Providing contact information to the public for officers and detectives regarding the release of property and evidence
- Using the red emergency contact button (located on the right of the counter) if a situation suddenly becomes violent and immediate assistance is needed from the E Street counter officer.
- Locking all the property release counter doors and turning off the lights by 3:35 p.m. or after all customers have exited.

The public counter is closed on Fridays. This allows time for staff to focus on transfers, inventories and special projects.

The public counter is closed for all City recognized holidays and also the Day After Thanksgiving, Christmas Eve, and New Year's Eve. This enables the unit to grant additional requests for time off, while still covering the interior counters. It also allows the unit to close early without inconveniencing the public.

SALLY PORT WATCH

The staff member assigned to the sally port watch is to monitor the area for large prisoner bulk impounds. They are not responsible for processing all of these impounds, just to keep all clerks informed of when loads are dropped off and need to be processed.

PROPERTY AND EVIDENCE RESOURCES

- CAPE California Association of Property and Evidence <u>www.cape-inc.us</u>
- IAPE International Association of Property and Evidence

Certification is available through this organization. Membership must be maintained during the five years of certification. Certification of staff was recommended by the Grand Jury.

POST – Police Officer Standards and Training

IV OPERATING PROCEDURES

GENERAL GUIDELINES FOR ALL EMPLOYEES

It is the responsibility of the Property Unit personnel to carry out the daily functions of the Property Room. Property Unit personnel shall be diligent about following unit procedures. Property records should be treated with meticulous care, as this is the primary record reflecting the accountability of evidence processed by the department. Should any problem arise with a property record, including but not limited to property being misfiled, property being lost, the cash amount on the impound record not matching the cash amount in the safe, could result in the dismissal of a court case and discrediting of the Property Unit operation, as well as the Department.

Each item of evidence impounded may have significant evidentiary value. Items impounded must be accounted for continuously from the moment of impound until final disposition. This is all part of the chain of custody. This requires strict attention to detail by all Property Unit personnel, who shall be accountable for the accuracy of their work.

Property Unit personnel may encounter uncooperative persons at the front counters. They shall not engage themselves in arguments with customers, and shall show proper courtesy to everyone. Should a situation appear to get out of hand, employees should excuse themselves from the confrontation and request a supervisor to assist the person(s).

When directing citizens to investigative divisions or area stations for a property release form or to inquire about their property, it is imperative to send them to the

proper division. Use CRMS/NetRMS to research which detective has been assigned their case. When in doubt, the employee shall phone ahead in order to give the citizen the correct information. This is especially important when the case information is with another area command and the inquiry must be made there.

When an officer requests that specific items be accepted and impounded "as is," the Property Room personnel shall comply with the request if it is not against department policy and it is important to the case.

Care, courtesy, attention to detail, and accuracy are of the utmost importance and are to be observed at all times.

GENERAL

Responsibility:

All sworn personnel must adhere to the established property impounding procedures. It is the individual officer's responsibility to know the correct procedures.

Officers are to complete the appropriate fields using the EvidenceOnQ system. Items impounded are to be separated by item type and category. Property should be further separated by owner if possible. All separate entries are to be properly barcoded. The barcode label is not to be directly placed on the property. An envelope, bag or wire tag will be used and the label affixed. A wire tag must be attached to each firearm impounded. Multiple items, each barcoded, for the same incident number, may then be placed in a larger bag or box. That larger package must also have an incident number label and the item numbers included.

Discrepancies:

It is the individual officer's responsibility to know the correct procedures. The specialist will document any significant discrepancies in the EvidenceOnQ Noteslog. The specialist should immediately notify the impounding officer and the officer's sergeant (via e-mail) of all failures to adhere to the documented procedures.

If a response is received from the officer and additional time is needed to make the correction, the specialist is to give the officer a reasonable amount of time to make the correction, but continue to monitor the status of the impound.

If a response and/or action is required and the officer fails to respond or take action within one week, the specialist will send a second notice to their supervisor, the officer and the officer's direct supervisor (sergeant). If the

discrepancy is not resolved within one week, the third notice will be sent notifying the specialist's supervisor, the officer, the officer's sergeant, as well as the Senior Police Property and Evidence Supervisor. The Senior Police Property and Evidence Supervisor will seek resolution at the lieutenant's level.

It is the specialist's responsibility to continue to follow up on this discrepancy with their supervisor on a weekly basis until it is completely resolved.

CASH DISCREPANCY/HIGH VALUE ITEM DISCREPANCY:

If there is a discrepancy in the amount of cash that has been entered into the EvidenceOnQ system and the amount of cash received, this discrepancy is to be given high priority. If there is a discrepancy in a high value item that has been entered into the EvidenceOnQ system and the receipt of the high value item, this discrepancy is to be given high priority. The discrepancy must be recorded in the EvidenceOnQ noteslog.

The specialist should immediately notify their supervisor, the senior supervisor, the officer and the officer's sergeant (via e-mail). If the discrepancy is not resolved within TWO DAYS, an additional notice is to be sent out. The second notice will be sent to the same individuals. If the discrepancy is not resolved TWO DAYS, an additional notice is to be sent out. This third notice will include all of the original individuals, in addition to the officer's lieutenant. If the discrepancy is not resolved within TWO DAYS, the senior supervisor will notify the captain over Operational Support.

It is the specialist's responsibility to continue to follow up on this discrepancy until it is resolved.

Verification and Packaging:

Barcode labels must never be used as a seal.

Only the approved exterior packaging boxes are to be used. If the item is an odd shape, it may require a box to be built to protect the item appropriately.

Unusual shaped odd boxes are not to be recycled and used for exterior packaging. The shelving bins are set at a height for standard box sizes to maximize space and eliminate the "jenga" situation.

If a storage container has a removable lid, the barcode label must be affixed to the box and not the removable lid.

Many items must be packaged and barcoded separately, if there are multiple items for the same incident number, with the same victim, the packages may all be grouped together in a larger exterior box.

DISCS: Discs are to be placed in a CD envelope, sealing the opening of the envelope with a D-1135a photo seal. The barcode label should be placed on the face of the envelope. All CD's received in a standard CD envelope are to be filed in the designated CD bin area, and not mixed with other evidence in a box.

ENVELOPES: The barcode label is to be placed across the top on the far right edge.

EVIDENCE TAPE: Whenever opening a package with an evidence tape seal, slit open the package in a different area and reseal with new evidence tape. The specialist must place their initials, ID # and the date across the new seal.

ITEMS of VALUE: Jewelry or high value items must be described clearly and placed in a safe.

LATENT PRINTS: The required fields on the latent print envelopes must be completed and the envelope sealed with a PD-849 evidence seal. The barcode label must be placed on the face of the envelope.

EVIDENCE/FOUND PROPERTY purses, bags, backpacks, etc. that are <u>not</u> bulk property must be boxed. Boxing the item will allow for more efficient storage since boxes can be stacked. It will also preserve the item, which may remain on a shelf for a number of years.

PRISONER BULK IMPOUNDS: Plastic bags are only to be used for prisoner bulk impounds. Purses, tote bags and backpacks are to be sealed within a plastic bag with a zip tie. Multiple bags for one owner are to be placed inside a trash bin storage container with the lid completely closed.

Odd shaped items that can't be stacked, must be boxed, to allow for more efficient storage.

All firearms not in a case, must be boxed. Special boxes are available for storing knives safely.

Large prisoner bulk loads must be placed in one of the trash can storage bins designated for this purpose. If all of the items will not fit and still allow the lid to completely close, an additional trash can bin must be used. It is critical that the lid completely close on each trash can to discourage and avoid entrance by rodents.

If there are multiple items that are impounded under one incident number, the specialist will ensure that each item has a separate barcode label affixed. The package that holds the multiple items will be labeled with a completed EOQ computer generated incident number label (packaging label). It will include the incident number, the item numbers within the package (example: Items 1–5, 7, large bag) and the bin location once the item is binned. Placing multiple barcodes on the outside of a container that stores multiple item numbers is not acceptable if the impound is going to the Property Room. This process is only acceptable for the Narcotics Vault. The specialist will enter in the comments, the type of package along with what item numbers are within that package (example- items 1–5, 7, large bag.) This will be done for each entry to which that the packaging information pertains.

LONG TERM STORAGE INDICATORS

An orange colored label will be affixed to the label on evidence impounds relating to PC187-homicides. In the alternative, an orange or red permanent felt marker may be used to color a dot on the label. A blue colored label will be affixed to evidence impounds relating to sex crimes, officer involved shootings (OIS), child abuse and domestic violence incidents. In the alternative, a blue permanent felt marker may be used to color a dot on the label. The color coding indicates that these impounds may end up being stored long-term or possibly indefinitely. This will assist staff in determining which impounds can be relocated to an off-site long term storage location. This will reduce the handling of these items and inventory of these items at headquarters. It will also make space for the short time storage evidence at headquarters.

Binning of all items **must** be done with the MobileOnQ handheld device, for accuracy purposes.

The specialist will scan and attach any associated documents related to the impounded property such as Receipt for Weapons and Currency, Search Warrant, Receipt & Inventory. These will be scanned and attached under the documents tab for each item to which that document relates. If there are a large number of barcodes for which the item relates, an entry in the NotesLog may indicate that a document is scanned and attached to item # _____ only, but applies to all item numbers or applies to items 2,3,5,7,10, etc. so that the record is clear.

Packaging Details

Specialists must enter the appropriate packaging details in the Comments Tab, NotesLog under the header "Packaging Details".

San Diego Police Department Property and Evidence Unit – Operations Manual

STANDARD ENTRY	MEANING
Sealed	I sealed this and added my initials,
	ID # and the date
Sealed as is	I received this sealed, I didn't
	break the seal
Received Sealed	I received this sealed, I didn't
	break the seal

If a wire tag is attached to an item, it must be noted in the packaging details.

A description of the packaging type must be noted in the packaging details, for example: Envelope, medium box, large box, large bag, flat bag, etc.

If items are separated into multiple packages, this must be clearly noted, for example: Items 1-4 in Large Bag, Items 5-7 in Large Envelope, Item 8 wire tagged.

When adding an item to an existing box or bag, this must be clearly noted in the packaging details.

If a seal has been broken, this must be noted in the packaging details, along with the entry that it is resealed.

There are specific packaging details for the prisoner bulk homeless/transient loads. These details help with statistics on the volume of these impounds.

<u>Storage</u>:

Headquarters warehouse: There are designated areas in the headquarters property room for certain types of storage:

- Bicycles
- CD's
- Envelopes
- Large Bags
- Medium Boxes (or two ½ medium boxes stacked)
- Large Boxes (or two 1/2 large boxes stacked)
- Homicides (boxes)
- Long items
- Prisoner Bulk
- Skateboards
- Ammo/Gun Accessories
- Latent Print Cards

There are five safes for storing or cash and valuables (jewelry). The supervisors, manager and a limited number of staff have the combinations to the safes.

The auction cage is an area chain linked off and padlocked that can be used to store items pending pick-up from the auction company, supplies, electronic waste pending pick-up from RMD.

There are two, separately secured gun rooms, and a secured gun cage, for the storage of all firearms. The gun desk officers, supervisors, the manager and a limited number of staff have card access to the gun storage areas. Once firearms are pulled for destruction, they are relocated to a secured closet, located by the auction cage. Only the two supervisors, the manager and one staff member has a key to this secured closet.

Additional storage is located on the first floor in the old Supply Room. There is a chain linked area directly outside of this storage room. Both areas are used to store large prisoner bulk loads, which are secured in 95 gallon plastic trash cans.

HQ PROPERTY ROOM/P1

HQ PROPERTY / OUTSIDE CAGES, WALK-IN FREEZERS & REFRIGERATORS / P1 PARKING LOT

Jerome's Warehouse: Large prisoner bulk loads, including carts, bicycles and bicycle parts.

Homicide Bldg – Long Term Bldg #1: Impounds on paper property tags and in EvidenceOnQ that are related to homicides or are large items. [Not CD's, refrig/freeze or firearms.]

Long Term Building #2: Impounds for sex crimes, homicides and other long term storage items. [Not CD's, refrig/freezer or firearms.]

Area Station Warehouses: Each area station has warehouse space that is used to store impounds from both paper property tags and EvidenceOnQ. [Not refrig/freezer or firearms.]

WORK FLOW BY PRIORITY

1. CLEARING THE IMPOUND ROOM

Each morning, the first priority is to clear the Impound Room of any property or evidence left the night before. Everyone is to assist with this task at 6:30 a.m. each morning, regardless of their rotational assignment.

2. CLEARING THE OVERNIGHT LOCKERS

The second priority each morning is to clear the overnight lockers. If staffing is adequate, this can be done at the same time the Impound Room is being cleared.

Once the Impound Room and lockers are cleared and the supervisor responsible for scheduling has received all call-outs and modified the daily schedule, the morning meeting will be conducted. Staff members are encouraged to make suggestions, provide training approved by their supervisor, address concerns and ask any questions they have at the morning meetings.

3. CHECK WITH WATCH COMMANDER

Each morning, check with the Watch Commander to see if they received any impounds overnight.

4. CHECK MEDICAL ROOM FOR SUSPECT SARTS

Each morning, check the Medical Room in the sally port for suspect SART kits.

5. CLEAR SALLY PORT MAIL BOX

Each morning, clear all of the impounds out of the sally port mail box (small impounds).

6. CUSTOMER SERVICE

One specialist will be assigned as the **first point of contact** for each of the following assignments:

- Public Counter (8:30-3:30)
- AM Internal Counter (7:00–11:00)
- PM Internal Counter (11:00-3:30)
- Sally Port Watch/Suspect SARTS/Sally Port Mailbox (7:00-3:30)

The daily schedule will be posted on the white board and confirmed at the morning meeting.

If there are multiple customers, all specialists are expected to respond and assist. Everyone works together as a team and if the point specialist is assisting a customer, another specialist is to step up immediately and assist the next customer. Avoid completing multiple transactions at one time. If another specialist does not come to assist, the point specialist is to ask for help or ring the bell. If there is no additional help, ask one of the supervisors for assistance.

The phones are to be answered by all available staff:

• Phones (6:30am – 4:00 pm)

7. PROCESSING/BINNING EVIDENCE

Processing and binning all incoming impounds is the first and most important job each day. <u>Start with the large impounds first and work down to</u> <u>the small impounds last.</u> All specialists are to focus on the processing shelf until completion, which means all items have been processed and binned. Always use the MobileOnQ device to accurately capture the transfer. Don't hold binning until the end of the day. This has priority over any other project, unless specifically directed otherwise, by a supervisor. This task is to be given high priority throughout the day. As new impounds or returns are received, stop working on a rotation assignment and give priority to the processing of impounds.

8. ROTATION ASSIGNMENTS

If the processing shelf is clear and there are no customers needing assistance, focus next on any rotation assignments. Staff are responsible for completing all of the tasks within their assignment. If all tasks are not completed, they will be responsible for finishing them within the following assignment period. They will also receive a new assignment. If a staff member is having difficulty getting their rotation assignment completed, they are responsible for communicating that to their supervisor.

CATEGORY	TASK
INTAKE	HQ ITEMS NOT RECEIVED
	HQ RECEIVED / NOT
	BINNED
ADMINISTRATIVE	HQ CHECK-OUTS
ASSIGNMENTS	HQ SCAN & ATTACH
	INVENTORY
	INVENTORY
DISPOSALS	HQ PENDING FILE
	DISPOSALS

9. PROJECTS

If the processing shelf is empty and there are no customers needing assistance, and you are caught up on your quarterly assignment, you are expected to work on one of the many unit projects. Some of the projects are:

- EvidenceOnQ Conversions
 - All specialists are expected to work on property tag conversions into the EvidenceOnQ system. Items have been pulled and placed on the Conversion Cart for entry. This process includes data entry, barcode labeling, scanning to the bin location and scanning/attaching all original paperwork. Once the process is completed and the entry is documented on the property tag, the tag is to be filed in the designated box for supervisorial review.
- Dead Filing
 - Sort in order
 - Once in order file into the drawers
- Pull Property Tags to be processed for disposal
 - The tags are sorted by the bin location
- Pulling Property to be processed for disposal
 - Check the stack tray on the front desk for disposal lists. If none are available, go to the specialist assigned to the Request Monitor/Disposal Desk duties and ask for a disposal list, if that clerk isn't available, ask a supervisor.
- Processing disposals
 - * assigned by supervisor only, reserved for designated senior clerks
- Transfers of Sex Crime and Homicide evidence to Long Term storage offsite.
 - Generally this type of evidence is retained at HQ for one year, after which it can be transferred to the LT Offsite building.
- Inventory

• If a staff member has time available (30 minutes or more) contact a supervisor for a special project.

PRODUCTIVITY

It is expected that staff remain productive throughout the day. If a staff member is caught up with their general work and assignments they are to work on one of the projects listed above. These projects can be worked on from time to time throughout the day when customers do not need assistance. Keep in mind that customer service is a priority and if there are customers that need assistance, they must be assisted promptly.

A friendly work environment is encouraged and having some social conversations are acceptable outside of breaks as long as staff can be productive and work at the same time. If staff cannot converse and continue to work, then they are to reserve social conversation for their breaks.

IMPOUNDS - GENERAL GUIDELINES

The regular hours of the headquarters Property Room for Department personnel are Monday – Friday, 0700 – 1500. The headquarters Property Room is open to the public from 0800 – 1500, Monday through Thursday. The public counter is closed on Fridays. All property (except loaded guns) should be impounded through the front counter area of the Property Room during these hours or at an area station property room. If property is brought in after hours, it shall be secured in the impound bins of the Property Room. If adequate bin space is not available, prisoner bulk items may be left on the floor area of the Impound Room. That area is covered by cameras for security purposes. Loaded firearm impounds must be impounded at the Watch Commander's Office. If an officer is impounding currency over five hundred dollars they can leave the impound with a property specialist during regular business hours. If this occurs after hours, the officer must impound the currency in the Watch Commander's Office.

Large prisoner bulk loads may be left up in the sally port area, in front of the Property Unit storage area. They are not to block the SWAT cage.

It is the responsibility of the headquarters staff on the morning shift each day to transfer all property from the Watch Commander's Office to the Property Room immediately after opening of the Property Room. Money or jewelry impounded at the Watch Commander's Office must be counted with a witness and verified before transferring it from the Watch Commander's Office to the Property Room. Any discrepancies must be brought to the attention of a property unit supervisor and the officer at the Watch Commander's Office before leaving there. Items not accounted for or discrepancies must be noted and signed for by the specialist and Watch Commander's personnel. Before securing the Property Room at the end of the day, the property specialists shall ensure that they've scanned all items received for that day.

Specific information regarding area station impounding guideline procedures is available in the area station section of this manual.

IMPOUNDS - GENERAL PROCEDURES

All property determined to be of some value shall be impounded at one of the San Diego Police Department's Property Rooms or the Watch Commander's Office. The impounding officer will do so by using the EvidenceOnQ system, following Department Procedure 3.02.

After the impound is complete, all items of property are to be given to a specialist, if the Property Room is open. If the Property Room is not open, the impound is to be locked in a night impound bin and a specialist will process the following morning. Money is to be double counted and stored immediately if it is given to the specialist. Money in excess of \$20 is to be stored in the safe.

Items that are required to be analyzed by the Laboratory must be impounded at the Property Room first. These items must be sealed. The officer or detective must also submit a Lab Service Request form, which is available on the F drive, if they want something examined by the Laboratory. Items are not to be checked out by the officers to be dropped off at the Lab or any other place where the item will be left for analysis. The Lab will pick up items directly from the Property Room. Items going anywhere else should be signed for directly from the Property Room on a Property Release Form (PRF).

Alcohol Impounds:

Impounding of alcoholic beverages is similar to the impounding of other evidence (taken "as is") until further investigation is warranted. If a container of an alcoholic beverage is brought to the Property Room on a misdemeanor charge and it is not required for evidence in court, the officer will sign it off for disposal and the property specialist will dispose of it (see Department Procedure 3.02.).

Asset Seizure Impounds:

Impounding any evidence pursuant to an Asset Seizure must be reflected by checking the designator box on the EvidenceOnQ impound screen.

Bicycle Impounds:

When impounding bicycles, the EvidenceOnQ entry is to be filled out completely by the impounding officer, noting the serial number, make and model, color, gender and the wheel size. The condition of the bicycle should also be entered, whether it is rusty, new, the frame is bent, etc.

Once processed, the bicycles are stored on bicycle racks in the HQ warehouse.

NO bags, backpacks or additional items are to be stored with the bicycle. These items are to be barcoded and binned separately. [The only exception is if the entire load is being stored together at the Jerome's facility].

Found property bicycles are held for 90 days while the detectives attempt to locate the owner.

If the detective is unable to locate an owner, after 90 days, the bicycle can be released to the claimant (finder), following the process for Property Release (PD-184). If there is no finder, it may be authorized for disposition by the detective.

Sellable bicycles will be sold through our auction vendor.

If the auction vendor will not take bicycle parts and frames, they may be sent for metal recycling or the dump.

Biological Evidence Impounds:

Biological evidence is defined as samples of biological material – such as hair, tissue, bones, teeth, blood, semen or other bodily fluids – or evidence items containing biological material (*DNA Initiative 2012*).

Officers are to use paper bags, manila envelopes, cardboard boxes, and similar porous materials for all biological evidence impounds. Butcher paper is to be used for wrapping evidence or if padding is needed inside an evidence container. All packaging is to be SEALED with evidence tape. The sealers initials, ID number and the date should be marked across the seal. The sealing will protect the package from loss, cross-transfer and contamination.

Each item is to be packaged separately, to avoid comingling items to prevent cross-contamination. A biohazard label is to be attached to indicate that a potential biohazard is present.

Bloody or damp items are to be dried as much as possible. Plastic bags are NEVER to be used. The plastic could allow for the moisture to remain and possible grow mold and destroy the evidence.

Maintain the integrity of the item through the packaging documentation, including all markings, seals, tags, and labels. Preserve and document all packaging and labels received by or returned to the Property Room, this is critical information.
Caged Area in the P1 Parking Garage

The chain link caged areaa next to the freezers and refrigerators in the parking garage are not to be used for storage of prisoner bulk property. All prisoner bulk property is to be stored on the first floor, in the old supply room or at the Jerome's facility.

<u>CD/DVD</u>

CD's and DVD's received in the white envelope sleeves are all to be binned in the CD area (currently KK bins). Do not package with evidence. If CD's or DVD's are received in another packaging that will not fit in our storage boxes, they can be binned with evidence or separately in an envelope.

<u>CD – Lab Master Disk Impounds</u>

The Lab master disks are ONLY to be released to a staff member of the Lab. When one of these CD's are impounded, the Lab should have attached a sticker that states, "LAB CHECKOUT ONLY". This sticker should be on the same side as the barcode label so that when it is pulled for checkout, the specialist will see the reminder.

When receiving and processing these CD's, the specialist will make an entry in the EvidenceOnQ NotesLog "LAB CHECKOUT ONLY".

If the Lab would like to make an exception to this rule, they will do a request in EOQ authorizing a check out to ______, so that we have documentation and a good audit trail of the exception.

DNA Impounds

If evidence is marked 'HOLD for DNA" it must be sealed. Large items like bicycles, duffle bags, etc. must be properly packaged with butcher paper if they are to be processed for DNA analysis. Use extra care when processing to avoid cross-contamination. Wearing a new/clean pair of gloves and a mask are required. Just speaking over an item may cause cross-contamination. You don't want your DNA to be present on the item. Do not touch other items while you are wearing the gloves (a pen, computer keyboard, telephone, your skin). A new pair of gloves must be used for each item being processed. Do not store clean gloves in your pocket or loose on your desk or in your desk drawer. All attempts must be made to keep the gloves in a clean/sterile environment.

The work surface must be clean. Bleach is the best way to completely sterilize an evidence processing area. Utilize clean butcher paper between each item.

DNA is now being taken from bullet casings. It is the best practice for bullet casings to be individually packaged with separate barcodes. The coin envelopes are a good way to divide up the casings.

All firearms are to be packaged in new boxes. Gun boxes are not to be reused.

<u>E-Cigarettes/Electric Vapor Pipe Impounds</u>

The on/off button can be inadvertently depressed through a paper envelope or bag. Due to the potential fire hazard, the battery should be taken out of the unit prior to impounding, if possible. All e-cigarettes should be placed in a needle tube or a small box to provide a safety barrier.

Found Property Impounds:

Found property is impounded in the same manner as evidence or other property. Found property is to be held for safekeeping in the Property Room, pending notification of the owner or eventual release to the claimant. This property will be stored in the same manner as all other general property. When processing found property, the specialist should take steps to be sure that the category of found property is correct. If a criminal charge is listed or the description indicates that the item is not found property; the specialist should change the category from "Found Property" to "Evidence". Computer checks to find owners of found property must be done by the detectives that are responsible for handling found property, which is usually the person assigned to the NRC desk at Area Stations.

If a detective is not assigned to a found property impound in EvidenceOnQ, the NRC desk officer for that area station can be entered as the detective for the purpose of the automated email disposition notices.

Unclaimed found property is to be held for a period of 90 days. After the 90 day period, a detective can authorize the item(s) for disposal or authorize release to the claimant (person who found the property). The assigned detective must send a property release form to the claimant and authorize a release in the EvidenceOnQ system if the property is not contraband and can be released. If the property is not claimed within 30 days after the release form is mailed to the claimant, the property shall be disposed of according to existing procedures (see Release and Disposal Procedures 3.02).

Fuel Operated Equipment/Bicycles:

Any gas engine non-motorized equipment or vehicle is to be taken by the impounding officer to the City garage for removal of all gasoline, if impounded during the garage business hours. If impounded during non-business hours, the item may be placed up at Traffic in the Property Room Incoming Impound Area, which is in front of the two metal buildings, until the next business day, at which time the impounding officer would be responsible for getting the gasoline removed. These items are to be impounded through EvidenceOnQ and barcoded.

License Plate Impounds:

All license plates are to be impounded according to D.P. 3.02.

Money Impounds (Over \$20):

All money must be verified by denomination and the total amount **must** be entered in the "*money total value*" field in EvidenceOnQ. The specialist will notate in the comments section if there is a discrepancy with the impounded amount. Money is to be packaged in specific envelopes (PD-442 or PD-442A) (see Department Procedure 3.02). A separate bar code must be assigned to this envelope. Any discrepancies require immediate notification to a Property Unit Supervisor.

Information on the front of the envelope must be filled in completely by the impounding officer. A Property Unit Evidence Seal (PD-849) is to be affixed over the opening before storage. This seal is to be signed and dated by the property specialist that verified the amount. Two specialists should be present whenever handling money. See Money Handling Procedure section.

The Receipt for Weapons/Currency form (PD1072-FOS), attached to an impound, is to be removed and scanned into EvidenceOnQ as a document.

Money Impounds (\$20.00 or less):

All money is to be verified by denomination and the total amount must be entered in "*money total value*" field in EvidenceOnQ. The Specialist/Clerk will notate in the comments section if there is a discrepancy with the impounded amount. Money is to be placed in a specific envelope (PD-442 or PD-442A) (see Department Procedure 3.02).

Information on the front of the envelope should be completed by the impounding officer.

If coins (any amount \$20.00 or less) or dollar bills (\$5.00 or less) are discovered in property (commonly prisoner bulk property) that was not recorded in EvidenceOnQ or impounded separately may remain on the same barcode and does not need to be barcoded separately. However, the money must be counted and placed in an envelope, then the envelope must be placed inside of the property. The total value must be documented in the "money value field".

During the disposal process, if coins (any amount \$20.00 or less) or dollars (\$5.00 or less) are discovered and were not accounted for by the impound officer or the processing specialist, it will be identified as found property and will be transferred to the Auditor (in bulk, with other "found property").

Prisoner Bulk/Safekeeping Impounds:

Prisoner bulk impounds belonging to one owner may be impounded as one barcode, unless there are narcotics, and or currency over \$20.00.

Large loads of personal property impounded in plastic bags will be stored in 95 gallon trash bins. The lids on the bins must be able to close completely. If only one plastic bag of personal property is impounded, not enough to justify trash bin storage, this plastic bag is to be placed inside of a box. Boxing the bag is more efficient and will allow for stacking. Placing a plastic bag in a bin is not efficient use of storage space and the bag is at risk of being torn and items falling out. Recycled boxes may be used for this type of storage. These boxes are to be stored in the larger bin areas in prisoner bulk storage bins. The smaller bins should be reserved for backpacks and purses.

With the large loads, where the 95 gallon trash cans are being used to store the items, the number of cans and large items are to be entered in the impound record. For example: 15 trash cans, two carts, a wheelchair and a tent.

In order to monitor the increasing size of the prisoner bulk loads, staff will make entries in the NotesLog that can be used to query statistics on a monthly basis as to the current number of 95 gallon trash can impounds and the other large active impound items (carts, wheelchairs, tents, etc.) that take the equivalent amount of space as a trash can. For example, if the wheelchair takes the space of one trash can, and three tents take the space of one trash can, the total number will be two.

NotesLog headers "PR-PBP Trash Can #" and "PR-PBP Part (Trash Can Equiv.) #"have been designated for these entries for statistic purposes. The numbers in these entries are not the number of actual items.

SAFES

If a locked safe is impounded, the impounding officer or detective assigned to the case needs to make arrangements to have the safe opened ASAP and then inventory and barcode the contents. The Department has a contract with locksmith (Grah Safe 619 234–4829). Officer Phil Worthington is also willing to see if he can get the safe open, prior to contacting a locksmith.

Search Warrant Impounds:

Impounding any evidence pursuant to a search warrant must be reflected by checking the search warrant designator box on the EvidenceOnQ impound screen. The search warrant number should be entered in the following designated field.

Sexual Assault Impounds:

EOQ ENTRIES OF SART KITS PRIOR TO 6/2011

Interns in the Lab entered SART kits impounded on property tags, prior to 6/2011, into EvidenceOnQ. If the incident number and or case number can't be located, "SARTKIT(CURRENT YEAR)" was being entered. The Property Room requests that "(CURRENT YEAR) then (PROPERTY TAG NUMBER)" be entered in the incident number field, to allow for more accurate chronological filing, which will assist in sorting impounds for check-outs and disposals.

If an incident number or case number can't be located through CRMS, the Sex Crimes Unit has offered to search their sex crimes rain cloud data base to attempt to obtain the correct reference numbers.

If Interns select "other officer 9999" for the recovered by & transported by fields, they are to type the name of the officer in the remarks section.

<u>SART KITS</u>:

The SART kit provider will call or email the Property Unit to notify us when there are SART kits (sexual assault kits) to pick-up. An available specialist will be assigned to transport sexual assault kits and clothing impounded at the provider's facility to headquarters. The property will be impounded using a SART Evidence Collection Worksheet. The specialist who picks up the property will verify that the items they are receiving match what is listed on the form. Once this is completed they will sign the bottom of the form.

Effective September 2019, the SART nurse will enter the SART Kit (only the SART kit, not clothing or other items) into SARTOnQ via the nurse portal. The remaining items to be impounded will be entered into EvidenceOnQ by the Property Unit staff. Once the SART kit is entered into the nurse portal, it can take up to fifteen minutes before it is transferred over to the standard EvidenceOnQ system.

If the nurse conducting the SART examination does not have access to the SARTOnQ nurse portal, a property specialist will make the SARTOnQ entry, based on information provided on a SART Kit Worksheet.

If the kit is received from NMCSD, a property specialist will make the SARTOnQ entry.

If the kit is received in the mail from another agency, or if a detective receives the kit directly from a hospital or another agency, the SART Worksheet must be completed. A property specialist will make the SARTONQ – SART kit entry, but the detective will still be responsible for entering the remaining evidence.

A typical SART kit will have three envelopes and will be separated as follows:

A. The first envelope will be designated as SART KIT and will contain swabs. This will be stored in the **refrigerator** for a minimum of three years, thereafter in a temperature controlled environment (air conditioned room - 60 to 75 degrees).

B. The second envelope will be designated as SART KIT/TOXICOLOGY – and will contain the blood and urine. This will be stored in the **refrigerator** for a minimum of three years, thereafter in a temperature controlled environment (air conditioned room – 60 to 75 degrees).

C. The third envelope will be designated as a MOUTH SWAB and will be stored in the **refrigerator** that separately contains mouth swab reference kits. They are stored there until lab processing, for a minimum of three years, thereafter in a temperature controlled environment (air conditioned room - 60 to 75 degrees).

The location for storage of these items was at the direction of the lab after discussion and review of the Biological Evidence Preservation Handbook by the National Institute for Justice, April 2013.

When SART kits are entered, if the ITEM TYPE is SART KIT (not SART/toxicology blood or SART/toxicology urine), the RECOVERY LOCATION must be either **VICTIM** or **SUSPECT** (not an address). This entry is critical for determining the statistics prepared by the Crime Lab. When processing a SART kit impound, confirm this entry is made and is accurate. If the nurse entered the SART Kit, these are the only two options in the Recovery Location field and it is a drop-down menu.

Effective July 2018, the testing of the SART kit will be tracked via entries made in SARTONQ. The entries made in that system are transferred over to the standard EvidenceOnQ system. Prior to the implementation of the SART TRACKING portion of FOQ, the SART kits were all tracked through EOQ. This paragraph relates to the old entries. The "SART KIT Tested" field is also critical for determining the statistics prepared by the Crime Lab. This field will only contain an entry on ITEM TYPE "SART KIT" (not SART/toxicology blood or SART/toxicology urine). When the Crime Lab tests a SART kit, they will enter "yes" in this field. If a detective determines that a SART will not be sent to the Crime Lab for testing, a two digit number **MUST** be entered in this field. The two digit number corresponds with the NotesLog subject code for the reason for not testing. If the SART kit is from a SUSPECT, the word "SUSPECT" will be entered in this field, as the Crime Lab is not going to be using this field to track whether or not the suspect SART's are tested.

Every SART KIT must be entered into the SARTONQ nurse portal and once over in the EvidenceOnQ system, transferred to the "Collected Property" location in order to be tracked properly, the Sex Crimes supervisors notified via automated email, and the information available for the SAFE-T Department of Justice data base.

<u>SAFE KITS</u>:

The SDPD Property Unit will receive a call on the public line **(619) 531-2866** from the Navy Medical Center – Balboa Hospital Emergency Room notifying us that a SAFE KIT is ready for pick-up.

The Property Specialist receiving this phone call will immediately notify a supervisor/manager:

- Ray Christian, Supervisor (619) 531-2754
- Bob Lloyd, Supervisor (619) 531-2808
- Bev Harris, Manager (619) 531-2766

The supervisor/manager will designate a specialist to do the pick-up. It can wait until the next day if more convenient. If the impound is urgent, we will be notified by the SDPD Sex Crimes Unit.

TRAVEL/PICK-UP:

The Property Specialist will report to the **EMERGENCY ROOM** at the **Navy Medical Center San Diego**, **34800 Bob Wilson Drive**, **San Diego**, **CA. 92134**

EMERGENCY ROOM CONTACT:

After entering the Emergency Room, to the right of the front check-in area, there is a glassed in waiting room behind secured doors. This will most likely be the transaction location.

The current Program Manager contact person will be updated in the procedures. Try reaching the contact person on their cell phone when arriving at the ER (**619**) **822-3255**. The general number is (619) 532-5806. If unable to reach her directly, identify yourself at the counter and ask for her. If she is not available, ask for the SAFE Program Nurse.

The nurse will provide you with the evidence to impound. You will have to sign the following different forms/labels to indicate that you've received the evidence.

- 1. SAFE kit box label
- 2. Biological Specimen box label
- 3. NMCSD SAFE Evidence Collection Worksheet
- 4. AFMES Toxicological Evidence Chain of Custody Form (for blood & urine).
- 5. DD FORM 2911 page 12 of 14

Before signing the chain of custody for these forms, take special care with verifying that the items you are receiving are what is listed on the NMCSD SAFE Evidence Collection Worksheet & DD FORM 2911 page 12 of 14 (Section T EVIDENCE DISTRIBUTION) and that they are sealed. The nurse will make copies to give to you and will place the copy of DD FORM 2911 in an envelope which is attached to the SAFE kit box. This copy of the report is for the SDPD Sex Crimes Unit.

These documents provide the necessary information for EvidenceOnQ entries.

UPON RETURNING TO HEADQUARTERS:

- The actual SART kit must be entered into the SARTONQ nurse portal portion of the FOQ system. This entry will transfer the record over to EvidenceOnQ within 15 minutes. Set aside the other evidence until the record transfers. After the SART is available in the EvidenceOnQ system, that record must be updated to add any additional information, such as the transferred by fields. Other evidence can then be impounded and barcodes attached pursuant to the unit procedures.
- Document the packaging type and if each article is sealed in the Noteslog as a packaging detail.
- Use NMCSD / SART as the **Station Impounded** and SART KIT BOX / NMCSD as the **Item Type** for the SART kit. For the **Recovered By** field, use the nurse's name.
- Remove the DD FORM 2911, 14 page report and the DVD, from the SAFE kit envelope. Add the DVD onto the NMCSD SAFE Evidence Collection Worksheet and impound it separately. Remove and disregard the hard CD case, re-package the disc into a CD envelope and seal it with a photo label.
- Scan the following documents to be attached with the impound:
 - Page 12 of the report, which includes the Evidence Distribution and Person Receiving Evidence sections
 - AFMES Toxicological Evidence Chain of Custody Form (for blood & urine)
 - NMCSD SAFE Evidence Collection Worksheet

- Attach the four copies to the impounded entries in EOQ, use the document description of NMCSD Chain of Custody Forms.
- Even though the DD SAFE kit box may indicate the evidence can be stored at room temperature, our LAB wants it to be refrigerated. Transfer the two box SAFE kit to the location Refrigerator NMCSD Sart.
- **Staple the copies together with the** NMCSD SAFE Evidence Collection Worksheet on top and interfile in the SART KIT Notebook by the Processing Area. These documents will be purged after 6 months.

<u>Vehicle Parts (Large)</u>

Large vehicle parts (e.g., doors, hoods, bumpers, tires, windshields) that are not with a vehicle and must be held as evidence will be handled by the Property Unit.

Large vehicle part impounds that need to be held as evidence and do not need an analysis from the lab, are to be taken directly to the designated Property Room, "Incoming Impound" location, at the Traffic Division. This incoming impound location is in front of the cargo container, in between the metal storage buildings.

The vehicle part(s) must be impounded through EvidenceOnQ and properly labeled with a barcode. Wire tags should be available in the Eastern Division Impound Room. If the parts are too big to transport via a city vehicle, a contracted tow company may be dispatched through SDPD Communications to pick up the parts and transport them to Traffic Division.

For these impounds, the officer must select "Traffic Division Property Room Incoming Impound" area as the station impounded on the EvidenceOnQ impound record.

AREA STATION COVERAGE

Property Specialists are assigned to area station coverage based on the rotation of assignments. Each assignment is for a six month period of time, effective February 1st and August 1st of each year.

Each station assignment has a van. All other vans are assigned to HQ.

STATIONS	VAN ASSIGNMENT
Southeastern	3716
Southern	
Mid-City	3768
Central	
Northern	3715
Northwestern	
Northeastern	
Western	3714
Eastern	
Long Term	
Buildings	
Ruffin Road	

Staff assigned to the area station rotation start at each morning at HQ. They are to assist with the unloading of the lockers and clearing of the Impound Room. After the morning meeting, they leave HQ and travel to their first station.

AREA STATION PROPERTY PROCESSING

The handling of evidence and property at all area stations shall be handled as directed in Department Procedure 3.02 and in this operational manual. This portion of the manual is not intended to change any of these instructions, but is intended to emphasize certain areas and to cover problems that are unique to area stations and may not be covered in the other instructions.

Area stations have self-locking doors where evidence is impounded and secured. Combustible property will not be stored in the interior property room area.

The outer area of the Property Room is the work area for officers and must contain the necessary supplies for impounding items. Impound instructions are posted on the wall. Most items may be impounded at the individual area stations; however, the following items must be impounded at the Headquarters Property Room or the Watch Commander's Office.

- A. Loaded or jammed firearms must be impounded at the Watch Commander's Office.
- B. Narcotics evidence on felony cases; narcotics evidence if an arrest is made and if the evidence is anything other than marijuana or paraphernalia; any large quantities of narcotics that are too large for the narcotics drop box provided at the area station.
- C. P.C.P.
- D. Money in excess of \$500. If the Headquarters Property Room is closed, impound at the Watch Commander's Office.
- E. Jewelry with a value of \$1,000 or more. If the Headquarters Property Room is closed, impound at the Watch Commander's Office.
- F. Biohazard impounds (articles saturated in bodily fluids).
- G. Prisoner's Bulk Property/Personal Property.
- H. Property handled by any centralized investigations unit (Gangs, Graffiti Strike Force, Sex Crimes, Homicide, etc.)

AREA STATION ASSIGNED PROPERTY SPECIALIST DUTIES

- A. Receives, processes, and transports to Headquarters all impounded property according to unit guidelines.
- B. Monitors and re-stocks supplies in the officer impound area, including supplies for narcotic impounds.
- C. Keeps accurate and complete records of all impounded property. This includes accounting for "missing" entries and duplicate entries. The specialist will also complete a daily check to verify that all items transferred have been properly scanned to the correct location.
- D. Assures that all area station personnel adhere to the proper impounding procedures. This includes doing a daily check of their check-out file to verify that the area station personnel are returning property according to policy.

- E. Corresponds with officers of various rank to correct impounds with discrepancies.
- F. Report to their supervisor any discrepancies with impounds that can't be resolved or are unusual.
- G. Maintains security of the station Property Room. Requires everyone entering the facility to sign in and out on the log. The completed log sheets are to be scanned to the shared "G" files.
- H. Runs disposal lists for their assigned stations and pulls the items and transports them to Headquarters for disposal processing. If items are too large or the pull list is so large that they will not have time to pull the items within a week or two, they are to notify a supervisor.

Additional Functions:

- A. Performs various other property duties as determined by their supervisor. All Property Specialists, regardless of their assignment, are to assist in Property Specialist duties while at the Headquarters Property Room. This includes unloading the lockers and clearing the impound room at the beginning of shift and assisting with answering phones and providing customer service as needed when they have returned to Headquarters.
- B. Maintains the impound rooms and property area in a clean, secure and orderly manner and reports any areas of concern to the appropriate supervisor.
- C. Confirms that all computers, label printers, telephones and any other equipment is working properly. Reports any concerns or necessity for service requests to the appropriate supervisor.
- D. Maintains the minimum amount of supplies as documented on the Area Station Supply List.
- E. Just prior to the rotation date, does an extra cleaning to confirm that all work surfaces, bins, and floors are clean. Confirms all supplies are well stocked and everything in the Property Room is orderly. *Leave the space cleaner than you found it and how you would want to find it * ©

Protection and security of the impounded property is of utmost importance. Impounded property must never be left unsecured. The Property Room will be locked whenever the Property Specialist leaves the room. Any missing impounds or discrepancies regarding an impound should be reported *immediately* to a Property Unit Supervisor.

Daily Duties:

Check-In Impounded Property:

- A. Physically Assemble Property:
 - 1. Remove and account for all property impounded from the previous night. Always wear gloves when clearing the impound bins.
 - a. CAUTION: ALWAYS CHECK ALL IMPOUNDED GUNS IMMEDIATELY TO BE SURE THAT THEY ARE UNLOADED. **TREAT ALL FIREARMS AS IF THEY ARE LOADED** Wear gloves and a mask. If necessary to set the gun down, place clean butcher paper down for a work surface. Report any loaded or jammed guns to a Property Unit Supervisor immediately. Loaded or jammed guns must be impounded at Headquarters. If the Property Specialist is unsure whether or not the gun is loaded, a person (officer) that is knowledgeable about firearms should be asked to look at the gun.
- B. Account for All Property:
 - 1. Check to see that all impounded property:
 - a. Has a barcode label.
 - b. Has been entered into EvidenceOnQ.
 - c. If money, confirm the total amount is listed in the "money total value" field along with being identified by denominations in the appropriate fields.
 - d. If coins, confirm they have been rolled and counted by the impounding officer.
 - e. Is appropriately packed and marked for easy identification. The barcode label should be displayed on each impounded item.
 - 2. Visually check property and station impound query to confirm all items are accounted for.

CAUTION: Handle "HOLD FOR PRINTS" impounds very carefully so as not to destroy any potential latent prints evidence. A new pair of gloves

must be used when handling these items. A clean pair avoids the chances of cross-contamination.

3. Immediately notify the property supervisor of any significant discrepancies in impounds. Minor problems can be handled at the stations. Notify impounding officer and his/her supervisor of failure to adhere to the proper impounding procedures. If necessary, a discrepancy notice should be sent via email.

Separate Impounded Property:

After checking in the impounded property, the Property Specialist separates:

- A. Impounds which will be transported to HQ.
- B. Impounds that will be stored at the area station. These usually consist of large or bulky loads, or items that a detective has specifically requested remain at the station.

<u>Preparing Property For Transport to Headquarters:</u>

- A. Physically gather property that is to be sent to the Headquarters Property Room.
- B. Assure that all items are present or are accounted for.
- C. Make sure that all property is secure in an appropriate container (i.e., bag, envelope, box, etc.)
- D. Scan the location of these items to "Transport to HQ". Each substation has separate locations to indicate where the transport originated from (example: WE Transport to HQ.)

ON OLD PROPERTY TAG IMPOUNDS: the Specialist would initial the bottom of the tag to indicate transported to Headquarters. The Specialist would stamp the impound log with the date of transfer. The Specialist would prepare the Daily Property Transfer Log listing property in numerical order, listing a brief description of items in impound as well as suspect and victim information if available. A copy of the completed "Daily Property Transfer Log" would be retained by the area station property specialist for two years. The original will be retained at the Headquarters Property Room for a minimum of five (5) years.

Property Transport:

Area station Property Specialists will be required to transport property to the Headquarters Property Room. All security procedures are to be followed and the area station property rooms are to be secured. When transporting property, the Property Specialists must use the most direct route from their station to their next station and then to Headquarters. Any deviations from the direct route to or from Headquarters must be cleared with a Property Supervisor; this includes deviations to procure supplies at an offsite location. Area Station Property Specialists may use their assigned vehicles to stop for lunch within the downtown area or on the route to Headquarters. They cannot transport non-City employees in City vehicles. Deviations from the transport route or using a city vehicle for personal business may result in disciplinary action.

NARCOTICS PROCESSING

The area station Property Specialist does not have access to narcotics impounds. Personnel from the Narcotics Vault will pick up narcotics impounds from the area commands. Any discrepancies with narcotics impounds will be handled by Narcotics Vault personnel.

The Property Specialist is responsible for making sure that ample narcotic impounding supplies are available in the officer impounding room. Previously completed narcotics logs will be retained by the Narcotics Vault.

If a large narcotics impound is placed in the property impound bins at an area station, the following protocol will be followed. If the impounding officer is available, the impound entry can be voided and the impound should be transported by the officer to be re-impounded at Headquarters. Otherwise Narcotics Vault personnel will be contacted and asked to pick up the narcotics from the Property Room. The area station Property Specialist will not transport narcotics impounds to Headquarters.

If narcotics are discovered among general impounded property, the standard protocol will be followed.

PROPERTY RELEASES/CHECK-OUTS:

Detectives may check-out property and evidence from an area station with the same protocol as at HQ.

OTHER PROCEDURES/GENERAL INFORMATION (Alpha Order)

ALLEGATIONS OF DAMAGED OR MISSING ITEMS

When an owner of evidence, property, and or prisoner bulk comes in to pick-up their items, if they indicate that items are missing, which cannot be located as impounded in EvidenceOnQ, or they indicate that items are damaged. The Property & Evidence Specialist is to document in the impound record, as clearly as possible, all information provided by the owner. The owner of the property may be provided the phone number to the Risk Management Department (619) 236–6670, which handles all claims against the City of San Diego. The owner will be informed that all claims against the City must be made in writing using the *Claim Against the City of San Diego Form (RM-9)*. These forms are on the City of San Diego Risk Management website. If a claim is eventually submitted or a matter goes to court, our record should reflect what the owner told us at the time the items were being released. An absence of this record, could lead us to believe that nothing was mentioned at the time the property was signed for and released.

AUCTIONS – CONDUCTING LIVE AUCTIONS

As of 2013, the Department is no longer conducting live auctions. All auctions are handled through an auction company. This section of the manual remains for historical purposes.

The California Civil Code prescribes methods of disposition for all unclaimed property and contraband, which is in the custody of the San Diego Police Department. When owners or claimants cannot be located, such property may be sold at public auction, converted to City use or, in some cases, given to charity, recycled or destroyed. No other disposition is authorized.

Police Department auctions may be held to dispose of property the Department has been unable to return to the legal owner, or if an owner cannot be identified. This includes all of the property held by the Property Unit, such as bicycles, jewelry or televisions. However, this does not include firearms. Property Unit employees are not permitted to purchase items from our auction.

A Property Unit Supervisor or their designee is responsible for reviewing all property that is to be disposed of and making a determination of the disposition. Items that are determined to be sold shall have the property tag number or barcode number affixed to the property and shall then be gathered, listed and stored in the enclosed area until the next scheduled auction sale or manifested on a list to go to the currently contracted auction provider.

As it is written off for sale locally, a specialist from the Property Room shall lot up all items to be sold. At this time, property will be grouped into separate lots for auction and two shipping tags will be attached to each separate lot. The lots shall be numbered as A-1, A-2, etc., and a listing shall be recorded sating the lot number, the property tag number or barcode number and a description of each item in that lot. After the inventory list for the auction is prepared, an "Official Receipt Form AC-1218" shall be completed for each lot. This receipt shall show the auction date and the lot number of each lot to be sold.

Arrangements will be made with the Police Department's Garage, Traffic Division and Penske Rent a Truck for the use of the hydraulic lift trucks to be used to transport the items to the auction site. The trucks are brought to Headquarters and all items to be sold are loaded on the trucks. The trucks are then locked and secured.

Off-duty personnel assigned to the Property Section regularly work each auction. If enough personnel from the Property Section do not volunteer to work auctions, other civilian personnel within the Department will be recruited. If enough personnel cannot be recruited, personnel from the Property Section will be required to work the auctions on a compulsory basis. Overtime is compensated in accordance with City regulations.

One person is assigned to compute the state tax on items sold. Three people are assigned to complete the Official Receipt Forms. One person shall mark the price the item was sold for at the auction platform. This price is marked on one of the wire tags, which is removed from the item and taken to the person that is computing the sales tax. The person that bought the item will report to the employee that is computing the sales tax. The receipt writer will complete the Official Receipt Form with the name and address of the person buying the item and, if it is a check, mark appropriate identification information on the Official Receipt Form. The cashier shall collect the money and, if it is paid for by check, verify that the correct amount is indicated on the check. After the item is paid for, the person buying it shall be given a marked original of the receipt and shall remove the merchandize from the holding area. All sales and final and there are no refunds. Merchandize is sold "as is" and no guarantees are offered. Signs stating this policy are posted at the auction. At the discretion of the Sr. Police Property & Evidence Supervisor, transactions may be voided and money returned based on the circumstances.

Two officers will handle crowd control and any problems that may arise. Arrangements should be made prior to each auction to secure officers to work the auctions. Usually officers are selected to work the auction if they notify the Property Unit supervisor of their interest to work. Compensation for regular officers working overtime will be in accordance with City regulations.

Auctions are always held on Saturdays. The doors are opened at 0830 hours for the public to inspect the merchandise for sale. The actual sale begins at 0930 hours.

After the auction is completed, the proceeds from the auction are returned to the Property Room where the money is audited and a "Daily Cash Receipts Summary" (DCR) Form AC-1221 is completed. As soon as possible following the auction, money is deposited into the General Fund Account at Bank of America. The receipts are retained in the property room and a scanned copy of the DCR and the deposit slip is sent to Fiscal Management.

AUCTIONS – ONLINE

The Property Room no longer conducts live auctions. The City of San Diego Purchasing & Contracting Department now controls who provides the auction services. This is done through a bidding process. The Property Unit works with a Procurement Specialist to confirm the company meets our needs and requirements.

The Property Unit is required to use a City of San Diego contracted auction company. The SDPD Website indicates that name of the auction company, so if the auction provider changes, this website needs to be modified.

The auction company is utilized to sell unclaimed valuable property that has been authorized for disposition by the investigator assigned to the case. During the disposal process if the items of value have not been requested and approved for Department Conversion, they are set to the side in the auction cage to be prepared for the auction company at a later date. These items are marked or labeled with the property tag number or barcode number associated to the impound from which the property originated.

The auction company is responsible for wiping all electronics before sale (i-pods, phones, laptops). If the auction company does not have the ability to wipe the electronic devices, those items will not be forwarded to them for sale. In an abundance of caution, any electronic devices impounded on a child abuse/ICAC type investigation will be destroyed and not auctioned.

These items are then grouped into lots based on the value of the property (i.e. expensive jewelry might be separated while tools might be combined and grouped into one lot.) Each group of property is placed into a box or package which is marked with an item number that corresponds to a manifest list. For each item number, the entry of the property description is provided along with the property tag or barcode number for reference. The boxes are palletized so the forklift can be used the day of the pick-up to expedite loading. The stake bed truck is reserved in advance for the use of transporting the bikes for loading.

On the day of pick-up and after the loading is complete, each page of the manifest is to be signed by the driver who is accepting the property and the staff member they

are receiving it from. Before the original manifest is given to the driver a copy is made for our records and placed in the designated binder.

A check is issued and mailed to City Procurement, once per month, for the proceeds from the preceding month. A detailed report of each item sold is to be available on the company website. This money will be deposited into the General Fund Account at Bank of America and the Property Room will be notified of the total amount deposited.

The Department did not restrict the Property Unit employees from participating in the on-line auctions, as their items for sale never indicated where they were from. Due to the new vendor indicating that the items are from San Diego Police Department, employees will no longer be permitted to bid on items for purchase.

AUDITS

Audits focus on the systems in place to locate, track, and account for items of evidence/property in the custody of the Property Unit. Policies, procedures and processes of the unit will be reviewed to determine whether or not they meet the recognized standards, best practices, and are in compliance with applicable statutes and codes.

See **MANAGEMENT REPORTS** for Audits.

BARCODE NUMBERS

Barcode numbers are assigned through EvidenceOnQ and are unique to each ITEM, they should be used as the reference for the item.

BIOLOGICAL EVIDENCE STORAGE

The Lab Manager, DNA Supervisor and Property Unit Management agree to the following storage for biological evidence:

EVIDENCE	FREEZER	REFRIGERATOR	TEMPERATURE CONTROLLED 60-75 degrees Less than 60% humidity
SART KITS**		First three	After three years
SEX CRIMES SWABS		years	-
		*Being reviewed by	
		Crime Lab	
DNA EXTRACTS	Indefinitely		
SWABS			
HOMICIDE (187)	Indefinitely		
SWABS	*Being reviewed by Crime Lab		
Death Related SWABS			Until Disposition
ZZ920000,			
ZZ921000, ZZ951000			
ALL OTHER SWABS			Until Disposition

*The Crime Lab is reviewing the storage of swabs in the freezer or refrigerator, based on the Biological Evidence Preservation Handbook recommendations.

****** The lab would have no objection to the SART Kits being separated and the blood & urine portion being refrigerated and the swabs being placed in a temperature controlled environment immediately. The Property Unit plans to keep the kits together and refrigerate the entire kit for three years.

DNA extracts must <u>never</u> be moved to a refrigerator or temperature controlled environment.

Prior to any relocation of refrigerator or freezer stored items, if the impounds will be out of the refrigerator or freezer, check with the Lab Supervisor and obtain approval, even if only for a temporary situation. In an emergency situation, the Lab Supervisor should determine the priority for keeping items frozen or refrigerated.

Biological evidence should be stored in one of the following conditions, pursuant to *The Biological Evidence Preservation Handbook: Best Practices for Evidence Handlers, April* 2013:

• FROZEN: temperature is maintained thermostatically at or below -10 C (14 F)

- **REFRIGERATED**: temperature is maintained thermostatically between 2 C and 8 C (36 F and 46 F) with less than 25% humidity
- **TEMPERATURE CONTROLLED**: temperature is maintained thermostatically between 15.5 C and 24 C (60 F and 75 F) with less than 60% humidity
- **ROOM TEMPERATURE**: temperature is equal to the ambient temperature of its surroundings: storage area may lack temperature and humidity control methods.

SHORT TERM STORAGE CONDITION CHART

Taken from the Biological Evidence Preservation Handbook

Type of Evidence ²	Frozen	Refrigerated	Temperature Controlled	Room Temperature
Liquid Blood ³	Never	Best	Less than 24 hours	
Urine	Best	Less than 24 hours		
Dry Biological Stained Item ⁴			Best	Acceptable
Wet Bloody Items (if cannot be dried)	Best	Acceptable	Less than 24 hours	-
Bones	Acceptable		Acceptable	Acceptable
Hair			Best	Acceptable
Swabs with Biological Material		Best (wet)	Best (dried)	
Vaginal Smears			Best	
Feces	Best			
Buccal Swabs			Best	Less than 24 hours

Table III-1: Short-Term Storage Conditions Matrix

LONG TERM STORAGE CONDITION CHART

Taken from the Biological Evidence Preservation Handbook

Table III-2: Long-Term Storage Conditions Matrix¹

BREATH SAMPLES (Item Type) FOR BREATH STRIPS ENTERED IN EOQ BUT NOT IMPOUNDED WITH THE

PROPERTY ROOM [retained for historical purposes]

The breath strips that were previously entered into EvidenceOnQ by the arresting officer, but were not impounded with the Property Unit were forwarded to the Records Division for scanning into CRMS. The Records Division did not make any updates in EOQ. The Narcotics Vault did not physically handle the breath strips, they did a batch transfer of all breath strips in the location "collected property" and transferred them to the location "RECDIV-RECORDS DIVISION (for breath strips)". No verification was done. The EvidenceOnQ record remains with this location indefinitely. Even after the Records Division destroys the breath strip, which is usually 30 days after it is scanned into CRMS, the EOQ record will remain the same.

If an investigator submits a request through EvidenceOnQ for disposal of this breath sample to the Property Unit, the Property Unit will delete the request. The breath strip is not physically in the custody of the Property Unit to destroy, so no location transfer of the item will be processed.

There are times when a breath strip will be impounded and physically turned over to the Property Unit.

These items should be turned over to the Records Unit and updated accordingly in EvidenceOnQ.

Officers are no longer required to enter the breath strips into EvidenceOnQ.

CAGED AREA IN THE P1 PARKING GARAGE

The caged area in which the refrigerators and freezers are located is not to be used for storage of prisoner bulk impounds (carts, suitcases, wheelchairs, etc.) These types of items are only to be stored on the first floor or over at Jerome's.

"CATCH" TEAM – CELL PHONE IMPOUNDS

Due to the time period involved in extracting information from the phones, instead of checking out the phones, and requiring a 24 hour return, the supervisors of the CATCH team agree that releasing the phones, so that the Property Unit no longer needs to track them, makes sense. It will be up to the CATCH unit to handle the chain of evidence, once the phone is released to them. The standard property release form process required (can't issue a release to themselves).

CERTIFIED COPIES

If the District Attorney's Office, City Attorney's Office or anyone else requests a certified copy of a document, make a copy of the ORIGINAL of that document. Certification can only be done if we have the ORIGINAL document in our records. Stamp the bottom right corner of the reverse side of the document with the CERTIFICATION STAMP. Sign the stamped area, indicating that this photocopy is an accurate copy of an original document currently being held in our office. Enter the current date. Make an entry in the Comments Tab, NotesLog that a certified copy of

_____ (describe document) provided to ______ (name or agency that requested the certified copy).

CHAIN OF CUSTODY

If someone requests a chain of custody document, the EXTERNAL REPORT – CHAIN OF CUSTODY report is to be provided.

CHECK-OUT OF PROPERTY PROCEDURE

Members of the Department may check property out of the Property Room for investigative purpose, laboratory analysis, making copies, court presentation, or for release. Property may be checked out from various property storage facilities and must be returned to the same place where it was checked out.

NON-MEMBERS OF THE DEPARTMENT

City Attorneys, City Attorney Investigators, District Attorneys and District Attorney Investigators with agency photo identification may check-out evidence THAT HAS NOT BEEN SEALED with red-evidence tape or sealed with the impounding officer's name or initials and their ID number written across the seal, for the purpose of their investigation, for viewing, photographing and making copies. (CD's are an exception to the sealed evidence rule). If they want to view an item that has been sealed, they will need an authorized PRF from the assigned investigator. The assigned investigator should be the one to make entry into the sealed package and when the viewing and or photographing is complete, that investigator should seal that new entry. When checking out items to these individuals that are not part of the San Diego Police Department, obtain their business card or at a minimum their full name, phone number and email address. This information needs to be scanned into EvidenceOnQ or entered in the NotesLog for future reference.

If a Deputy City Attorney wishes to check-out evidence for a trial. The assigned detective should AUTHORIZE A RELEASE TO OTHER AGENCY and name the specific person who will be picking up the evidence. See section on Property Release Forms – Other Agency.

The "Lab Master Disks" may only be checked out by Lab personnel, not detectives. The Lab will attach a label indicating "Lab Checkout Only" on all new master disks impounded, this label should be placed on the same side as the barcode, so it will be viewable at the time of checkout. If there is ever an exception to this procedure, the Lab is to do a request in EOQ and authorize the check out.

The Records Unit may check out "Lab Working Copies" of CD's for handling Department discovery. [John Simms, Supervisor (2-17-2016)].

48 hour notice to the Property Room via telephone will ensure that the items are ready and available at Headquarters for pick-up. To save Investigators time on the day of pick-up, items may be pulled in advance and held in a temporary location, on a cart, and not in a bin, but only for 48 hours maximum. The cart or boxes pulled or in the process of being pulled must be clearly labeled with a HOLD PENDING CHECK-OUT FORM. Any EvidenceOnQ impounds must be transferred to HQ Hold-Pending Check-Out location in EOQ. For Property Tag impounds, the temporary location will be documented on a post-it note and binder clipped to the face of the original Property Tag and the tag must be placed back into the active files, until they are picked up for check-out. These items will be placed in the Offsite Transfer Cart or adjacent to it. Unless the requestor is from the Crime Lab, all freezer and refrigerator items are not to be pulled in advance, they will be pulled when the requestor arrives. The specialist responsible for facilitating the investigators request is responsible for following up and having the property binned if the detective does not retrieve the items within the required 48 hours. An Outlook calendar reminder is a good way to track these requests.

For transactions related to property impounded with a property tag, the person checking out the property must sign the chain of custody record on the back of the original white copy of the property tag as well as the checkout log. The property Unit employee assisting in the check-out must also initial the chain of custody record and the log. The property tag is then placed in the "Check-Out" file pending return of the property or paperwork to account for its disposition. For checkouts/returns for property that have been impounded using the EvidenceOnQ system, both the check-out and return signatures are captured using the Fileroom/Check-Out feature. Maintenance of the online check-outs can be done by running queries by current location (i.e., HQ Check-out, Checked out by Lab, Mid-City Check-Outs).

All checked out property must be accounted for. When items on a property tag are returned, a Property Unit employee will sign them back in on the chain of custody record on the back of the original white property tag, as well as the check-out log. The person returning the property will only initial the tag in the appropriate section to indicate the items have been returned. The property tag is then filed in the appropriate "active" file bin.

If the property was checked out through EvidenceOnQ, it needs to be logged/scanned back into the system and a signature obtained from the party returning the item(s). If the checked out property was originally sealed, it must be returned sealed. The policy for check-outs, with the exception of the Laboratory and the ICAC Unit, is that they are to be returned within 24 hours to the Property Room facility from which they were checked out.

There are specific check out locations for the SDPD Lab, Outside Agency Labs and the ICAC Unit.

- The LOCATION CODE for SDPD Lab is "PRlast name" = will display as first initial last name and ID number.
- The LOCATION CODE for Other Agency Lab is "PR-LAB-SDSO-ID number" (SDSO or whatever agency abbreviation)
- The LOCATION CODE for ICAC is "PR-ICAC-last name and ID number"

The ICAC Unit members must notify the property specialist that they are from ICAC so that the personalized location is used. This will allow the extended check-out period of time.

LAB CHECK-OUTS TO OTHER AGENCY LABS:

With agreement of the Investigative Control Group, the assigned detective does not need to approve the check-out of evidence to another law enforcement agency lab. The detectives are willing to have a supervisor in the Crime Lab grant the approval. Approval must be received from a Lab supervisor prior to any check-outs being granted to another law enforcement agency lab member. The Lab supervisor will enter code #20 through the request monitor, which reflects "LAB SUPERVISOR AUTH. – OKAY TO **CHECK-OUT** TO OTHER AGENCY". The Lab supervisor will enter the name of the lab representative, their ID number and agency in the REASON field.

When the other agency lab member appears at the counter for the approved check-out, the Specialist will locate that individual's personalized check-out code. "PR-LAB-*Agency abbrev.*-ID#" If the individual does not have a code in the system, a supervisor needs to be contacted to enter their code. It is also helpful to obtain a direct line phone number and enter it in the record for future reference. The time period for other agency lab check-outs will be 48 hours, knowing that the first late notice will not go out until after 7 days.

If the item being checked-out is a firearm, the transaction is to be referred to the Gun Desk PISO's. The Gun Desk has a system set up to track these check-outs. When the firearm is checked back in, either at the counter, or via an impound locker, the Gun Desk PISO's need to be notified. They are required to track the location of all firearms in our custody.

If the property has been released, a property release form, signed by the person who received the property, must be submitted to the property room.

The specialist receiving this signed PRF is to update the EvidenceOnQ record immediately, to reflect the items released, otherwise the detective will continue to receive notices through the automated check-out system. If the property was retained in court, a court evidence receipt signed by the court clerk and bearing the court seal, must be submitted to the property room within 24 hours. A Property Unit employee will sign the court receipt and return the pink copy to the individual who brought it in. In all cases where paperwork is submitted in lieu of returning the property to the Property Room, a Property Unit employee will sign the check-out log to account for the impound and attach the release form or court receipt to the original copy of the property tag. The property tag will be filed in the "dead" file, unless the item was a gun. If the item was a gun, the tag should be placed in the Gun Desk in-box so that the firearms can be updated in AFS and the firearms inventory database can be updated to reflect the final disposition. Once that processing is done, the tag will be placed in the dead files. If the item was impounded using the automated system, the specialist receiving the court receipt will immediately update the location of the impounded items to reflect they have been retained by the court and these documents will be scanned into EvidenceOnQ. The forms are not to be placed in the box for scanning and attaching. The updating needs to be done immediately, so that the detective does not continue to receive notices through the automated check-out system.

According to DP 3.02 checked-out items must be returned to the property room within 24 hours of the checkout date. Exception are the Lab and ICAC, which may

retain items for 90 days. Failure to return the checked-out property/evidence within the designated time period will result in a notice being automatically generated through the EvidenceOnQ system, after seven days to inquire about the whereabouts of the property/evidence. If no response is received within one week, the matter will be forwarded up the chain of command as necessary to get the checkout resolved.

If additional time is requested, the item must be checked back in and then checked out again, which will re-set the automated tracking. This also allows for verification that the item is available and not "missing".

CHECK-OUT NOTICES (AUTOMATED)

The first automated check-out notice will be generated **7 days after** the check-out date. The system will continue to send out additional notices to the recipient every 7 days until the item is returned.

With Lab check-out notices will be generated after the first 90 days. The system will continue to send out additional notices to the recipient every 7 days until the item is returned.

Unfortunately, the system cannot be fully automated, and second notices and elevating failures to respond will be done manually.

CLAIMS

If a customer believes their property was damaged, while it was impounded with our Department, or that items are missing from their impound, document their concerns in the impound record and refer them to the City of San Diego, Risk Management Department. The phone number is (619) 236–6670. All claims against the City of San Diego must be made in writing using the form provided on the Risk Management website, *Claim Against the City of San Diego Form (RM–9)*. The customer can be provided with that form.

COMMENTS TAB IN EVIDENCEONQ

The "Comments" screen (left side) is not protected. NO changes are to be made to the entries on this side of the screen. The Crime Lab tends to use this side of the screen to enter their records.

All Property Specialist entries are to be made on the right side of the screen, in the NOTES LOG. This side is protected and can't be modified. It also generates an entry as to who made the entry and when.

Whenever making a correction to a record in EvidenceOnQ, an explanation as to the correction should be made in the NotesLog.

CONDITION OF EVIDENCE

Staff members must never alter the condition of **evidence** after impounding. If a cell phone is turned on at the time of impound, it is not to be turned off. If a bullet button is not attached to a firearm, it is not to be attached. If a bullet button is magnetically attached to the barrel of a firearm, it is not to be relocated on a firearm. Nothing is to be altered from the way it is received.

If an item impounded appears to be damaged, include the details in the impound record. If a cell phone screen is cracked, include this information in the NotesLog. Anything that the owner could come back later and indicate it was fine at the time it was taken from them, but now it is damaged, document in the NotesLog.

CONTAMINATED ITEMS (MRSA, etc.)

If items are impounded as prisoner bulk or not vital as evidence, and they have been exposed to MRSA, the following agency can be contacted to destroy the items safely:

Harmony Environmental Services PO Box 2268 Ramona, CA. 92065 24 hour emergency # 1-888-623-4191

The 2017 PO #0400081204. Notify Rita Castillo in Fiscal. Sample barcode 10714312, Incident 17010041580

Any prisoner bulk items that are so contaminated that they need to be destroyed must be documented clearly in the EvidenceOnQ record and photographed if possible. Assistant Chief McGrath has instructed staff to complete a minor injury report after handling items this contaminated.

Evidence that is known to be contaminated is to be clearly labeled 'BIO HAZARD" and noted in the comments field. Extra precautions should always be taken when handling known contaminated evidence.

CONVERSION OF IMPOUNDED & UNCLAIMED PROPERTY TO CITY PROPERTY INVENTORY [DP 3.24]

If a unit in the department requests that impounded property be converted to City property, for use within the Department, the need for this property must be explained on Form PD-823 *Request for Conversion of Impounded Property*. Forms are available on the "F" drive under Templates/Administrative.

Requests are only to be prepared if they provide benefit to the public. Items for personal use will not be converted. Some examples of items that are not considered appropriate for conversion are microwaves, refrigerators, briefcases to carry personal items, or radios for individual use. All requests for computer equipment should be made through the Information Technology Unit.

Requests may be routed via the chain of command, first to the captain of the unit requesting conversion, then through the Senior Property Unit Supervisor, then through the Captain of Operational Support and final authorization is by the Assistant Chief responsible for Operational Support/Property Unit.

Requests will be filled by the Sr. Property Unit Supervisor or Property Supervisor.

Items pending conversion will be transferred to location "HQ HFC" – Hold for Conversion – Auction Case. The item(s) will be secured in the Auction Cage. The retention code will be changed to "HPC" – Hold Pending Conversion. This will remove the item(s) from the disposal lists.

When the requested property becomes available, the Property Unit Supervisor will:

- A. Confirm that the property is still available.
- B. Confirm the unclaimed property has been held for at least three months pursuant to California Civil Code 2080.4.

- C. Stolen or embezzled property has been held at least three months if notice was given to the true owner pursuant to California Penal Code 1411.
- D. Confirm that the unclaimed property has been held at least six months if the true owner was not identified pursuant to California Penal Code 1411.
- E. Apply a City of San Diego property number from the City Auditor's Office, if required, and send in appropriate paperwork to Fiscal Management. The property tag number or barcode number on which the item was impounded should also be included.
 - 1. Most items valued at \$5,000.00 or less will be inscribed with the property tag number or barcode number and a City property number will not be requested per City policy. A blue City sticker will be attached.
 - 2. The value will be determined by the Supervisor of the Property Unit.
- F. The item(s) converted will be updated in EOQ as "08 Converted to Department Use".
- G. The completed conversion form will be scanned and attached to the corresponding barcode in EvidenceOnQ.
- H. The Property Unit will maintain the PD 823 forms on all granted conversions for a period of ten years. The completed form will be scanned into the Property Unit's shared "G" files, under Conversion. The records are filed by year and month of the completed conversion.

Expendable items (oil, flares, tools, flashlights, etc.) that can be used by the Department will be listed in a log. No number will be requested for such items. The Property Unit will maintain the log for two (2) years pursuant to DP 3.24.

CORRESPONDENCE/JAIL MAIL REGARDING A PRISONER BULK (SAFEKEEPING)

When correspondence or jail mail is received regarding a prisoner bulk (safekeeping) impound, the documentation shall be scanned and attached to the corresponding impound. Any response prepared by the Property Unit staff will also be scanned and attached to the impound record. Civil Code 2080.10 covers safekeeping property.

Civil Code 2080.10 requires that the receipt and instructions provided to the owner of the property notify them that it must be claimed within 90 days after it is impounded, or it will be destroyed. If the person is unable to retrieve the property, because they are in custody, they must notify the SDPD IN WRITING. SDPD must hold the property for not longer than 10 additional months (Total of 12 months from the impound date).

If an impound record is not located under the person's name, a copy of the jail mail will be saved in the shared "G" file, in the Supervisor's Folder under Jail Mail No FOQ Record. These records must be retained for a minimum of two years.

COURT ORDERS FOR RELEASE OF EVIDENCE

Citizens and attorneys that provide an Order for Release of Property from the court, must also get a Property Release from the assigned investigator/division. Most people coming in with a court order believe that the document is all they need to get their property. If the court order is signed by the judge, or has a stamped name and the document is a **certified copy**, which means there will be a stamp indicating it is a true copy of the original in the court file and there is a court seal, scan and attach it to the appropriate barcode numbers in EvidenceOnQ. Make an effort to assist the citizen/attorney in their attempt to contact the investigator. Unless the investigator needs the evidence for another investigation, it should be eligible for release. If the order is scanned and emailed to the investigator, they may be willing to immediately do a request in EvidenceOnQ to release the evidence. It isn't the property specialist's responsibility to get the PRF from the investigator, but it expedites the processing.

COURT ORDER FOR SEALING AND DESTRUCTION OF ARREST RECORDS – PC851.8

When court orders for sealing and destruction of arrest records are received from the Records Unit, date stamp them the day it is received in the Property Unit. Determine if the Petitioner (suspect/defendant) has an impound record within the Property Unit, EvidenceOnQ system. If there is an impound record, the Petitioner's name must be removed from the records. In lieu of the person's name, enter "SEALED PC851.8" in all fields where the name previously displayed. The name will continue to be available in the audit trail, but that can't be deleted. The indication of "SEALED" will alert all staff that this information must not be released to anyone, pursuant to a court order. Scan and attach the Order After Hearing for Sealing and Destruction of Arrest Record to the impound record in EvidenceOnQ. Three years after the DATE OF ARREST, this document must be shredded. [See Procedures for Supervisors for processing details].

COURT RETENTION OF EVIDENCE

If the property was retained in court, a court evidence receipt signed by the court clerk and bearing the court seal, must be submitted to the Property Unit within 24 hours. A Property Unit employee will sign the court receipt and return the pink copy to the individual who brought it in. In all cases where paperwork is submitted in lieu of returning the property to the Property Room, a Property Unit employee will sign the check-out log to account for the impound and attach the court receipt to the original copy of the property tag. The property tag will be filed in the "dead" file, unless the item was a gun. If the item was a gun, the tag should be placed in the Gun Desk in-box so that the firearms can be updated in AFS and the firearms inventory database can be updated to reflect the final disposition. Once that processing is done, the tag will be placed in the dead files. If the item was impounded using the automated system these documents will be scanned into EvidenceOnQ.

<u>CPRA – CALIFORNIA PUBLIC RECORDS ACT</u>

Government Code 6250-6255

The Records Division currently processes all of the requests for public records that are received through the City website. If any media or private individual requests statistics or information on impounds, they are to be directed to the Records Division. The Records Division will contact the Property Unit Manager with the assigned CPRA number and ask for the information necessary. The Property Unit Manager and Supervisors will gather the information requested and redact any information they believe is exempt. The Assistant Chief responsible for the Property Unit may want to review all CPRA's and have the Legal Unit review them prior to responding to the Records Division. As the Assistant Chief over the unit changes, check with each chief as to their preference. This is all to be coordinated through the Property Unit Manager.

All of the time spent on these requests are to be documented on employee time cards with the code #16000011. [See procedures by Paige Folkman, Legal Unit, document #1423339]

DAILY ASSIGNMENTS – INCLUDED RESPONSIBILITY

OFFICER COUNTER – PM: When assigned to the officer counter in the afternoon, the staff member is also responsible for closing the rolling window, stocking the impound room and forwarding the phones at closing.

PUBLIC COUNTER: When assigned to the public counter, the staff member is also responsible for locking the doors to the waiting room and turning off the lights once it is locked.

SALLY PORT: When assigned to the sally port, the staff member is also responsible for checking for suspect SART kits and clearing out the mailbox in the sally port that is used for impounding small evidence.

DATES OF SIGNIFICANT EVENTS:

May 2004 2005	Incident numbers in current format CRMS implemented (Auto Theft not in CRMS)
-	•
Prior to 6-15-2011	Paper property tags
June 15, 2011	EvidenceOnQ impounds commenced
September 2014	EvidenceOnQ automated emails commenced
May 2015	Property Unit took over Traffic Bldg. #2 from the Lab (old vehicle inspection bldg.)
March 2016	Eastern – Temperature Controlled Storage (interior)
April 2016	Old Supply Room – Converted to storage for large prisoner bulk loads (trash cans)
July 2018	SART Tracking portion of EvidenceOnQ
2019	Ruffin Road Facility
August 2019	NetRMS completely replaced CRMS for new incidents (year long process)

DISPOSITIONS:

DISPOSITION PROCEDURE

If property is unclaimed after the Property Release Form expires, or an item is authorized by a detective for destruction, a decision is made by a Property Unit Supervisor or their designee regarding its final disposition.

Two staff members process the dispositions together. One is either a supervisor or their designee and another staff member. The second staff member is to sign the log sheet for that particular day, since their name is not added to the EOQ or property tag record.

The supervisor (or designee) is to confirm that there is authorization for disposition of each item. The impound record number (barcode or property tag number) is confirmed with the second person processing the dispositions. The description of the item(s) are confirmed with the second person processing the dispositions. Once the decision is made by the supervisor (or designee) how the disposition will be processed (see options below), the appropriate transfer location will be entered in EvidenceOnQ or documented next to the individual items on the property tag.

Destroyed Donated Converted to Department Use City Auditor Auctioned Lab – (cell phones for testing)

The property tag will then be stamped on the back side with "DESTROYED" and the supervisor's initials. The number of tags processed is counted and recorded for the Quarterly Management Report.

There are five alternatives available:

- A. Conversion to City use (request book for Conversion Form PD-823 or tool log)
- B. Submission to police auction or internet auction. The auction provider is determined through the City Purchasing and Contracting Department
- C. Destroy or recycle metal, paper and electronics through proper facilities
- D. Given to charitable organization (see D.P. 3.02)
E. Recycle items such as paint, auto fluids, and fertilizers to interested parties

If property/evidence is determined to be contraband it will be destroyed.

Batteries: See Hazardous Materials section. Batteries that are new or in good condition will be held in the disposal area, for Department use. The disposal batteries must have the ends taped over, for fire safety purposes, prior to transferring to Universal Waste.

Blood and urine: See Hazardous Materials section.

Counterfeit Items (purses, clothing, etc.): Counterfeit items must be destroyed in such a way that they could never be sold. The items can be spray painted or cut up.

Counterfeit Money: Turned over to the US Treasury. The Secret Service picks up on a regular basis or can be reached at 619 557-5640 to schedule a pick up. If there is a Property Release Form, they sign for receipt of the item. If there is a property tag, they will initial next to the item received.

Donations: New or gently used clothing and shoes are donated to Father Joe's. Receipts from the donations are scanned into the G drive, under Property/Donation and placed into the current year.

Dump: Soiled clothing, other general items for destruction are taken to the City Dump.

Electronics: Used newer cell phones, electronic tablets, ipods, etc. may be sent to an auction company IF they will clear all data before sale. If the incident was related to sex crimes, child pornography or child abuse, in an abundance of caution, these devices will be destroyed through RMD Technologies and not sent to an auction company. The auction company is determined by the City Purchasing and Contracting Department.

Electronic Waste (no value): RMD Technologies

Firearm Parts/Ammo: When processing a disposal, if a holster, gun case, magazine, clip, ammunition, etc. is authorized for disposal, review the entire incident to determine if a firearm was impounded. If a firearm was impounded and is still here, do NOT destroy the item(s). The item(s) are to be re-binned. Enter a request for a 90 day hold. Notify the Gun Desk. The Gun Desk will track these items along with the firearm for eventual release or destruction.

Firearm Processing Packets: When processing disposals, if a firearm processing packet is located, check the EvidenceOnQ record for the firearm itself. If the firearm was released or destroyed, bin the processing packet in the designated location. Change the retention code to "Gun-Firearm Processing Packet". The Gun Desk PISO

will be entered as the assigned detective, so that the automated email is forwarded directly to the Gun Desk at the end of the retention period.

Fire extinguishers: Contact Metro-Fire Safety for pickup (see Hazardous Materials section).

Flags (American Flags):

There is a process that American flags must go through for destruction. There are several organizations that will do this ceremony and processing. The Boy Scouts of America, 1207 Upas Street, San Diego 92103 (619) 298-6121 will only take the cotton flags, not nylon flags. Veteran's of Foreign Wars (VFW) 7785 Othello Avenue, San Diego 92111 (858) 277-5510.

Foreign Currency: Schedule an appointment on-line with Bank of America. Take the foreign currency and our bank account number. The teller will exchange whatever currency is eligible and deposit it directly into the SDPD Property Room account. Save the receipts for the DCR register. If there is currency that the bank can't exchange, take it to a travel exchange company. There is one in Horton Plaza. They will exchange eligible currency for cash. Save the receipt for the DCR register.

Gas Cylinders: See Hazardous Materials section.

Gift Cards: At the time of disposal, the gift card will be placed in an envelope and sealed. The property tag number or barcode number is to be written on the envelope. At the end of the day, the envelopes will be transferred to Safe D. The number or website on the back of the card needs to be contacted to determine the value of the card. Cards with no value or minimal change value will be shredded. The cards with value will be sent to our auction provider.

Handicap Placards: Contraband, placed with metal shredding.

Hazardous Materials: See section on Hazardous Materials (DP 8.19).

License Plates: Department of Motor Vehicles requests that they be destroyed. Include with metal contraband for shredding with firearms at SA Recycling.

Light Bulbs: See Hazardous Materials section.

Lighters: See Hazardous Materials section.

Mace: See Hazardous Materials section.

Media (CD, VHS tapes, audio tapes) and paper: SHRED-IT for shredding.

Metal Contraband: Swords, knives, weapons – SA Recycling for metal shredding with firearms. The items are to be transferred to a box and sealed with evidence

tape, dated and initialed as soon as there is an adequate amount. The seal is not to be broken and the box opened without a supervisor's authorization.

Metal/Scrap Metal: Smash computer hard drive, cell phones, etc. and then forward to RMD Technologies

Paint Cans: See Hazardous Materials section.

Passports: Mail to the State Department (certified or receipt requested). US Department of State, Passport Services, Consular Lost/Stolen Passport Section, 1111 19th Street, NW, Suite 500, Washington, DC 20036.

Pepper Spray: See Hazardous Materials section.

Prisoner Bulk Change: If loose change is found inside a prisoner bulk backpack it is to be placed in the locking change box. When there is enough change to roll, it is to be deposited.

Savings Bonds (US): Forward to the US Treasury. Update as "shipped" not "destroyed".

Spray Paint: See Hazardous Materials section.

Tools (Hand tools): Hand tools are set aside in the disposal area for Department use. A conversion form is not necessary, a log entry is required.

DISPOSALS:

DP 3.2 Section XI Responsibility for Release of Impounded Property – General Procedures defines all of the policy for releases and disposals of property.

Key points directly relating to the Property Room are as follows.

A. Property seized pursuant to a search warrant, which will be reflected in EOQ with the search warrant box checked, must have a court order prior to release or destruction in addition to the Property Release form from the investigator (Penal Code sections 1535 through 1540). It is the Investigators responsibility to obtain the court order.

Citizens that provide an Order for Release of Property from the court, must first present the order to the appropriate investigator/division and obtain a Property Release form. (See Court Orders for Release section).

- B. Property or currency impounded as an asset seizure, which will be reflect in EOQ with the asset seizure box checked, can only be released to a SDPD detective assigned to the Narcotics Task Force (NTF). (DP 3.23)
- C. Only the Gun Desk Officers can release or dispose of impounded firearms. The Gun Desk Officers do obtain authorization from the assigned investigator prior to taking action on firearms.
- D. Patrol Officers may release:
 - Prisoner Bulk
 - Personal items, if they forgot to return them to the owner (driver license, keys, wallet, etc.)
- E. All other releases must be authorized by an investigator.

If an investigator is authorizing release through the Request Monitor in EvidenceOnQ, they are also required to prepare a Property Release form (PD184) through EvidenceOnQ. This form is required so that notification is given to the owner, in writing, that if they don't pick up their property within the time frame indicated, they are put on notice that the property will be destroyed.

Investigators are responsible for the release or disposal of impounded property associated with cases assigned to them.

The general guidelines for release/disposal of property impounded are defined in DP 3.02.

DP 3.02 Section XII Disposal of Unidentified, Unclaimed or Worthless Property defines all of the policy for disposals of this type of property.

Key points directly relating to the Property Room are as follows:

Retention period time limits begin from the date the property first came into the Department's possession.

Property impounded relative to a case under investigation must be retained until such time that it is no longer needed as evidence.

- Past the statute of limitations, if a case has not been filed by the District Attorney's Office or the City Attorney's Office.
- After a filed case has been adjudicated and a ruling has been made on any appeals, or after the time period for filing an appeal has expired. (6 months is recommended).
- If there are multiple defendants, the case for each defendant must be adjudicated and beyond the time period for filing an appeal. (6 months is recommended).

Found property must be retained for at least 90 days, unless it is released to the owner.

Prisoner Bulk/Personal Property will be retained for 90 days unless the arrestee contacts the Property Unit and requests an extension.

Property impounded as "Other" may be released or disposed of at any time it has been determined to have no evidentiary value.

Any EVIDENCE for which a Property Release form (PD-184) has been issued and the release form has expired (30 days after date of notice) may be disposed of as unclaimed.

Once the property has been authorized by a police investigator for disposal, and reviewed and authorized by a supervisor, either a property supervisor or the supervisor's designee shall examine the property for final disposition. The property may be:

- 1. Destroyed;
- 2. Sold at public auction (on-line auction acceptable);
- 3. Donated to a non-profit organization;
- 4. Deposited in the City's General Fund;
- 5. Converted to Department use. (Refer to Department Procedure 3.24, Conversion of Seized Property); or,
- 6. Recycled

CASH IMPOUND FOR DISPOSAL

When processing disposals on cash, if the impound amount in EOQ does not match the cash present, after two clerks have both counted the cash separately, correct the EOQ impound record to the amount of cash present. In the Comments/NotesLog enter the discrepancy and that the impound was corrected to reflect the amount present. If the discrepancy is more than \$10.00, refer the barcode number to a supervisor.

The supervisor is to review the impound and attempt to determine why there was a discrepancy. At a minimum, the supervisor must make a Comments/NotesLog entry of their findings and that a review was conducted.

DISPOSAL OF LOST & FOUND PROPERTY ON CITY PREMISES (AR 45.30)

The City of San Diego Administrative Regulation 45.30 states the procedure for disposal of found property on City premises.

If the found property being held by a City Department is unclaimed after 30 days and can be reasonably valued at \$100.00 or more, the City Department Designee must complete an Affidavit for Lost and Found Property stating: 1) where it was found, 2) how it was saved, 3) whether the owner is known, 4) that the property was not withheld from the owner, and 5) that no part of the property was disposed of; and forward that affidavit with the Lost and Found Property to the Police Department Property Room.

The Property Specialist will receive the lost and found property and the affidavit. The Property Specialist will sign the affidavit acknowledging receipt and retain the origin and return a duplicate copy to the City Department Designee.

The Property Specialist will enter the items into the EvidenceOnQ impound system and provide a property report, as a receipt to the City Department Designee.

After the lost and found is received by the SDPD Property Unit, it must be disposed of in accordance with SDMC 22.0603, which is consistent with the Department's Found Property Policy.

ENTRIES OF PROPERTY TAG IMPOUNDS:

Cash and Valuable Impounds in the Safes: The majority of impounds stored in the safes are in the EvidenceOnQ system. The property tags that were converted into EvidenceOnQ are marked "EE – Electronic Entry and the barcode number" and the original tags have been transferred to the Dead Files.

Firearms: All firearms previously impounded on property tags are gradually being entered into EvidenceOnQ. The property tags that have been converted into EvidenceOnQ are marked "EE – Electronic Entry and the barcode number" and the original tags transferred to the Dead Files.

When entering old property tag impounds into EvidenceOnQ, if an incident number is not assigned, the generic incident number that will be assigned is as follows:

• Four digit year of the impound followed by the property tag number (sample: 2013123487)

The property tag number must be entered in the property tag number field. This will enable a quick search by tag number in EvidenceOnQ.

EvidenceOnQ versus FileOnQ

EvidenceOnQ is the property and evidence management system software created by the FileOnQ company. Historically, staff has referred to the system as FileOnQ, but actually the program name is EvidenceOnQ.

EvidenceOnQ ACCESS

The webview version of EvidenceOnQ can be accessed through the SDPD Intranet under SDPD Applications/Property Unit System (EvidenceOnQ). Officers use the webview version. The Property Unit staff use the desktop version of EvidenceOnQ.

EvidenceOnQ AUTOMATED E-MAIL DISPOSITION NOTICES:

In September 2014, the Property Unit started using the EvidenceOnQ system to generate e-mail disposition notices.

The disposition notices are generated monthly and include all impounds on which the retention date has passed. Just prior to the monthly email being generated, any impounds that have been authorized for disposition but have not yet been processed will be batch updated with the retention code "CE" (cease e-mail), which will keep the system from generated an email dispo notice to the assigned investigator. We don't want investigators to receive multiple notices if they have already authorized a disposition and it just hasn't been processed yet. (The delay could be because the item can't be located, or there is a backlog of disposals to be pulled and processed, or in the case of a firearm, the Gun Desk processed could take several months to complete.) The notice is sent to the investigator assigned in EvidenceOnQ, generally on the first of the month. If the EvidenceOnQ field for Investigator Assigned is blank, the investigator assigned in CRMS will be added to EvidenceOnQ. Each email has basic instructions at the beginning on how to enter a request. The email will include a table of records. Each record will include the Incident Number, Barcode Number, CRMS Status, Item Type and Description. The Barcode Number and CRMS Status are direct links into EvidenceOnQ, to the specific record indicated. Originally the email Incident Number was also a direct link into EvidenceOnQ but too many investigators were doing requests on all barcodes within the incident and not checking each barcode. That resulted in numerous requests on the same barcode. It also resulted in requests for dispositions on barcodes that have already been released. Investigators still have the ability to process requests by incident numbers, but the email will not provide them quick and easy access with a direct link to the EOQ record.

A report will be generated each month reflecting the names of the investigators and the number of barcodes which have been sent out in an email three months in a row with no response. This report will be forwarded to each command.

As detectives retire or leave the Department, their ID number in EvidenceOnQ will have an "A" suffix. Their active impounds will need to be assigned to another detective, as directed by the unit's supervisor.

If there is not a detective assigned to an incident, the automated e-mail disposition notice is sent to the "Recovered By" Officer. These emails are generally sent on the 15th of each month. When officers retire or leave the Department, any impounds in which they were the recovering officer, if a detective is not assigned, a detective will need to be entered in EvidenceOnQ, or the automated email notice will not be sent.

EvidenceOnQ CLONING

The "cloning" function was designed to use when entering the same item type multiple times, for example, 15 swabs but from different people. When cloning, the ENTIRE record is copied. This INCLUDES THE RETENTION CODE. This could present a problem if the retention code for the item being cloned is different than the new entry. SART kits were entered from property tags years ago. If the SART kit has been authorized for disposal and the retention code is DISPOSAL, if the SART is cloned for additional evidence now being entered, that DISPOSAL retention will carry over to the new items. Firearms have a specific retention code, cloning anything firearm related could present problems. Don't clone, unless it is the same item type, all being entered at the same time. By selecting "NEW" the majority of

the impound information will be pre-filled in the entry screen. If the information is incorrect, type over it.

EvidenceOnQ FUNCTION KEYS

- F3 = Today's date will be inserted
- F2 = Clears the date field
- F5 = Displays a calendar

Headquarters:

OFFICE-

- All firearms (Gun Rooms)
- All cash/valuable jewelry (stored in the safes)
- Evidence stored in envelopes
- Evidence stored in large bags
- Evidence that needs to be in temperature controlled environment (SARTS)
- Latent Print Cards
- Property Room Records (Dead Tags, Purged Tags, Pink Tags, DCR's)

WAREHOUSE-

- Property Room Records (Transfer Logs, Old Gun Desk Records)
- Prisoner bulk (backpacks and small loads)
- Bicycles
- Evidence for all types of incidents/crimes, all types of storage containers
- Auction Cage (Items pending auction, items pending conversion, electronic recycling, contraband pending destruction)

Caged area around freezers/refrigerators on P1:

• Evidence that would not likely be damaged by vermin

Old Supply Room/Interior Room & Exterior Caged Area – First Floor:

- Trash can storage of large prisoner bulk loads
- Carts, strollers, wheelchairs, bicycles or similar items part of prisoner bulk loads

Long Term Storage Bldg #1 (Traffic):

- Homicide Evidence (majority)
- Bicycles (evidence)
- Large Loads
- Large Items Gambling Machines, ATM Machines, Safes, etc.

Long Term Storage Bldg. #2 (Traffic):

- Homicide Evidence
- Bicycles (evidence)
- Sex Crimes Evidence
- Child Abuse Evidence

Traffic Lot – Cargo Container Between Two Metal Buildings

- Large vehicle parts (bumpers, windshields, etc. needed as evidence)
- Engine operated equipment (fuel removed)

Area Station - CENTRAL:

- Daily impounds pending transport
- Overflow evidence from HQ
- Envelope binned items (property tag impounds, being entered into EOQ gradually)

Area Station – CENTRAL (Garage Caged Area)

- Large prisoner bulk loads in trash cans (overflow from HQ)
- Large items: Gambling Machines, Safes, etc.

Area Station – MID-CITY:

- Daily impounds pending transport
- Overflow evidence from HQ

• Lab copies of CD's

Area Station – WESTERN:

- Daily impounds pending transport
- Overflow evidence from HQ

Area Station – EASTERN:

- Daily impounds pending transport
- Large loads wrapped on pallets
- INTERIOR SARTS temperature controlled requirement

Area Station – NORTHERN:

- Daily impounds pending transport
- Overflow evidence from HQ

Area Station – NORTHEASTERN:

- Daily impounds pending transport
- Overflow evidence from HQ (primarily medium boxes)

Area Station – NORTHWESTERN:

- Daily impounds pending transport
- Overflow evidence from HQ

Area Station – SOUTHERN:

- Daily impounds pending transport
- Overflow evidence from HQ

Area Station – SOUTHEASTERN:

- Daily impounds pending transport
- Property Tag Sex Crimes
- Overflow evidence from HQ

Jerome's Warehouse:

- Large prisoner bulk loads including trash cans
- Empty trash cans
- Shelving

Ruffin Road Warehouse:

- Short term evidence (1–7 years retention)
- Temperature controlled SART kits (99 years)
- Temperature controlled DNA
- Records (Property Tag pinks and dead files, misc. records)
- Latent Prints
- Property Tag impounds pending EOQ entry and barcoding
- Bulk supplies (boxes, bags, barcode labels)

FIREARMS

See the Gun Desk Operations Manual for all firearms processing information.

Firearms Turned In at Front Counter for Destruction:

If a member of the public turns in a firearm at the front counter and requests that it be destroyed, it will not be eligible for conversion. If destruction is not requested, it will be eligible for conversion. Front counter officers are encouraged to specifically ask the citizen their desire for the firearm.

Firearms - Gun Room Access:

A limited number of designated specialists have access to the gun storage locations, in addition to the two Gun Desk PISO's, two supervisors and the manager. ONLY specialists with Gun Room access cards are to enter the gun storage locations, either for binning or pulling firearms.

If someone comes to the counter to pick up a firearm, the specialist will turn the transaction over to the Gun Desk PISO, or if they are not available, one of the supervisors. Only specialists with gun storage location access will be processing firearm releases, and that is only when a Gun Desk PISO is not available, and they are asked by a supervisor to process the release.

The goal is to limit the number of staff members entering the area in which firearms are stored.

FOUND PROPERTY

Civil Code 2080 and sub-sections covers found property.

Civil Code 2080.1 – If the value of found property is \$100 or more, it is to be turned over to law enforcement. Law enforcement is to notify the owner, if their identity is reasonable ascertainable.

Civil Code 2080.2 Found property must be available for the owner to claim for 90 days after received by the law enforcement agency.

Civil Code 2080.3 (a) If the value of the found property is \$250.0 or more and no owner claims the property within 90 days, the law enforcement agency is to cause notice of the property to be published at least once in a newspaper of general circulation. If after seven days following the first publication of the notice, no owner appears and proves his or her ownership of the property and the person who found or saved the property pays the cost of the publication, the title shall vest in the person who found or saved the property unless the property was found in the course of employment by an employee of any public agency, in which case the property shall be sold at public auction. Title of the property shall not vest in the person who found or saved the property or in the successful bidder at the auction unless the cost of the publication is first paid to the City.

Civil Code 2080.3 (b) If the reported value of the property is less than \$250.00 and no owner appears and proves his or her ownership of the property within 90 days, the title shall vest in the person who found or saved the property, unless the property was found in the course of employment by an employee of any public agency, in which case the property shall be sold at public auction.

HAZARDOUS MATERIALS:

Storage:

DP 8.19 governs hazardous materials storage at police facilities.

The Facility Coordinator for the Property Unit is the Senior Property & Evidence Supervisor.

Inspections of the hazardous materials storage area are completed on a weekly basis, with the completed document scanned to the Property Unit Supervisor's files and a copy scanned and e-mailed to the Facilities Division Supervisor.

Inspections:

Weekly Hazardous Materials/Waste Inspections are required to be completed, documented and a copy forwarded to the Facilities Unit.

The inspection includes but is not limited to reviewing the containers storing the materials, the labels on the containers, if the containers are open or closed, and the start date for the items in the container.

<u>HOLDS</u>

REQUESTS:

If a detective wants property or evidence held, they will be directed to make a request through the EvidenceOnQ request monitor. The request must include the reason for the hold and the new retention date for the hold. This electronic request will be included in the audit trail, so that the record will reflect who made the hold request and the reason and date requested.

If the Firearms Unit of the Crime Lab indicates that a firearm has been identified as one matching one used in a homicide, the retention code in EvidenceOnQ must be changed to reflect "homicide retention". The hold box will be checked and an entry made that the gun may be related to homicide case # _____. The Crime Lab must also be directed to make the request through EOQ request monitor and indicate the reason and new retention date for the hold.

HOLDS ENTRY:

To enter a HOLD, click on the RETENTION tab. Click on the box immediately in front of the Hold entry. This will place a check mark in the box. In the Hold Comment field, if a request was not made through the monitor, enter the name of the person who requested the hold. Always enter the reason for the hold. In the Critical Dates/Review field, enter the date for the hold to expire. After this date, an

automated disposition notice email will be generated. Click on the SAVE button in the tool bar. (Do NOT remove the check box from the hold indicator)

INCIDENT NUMBERS:

INCIDENT NUMBERS WITH 11 CHARACTERS:

SDPD, City Schools, and the Community College use SDPD incident numbers, which are the YEAR, the MONTH, follow by 2 zeros and the 5 digit incident number. Example: 12040012345.

Harbor Police use the HP prefix followed by MONTH, DAY, YEAR, and the 3 digit Harbor Police incident number. Example: HP010100200.

INCIDENT NUMBERS WITH 12 CHARACTERS:

Narcotics Teams use, when appropriate, the CB prefix followed by MONTH, DAY, YEAR, and the officer's four digit id number. Example: CB0404125525.

INSPECTIONS:

Inspections deal with safety, cleanliness, functionality, and efficiency related to the Property Unit facilities.

See MANAGEMENT REPORTS for Inspections.

INVENTORY:

An inventory is an accounting of all items of evidence/property in the custody of the Property Unit.

The impounds entered into EvidenceOnQ will be inventoried on a regular schedule, subject to modification, with the agreement of the management staff. The MobileOnQ device is used to scan all bar-coded items in a particular bin location. After scanning the items present, EOQ will indicate which items are present and should be, items supposed to be present and are not and which items are present but shouldn't be, according to the current location field in EOQ.

INVENTORY REPORT RECONCILIATION:

The staff member conducting the inventory is responsible for reconciling the report. If items are inventoried in a bin that should not be, according to EvidenceOnQ, the specialist is to relocate the item to the correct location, according to EvidenceOnQ. If items are not present, the specialist is to review the report to determine if the item is located in a different bin, that has also been inventoried. If the item is not included anywhere on that inventory report, the specialist is to check similar bin locations. For example, if the item shows as being in bin AA-20, the specialist

should also check bin A-20, AA-21, AA-19, etc. Visually scanning the barcode numbers on other impounds in similar packaging may also assist in locating a missing item. Review the audit trail in EvidenceOnQ for previous bin locations or other information that could assist in locating the item. If unable to locate the impound, request the assistance of a supervisor. If all searches are unsuccessful, the item will be updated in the PRNIB (property not in bin) field to reflect "yes". With additional inventories, hopefully the item will be located. Staff will continue to work the PRNIB evidence, to attempt to find missing items.

If after extensive searching, a supervisor determined that the evidence is unable to be located, the evidence will be transferred to the "UTL Impound" location.

SUPERVISOR'S INVENTORY COVER SHEET:

Once the staff member has completed the inventory and reconciled the report, it is to be turned over to their direct supervisor. The supervisor is to review the report, the reconciliation, and complete an Inventory Cover Sheet and attach it to the top of the inventory report, prior to filing it.

MONTH	LOCATION AT HQ	OTHER FACILITIES
January	CD's / Gun Room (Front and	Eastern
	Cage-handguns)	
February	Supply Room	Northern
March	Bicycles	Southeastern
April	Safes	Mid-City
May	Envelopes	Western
June	Gun Rooms (2) and Cage	Northwestern
July	Refrigerator	Southern
August	Freezer	Central
September	Single Letters	Northeastern
October	Double Letters	Jerome's Warehouse
November	Other Locations (SWR, NWR,	Aero Drive – LT 1
	WR, etc.) / Safes / Homicide	
December	Prisoner Bulk/Gun Room (Back	Aero Drive – LT 2
	and Cage-long guns)	Traffic – Large
	Outside Cages	Vehicle Item Cage

If an inventory is not completed by the 15th of the following month, due to lack of staff/time, that inventory will cease, and the next time that inventory is conducted, the start area will be where the last inventory left off. The status of an inventory is updated in the Inventory file, folder Inventory Assignments, the year and Inventory Assignment Log.

The inventory records will be filed by location and then by date within each location. The records will be retained indefinitely.

See **MANAGEMENT REPORTS** for various inventories.

ALTERNATE INVENTORY: When transferring evidence from one facility to another, this serves as an alternate method of inventory. As a shelf is cleared of all evidence and transferred to a different bin location, the shelf (bin) location is queried in EvidenceOnQ. EvidenceOnQ should show no barcodes in that location. If any barcodes remain, they need to be researched. It could be that one item on an incident was missed in the scanning process at the new bin location. It could be that the item showed binned in that location in error. It could be that all other items on the incident reflect destroyed, and one item was just missed in the disposal scanning process. If the item is not located or reconciled in some manner, the item is updated as a PRNIB (Property Room – Not in Bin) and will be searched for and thoroughly researched.

KEY CONTROL:

The Senior Property & Evidence Supervisor, the two Property & Evidence Supervisors and designated Property & Evidence Specialists have keys to the headquarters Property Room. Due to the weekend shifts and the numerous overtime projects, more keys than usual have been assigned. No one outside of the Property Unit, including up the chain of command is to have key access to the Property Room. In the case of an emergency, there is a key with the Watch Commander. The Watch Commander is to notify the Senior Property & Evidence Supervisor if this key is ever used. No copies are to be made of the Property Unit keys. A written authorization form, signed by the Captain over Operational Support, includes the names of the staff that have authority to order additional keys for the Property Unit. A copy of this document is forwarded to the supervisor over the Key Shop when supervisory staff changes.

Specialists that use the various keys for vehicles or locations within the Property Unit are required to return the key to the proper location on the key board at the conclusion of their duties. If they realize they have taken the key home with them, they are to immediately notify a Property Unit Supervisor and return it on their next work day.

If a key cannot be located, after an extensive search, a supervisor must be notified.

See the SECURITY section for the employees that have key access to specific locations.

LAB TRAINING ITEMS:

The Crime Lab may check out evidence that has been authorized for disposition (destruction) but hasn't been destroyed yet, for training purposes.

This evidence will be transferred to location "Retained in Lab" in EOQ and Crime Lab personnel will be entered as the Assigned Detective in EvidenceOnQ. Once the Crime Lab is done using the evidence for training, the designated Lab personnel is responsible for returning the item(s) to the Property Room and for entering the disposition authorization request through EOQ.

These items will be considered 'destroyed' once they are transferred to the Lab. They will <u>NOT</u> be eligible for release to owners/victims. If a victim or owner contacts the Property Room on one of these items, they are to be informed that the item has been destroyed. Do NOT inform them that the item is here in the Lab.

LABELING PROCEDURES:

Property that has been impounded is to be placed in an appropriate storage package. It is the Property Specialist's responsibility to locate storage space for each item. The evidence listed on the impound entry is to be verified thoroughly before packaging and storage. The Specialist is required to scan "processed by" to indicate who has verified and packaged each item. The only exception is the evidence impounded by the lab. This evidence is not verified, packaged, or sealed by Property Unit staff. Documenting that this evidence is sealed is also not required. Each entry is to have a separate barcode label that is to be placed on the individual packaging for that item or a wire tag (no exceptions). Barcodes are not to be placed directly on any property. The container is to be labeled through EvidenceOnQ, with the incident number and item numbers included. The Specialist is required to indicate in the comments section what type of package the property is stored in (i.e., large bag, box, large envelope, etc.). For a package containing multiple items, the Specialist will indicate what package type along with which item numbers are inside of the package, in the comments section (i.e., items 1-5 stored in a large bag). This will be done for each entry to which the information pertains. An orange colored label will be affixed to the package label on all PC187-homicide cases. A blue colored label will be affixed to the package label on all sex crimes, child abuse, OIS and domestic violence incident impounds. The colored labels are indicators that the impound may be held long term. This assists the Property Specialists in determining which boxes may be logical to relocate off-site for long term storage.

All items put away are to be clearly marked. Any discrepancies are to be noted by the Property Specialist in the comments section and the appropriate division must be notified.

LOCATION OF EVIDENCE:

Evidence may be stored at any one of the Property Unit's storage facilities (Aero Drive, Jerome's, Area Stations, etc.)

Officers should give the Property Unit 24 hour notice prior to check-out to ensure that their evidence is at Headquarters. (DP 3.02)

Certain types of evidence are stored in a designated location. For example, prisoner bulk backpacks, prisoner bulk large loads, skate boards, scooters, small envelopes, large envelopes, CD's, bags, homicide evidence, sex crimes evidence, etc.

See FACILITIES section for additional information.

LONG TERM STORAGE INDICATORS:

Evidence will be marked on the white label on the exterior of the package, whether it be the barcode label or the incident number label, with a colored indicator if the evidence is related to the following charges:

ORANGE/RED = Homicides (187's only, not 664/187 which is attempted homicide)

BLUE = Sex Crimes, OIS (Officer Involved Shooting), Child Abuse, Domestic Violence

There are colored dot stickers, which can be affixed to the label, or a large permanent marker may be used to place a filled in circle, in lieu of the sticker.

The purpose of this marking is to indicate which items are logical to relocate to a storage facility outside of the headquarters warehouse. This evidence will likely be held a minimum of ten years.

Not only will boxes and bags be labeled with this indicator, but CD's, envelopes, and all packaging containers.

LOST PROPERTY CALLS

If property is lost and the value is between \$500.00 and \$5,000.00 OR less than \$500.00 but has a known serial number, identification number or name affixed to the property, an online report can be completed: www.sandiego.gov/police Click on the "Citizens Online Police Reporting System"

MANAGEMENT REPORTS (Audits, Inventories and Inspections):

The following Management Reports will be forwarded from the Senior Supervisor to the Captain over Operational Support with a copy to the Assistant Chief over Neighborhood Policing. This is at the direction of the Chief. [POST and IAPE recommend that this report go directly to the Chief of Police. Our Chief has delegated the review of these reports to the Assistant Chief over Neighborhood Policing.]

An electronic version of the report will be saved in the Property Unit shared files, under the Supervisor's Folder/Management Reports. These reports will be retained for five years.

In addition to the minimum reports as indicated, random reports may also be generated.

Quarterly reports will be prepared in a reasonable period of time following July 1st, October 1st, January 1st, April 1st

AUDITS:

Audits focus on the systems in place to locate, track, and account for items of evidence/property in the custody of the Property Unit. Policies, procedures and processes of the unit will be reviewed to determine whether or not they meet the recognized standards, best practices, and are in compliance with applicable statutes and codes.

The Management Team will prepare a Quarterly Audit Report that includes review of the following:

• Quality Assurance of EvidenceOnQ Impounds

The audit will include randomly selected barcodes/incidents to include one from each of the following record history for firearms, currency, biological evidence, and other impounds:

- 1) From impound to disposition
- 2) From storage bin back to impound
- 3) From disposition location back to impound
- 4) From release back to impound
- 5) Check-out to Court back to impound
- 6) Check-out to Lab/Other back to impound

See the Quality Assurance – Manager's Audit form for details The mandatory fields in EOQ are not being documented in this audit. The mandatory fields include: Charges, Incident Date, Station Impounded, Recovered By, Recovery Date, at, Recovery Address, Category and Item Type.

• Supervisor Audit

Verification of Supervisor Quality Assurance Reviews of Staff Verification of Supervisor's Staff Inspections Performance Evaluations Staff Check-outs Pending

• **Customer Service Audit** Work schedules of staff Public Hours – Days and Hours Internal Service Hours at HQ Internal Service Hours at Area Stations

• Health & Safety Audit

Haz Mat Weekly Inspections verification Evacuation Plan Safety items provided to staff (boots, eye protection) Review of safety practices with staff Needles/Sharps Safety Firearms Safety

• Training Audit

Facilities/Storage Audit

Property & Evidence Storage Facilities Square footage of each facility Amount of space open at each facility (approximate) Assess needs for temporary storage, long term storage, general storage, firearms and currency/valuables, etc. Standard container sizes

The Management Team will include in the JULY REPORT each year:

• Operations Audit

Operations Manual Reviews (Property Unit & Gun Desk) (due to RAP in August) Procedures Review Department Training (Officers, FTO's, Detectives) Training Confirmations Review Department Policies & Procedures relating to the Property Unit Review Forms Review

INVENTORIES:

An inventory is an accounting of all items of evidence/property in the custody of the Property Unit.

See the INVENTORY Section for details on conducting monthly inventories. Instructions for using the MobileOnQ units to conduct inventories is available in the Property Unit Procedures.

Over the course of one year, it is anticipated that every area will be inventoried, with the firearm storage locations and the safes being inventoried twice per year. Random inventories may also be conducted.

In the event that an area is not completely inventoried within the month designated, the next time the area is scheduled for inventory, the start location will be where the last inventory left off.

When conducting inventories, seals should remain unopened. If a seal has been broken, the contents must be verified and documented in the EvidenceOnQ NotesLog. The replacement seal must be initialed, dated and witnessed.

When an inventory of an area is completed, and attempts to fully reconcile have not been successful, any items unaccounted for are considered misplaced and should be immediately brought to management's attention. Clear documentation will be included with the inventory report to explain the discrepancy and the attempts made to reconcile. The EvidenceONQ impound record must be updated in the PRNIB field to reflect "yes" [property not in bin]. Continued effort will be made to locate the item. If at some point a supervisor determines that an exhaustive search has been completed and the item still can't be located, the impound will be transferred to the "UTL – Impound" location in EvidenceOnQ. Depending of the type of item, and its value, both evidentiary and monetary, and the situation, the supervisor/manager may initiate an internal investigation.

Once an inventory area is complete, the report and reconciliations are to be turned over to the staff member's supervisor. The supervisor is responsible for preparing the Inventory Cover Sheet. This document will be attached to the front of the inventory report and reconciliations, prior to filing.

The Supervisors will routinely query the PRNIB lists and assign staff to attempt to locate these items.

In the event that items are found on the shelf without a barcode or incident number attached, the items must be researched to connect them to a case. If, after all practical research has been exhausted, the items still cannot be connected to a case, they must be impounded in EvidenceOnQ as "FOUND PROPERTY". The COMMENTS section must have an entry "PROPERTY ROOM-FOUND". The impound record must indicate the area or bin in which the item was found. All information that would be placed in a report, and may be helpful to match this item with the correct incident is to be added to the NotesLog section of the impound record. This impound will be held, at a minimum of one year, or at least until another full inventory of the Property Room has been completed. The item is not to be authorized for disposition without management authorization. Management may consider photographing the item and attaching the photograph to the impound record for future reference. IAPE and POST both suggested disposition of the item after the statutory period.

The EvidenceOnQ inventory report will be filed by location and date in the designated file cabinet. The entire report will not be forwarded to the Chief of Police. A summary sheet with the results of these inventories will be included in the Quarterly Inventory Report.

The Management Team will prepare a Quarterly Inventory Report that includes the following:

- A summary sheet of the areas inventoried for EOQ impounds.
- Number of impounds, broken down by the following categories:
 - 1) Firearms,
 - 2) Currency # and Currency Value,
 - 3) Biological Evidence,
 - 4) Bicycles,
 - 5) CD's,
 - 6) Prisoner Bulk,
 - 7) Found Property,
 - 8) Other Impounds, and
 - 9) Total Barcodes.
- Number of dispositions broken down by the same categories as indicated above.
- Number of releases, broken down by the same categories as indicated above.
- Number of pending barcodes to be pulled for disposition.
- Number of firearm dispositions approved by detectives, pending Gun Desk review.
- Number of firearms ready to pull for destruction.
- Number of property tags with dispositions, unable to locate impound
- Number of PRNIB's (Property Not in Bin) –EVIDENCE (no bin number in FOQ or unable to locate the item in the designated bin). Active impound.
- Number of PRNIB's (Property Not in Bin) DISPOSAL (no bin number in FOQ or unable to locate the item in the designated bin). Item(s) authorized for disposal.
- Impound totals (FOQ) for each of the identified categories.

• Impound totals stored at each location.

1) Headquarters would include the freezer, refrigerators, cages, old supply room, exterior supply room.

2) Jerome's

3) Long Term Storage Bldg. #1 (previously called "Off-Site") at Traffic Division

- 4) Long Term Storage Bldg. #2 at Traffic Division
- 5) Each of the nine area stations
- Number of <u>incidents</u> with a retention code that has expired over 90 days ago, detective has received three consecutive emails without taking any action
- Number of <u>barcodes</u> with a "PRO" (Prosecutor notification that the evidence may be eligible for disposition) retention code that are still active.

INSPECTIONS:

Inspections deal with safety, cleanliness, functionality, and efficiency related to the Property Room facilities.

The Management Team will prepare a Quarterly Inspection Report that includes review of the following areas:

- Cleanliness/Orderliness of Floors, Counters, Impound Tables, Supplies, etc.
- Specialist's binning with the proper size boxes
- Specialist's binning on the designated shelves, based on size of packaging
- Voicemail recording clear, current information and accurate
- Website information clear, current information and accurate
- Hours posted are correct
- Safety and Security
- Security cameras operating properly and recording
- Access to facilities working property (card access/alarm panel)
- Appropriate staff has access (anyone recently transferred out or retired deleted)
- Locks working properly
- Keys inventoried
- Panic button operational
- Impound lockers Inspect from Impound Room side
- Impound Lockers Inspect from Property Room side
- Refrigerator/Freezer Alarms (HQ only)
- Eye Wash Stations
- Equipment working properly Computers, label printers, scanners, ribbons
- Supplies well stocked: Barcode labels, ribbons for label printers, boxes for firearms, all box sizes, bag supply, envelope supply, glove supply

Unit Records

- Call-back phone roster current
- Evacuation roster current
- Chain of command roster current
- All employee lists are current

Vehicle Inspections

The report will indicate any repairs that are necessary and what action has been taken to facilitate those repairs.

MONEY

MONEY HANDLING

Whenever cash is being handled or counted, **two people should be present** (two Specialists or a Specialist and an Officer). This may not always be possible at an Area Station.

All money is received into the Property Room as a result of it being impounded through the EvidenceOnQ system. The impounding officer is to break the money down by denomination and enter this information in the corresponding money fields on the impound data entry screen. The total amount field must be completed. All money over \$500 must be impounded at the Headquarters Property Room. After hours, money over \$500 must be impounded at the Watch Commanders Office. No money impounds are to be left unattended at anytime. All money (over \$20.00) is to be sealed before storage. There is a temporary locked drop box available if one of the safe authorized employees is not available to receive the money.

Unsealing Money Envelopes: If a sealed money envelope needs to be opened, **two people are to be present** and the cash enclosed must be counted by both people and then the envelope re-sealed, dated, and initialed along with the ID# included.

Money is received in three ways:

A. Directly at the Headquarters Property Room:

After the officer completes the barcode process, the Property Specialist counts and verifies the money in their presence. Any problems or discrepancies should be resolved at this time. The officer packages the money with all of the bills facing the same way and seals the money envelope, it is marked and put into the safe by one of the employees with the safe combination. The Specialist scans "Received at HQ Counter" and "Processed by" to indicate that they have received and have verified this impound. The money is transferred to location "HQ Money Mailbox" and it is added to the cash log and placed in the old locked mailbox for security purposes. Only the Specialists with access to the safes can retrieve money from this locked mailbox.

B. At the Watch Commander's Office:

After hours, Saturdays, Sundays and holidays, all money over \$500 is impounded at the Watch Commander's Office. The officer must select "Watch Commander's Office" as the station impounded. This will allow the Specialist to run a query to find out if there are any impounds that haven't been received from the Watch Commander's office. The officer deposits the impound with the Watch Commander's Office which is witnessed by the Watch Commander or officer. The Specialist picking up this money counts it in the presence of the Sergeant or Watch Commander Officer. (This pick-up is done daily except on Saturdays, Sundays and holidays.) If a problem or discrepancy is found, the Sergeant or Watch Commander officer is notified. Before money is taken to the Headquarters Property Room, the money envelope in which the money has been impounded must reflect the discrepancy (over or under) and be initialed by both the Specialist and the Sergeant. At this point, all of the money impounds are taken to the Headquarters Property Room and put away, using the procedure outlined above. On those tags that have discrepancies, the impounding officer, the command, and a Property Unit Supervisor must be notified.

C. From the area stations after being transported by the area station Property Specialists:

This money is originally counted, verified and sealed by the area station specialist. Any problem or discrepancies are immediately dealt with at the area station by contacting the impounding officer or detective assigned. The money is brought to Headquarters, along with the rest of the property coming from the area stations. It is then given to one of the Headquarters' authorized safe personnel to be put away. No money impounds are to be left unattended at any time. If a person with the combination to the safe(s) is not available, the mail drop box and log designated for holding money impounds must be utilized.

Releasing Money:

Detectives wishing to release money must fill out a Property Release form (PD-184). Upon receipt of a valid Property Release form, the Property Specialist must verify and note the identification of the person receiving the money. No department personnel may authorize the release of money or any other property to themselves. The original property tag is then matched up with the release form and the money is pulled from the safe by one of the authorized safe persons. For EvidenceOnQ transactions the incident and item

numbers along with the bin location is given to the authorized safe personnel. If it is a total release, the seal is broken and the money is counted out to the person receiving the money. The release form or signature pad is then signed by the person listed on the release form, and attached to the original property tag or scanned and attached as a document to the entry. The completed paperwork then goes into the dead file. In the case of a partial release, only the amount of money that is going to be released is taken out of the envelope. The same release procedures are then followed. The Specialist notes in writing on the money envelope the amount of money that was released and the balance left. The Specialist must also note on the property tag or in the comments screen using the Fileroom Check-out feature that a partial release was made. The release form is then attached to the original property tag and for automated impounds, scanned and attached as a document to the entry. The envelope is then resealed and placed back into the safe, with the paperwork going back into the active file. For automated impounds the barcode is scanned back to original location. A copy of the signed release form goes to the party to whom it was released. It is required that if a release of money is made at an area station that the receipt and release be logged into the computer at Headquarters showing "RTO" as the bin location.

Lab Money Checkout Policy

Policy for Checking out Money to be processed (over \$20.00).

When a Lab Analyst is asked to examine or process money (for example, for latent prints or biological evidence), the following procedure applies:

- A. The authorization form will be prepared.
- B. Prior to signing the form, the work request will be verified by the Unit Supervisor, or in his/her absence, by the Lab Manager or acting Lab Manager.
- C. The signed form will be presented at the Property Unit service counter as the money is being signed out.
- D. The money will be promptly returned to the Property Unit as soon as the Examination/processing is completed.

Disposal (transfer) of Money to the General Fund:

Upon completion of cases in which the money is not going to be returned to an owner, detectives must authorize in writing or by using the request monitor, the disposal of impounded money to the Auditor/City's General Fund. By using the back of the yellow copy of the Property Tag Form or a disposal notice supplied by the Property Unit, detectives indicate their authorization. With the automated system the detective must use the request monitor to authorize the disposition. These disposals can be formatted into a query report that can be used later for pulling. Disposal notices are received on a daily basis at the Headquarters Property Unit. The disposal is attached to the white copy and reviewed by a Property Unit Supervisor. After reviewing the paperwork to make sure the tags match and that they are properly signed off, the supervisor initials the money tags and put them into a separate pile to be pulled for disposal.

One of the staff with access to the safe puts the property tags or barcodes for disposal in order and pulls the corresponding money envelopes out of the safes. These envelopes are then bagged or boxed and sealed and placed into another safe to await the money write-off. The bag or box is dated and initialed by the specialist who pulled the money. The money write-off is done by two people, generally one supervisor and one Property Specialist. The seal on the money envelopes is broken one at a time and the money is counted. The amount is verified by both people and then the amount is noted on the tag or entry.

The back of the yellow copy of the property tag is stamped "Auditor" and dated. The amount of money to be transferred is listed on the yellow form or white notice copy and the tag is initialed by the supervisor. For automated transactions each barcode will be scanned "Auditor".

After all of the tags/barcodes have been processed, one person counts all of the money to get a total. The other person obtains a total by adding the amounts listed on the front of the property tag or from the query report. After these totals are checked and matched, the money is placed into a box and sealed and stored in a safe to await transport to the bank. The property tags and barcode numbers are then put into numerical order, high to low, to be typed onto a DCR (Daily Cash Receipt) for transfer into the City's General Fund. After typing the list, tabulation must be done to verify the total amount on the DCR. The total amount on the DCR must match the cash for deposit amount. Two copies of the DCR are made and a deposit slip is completed. A third copy is put into the DCR money log temporarily.

The next step is taking the money to the bank. The money is transported to the bank in a city vehicle by a Property Specialist with a police escort. At the bank, the money is counted by one of the tellers in the presence of the Property Specialist. After the count is verified the deposit slip and a customer receipt form are given to the Property Specialist to return to the Headquarters Property Room. Copies of these along with the DCR are scanned and sent to Fiscal Management. These documents are then put into the DCR in the Property Room, replacing the temporary copy. The amount deposited is entered into another log for statistical purposes. These records are maintained in the Property Unit.

Mutilated Money

When mutilated money is discovered at the time of disposal to the General Fund, any good bills on the impound are deposited and the mutilated bills are forwarded to the Department of the Treasury. There are instructions from the Bank of America how to forward the bills to the Dept. of the Treasury and a sample letter to include with the bills. It can take approximately 6 months to receive replacement bills. When replacement funds are eventually received (check, not cash), the check(s) are deposited.

Foreign Currency

The bank we use will not take a deposit of foreign currency. There are local money exchange businesses that will convert most foreign currency. What we can get exchanged is deposited. As with all other cash transactions, two staff members will be present for all transactions. Two people take the currency to a money exchange business or another bank to get it converted.

Seizure of Money

When entering an impound record in EOQ for seized funds, the Asset Seizure box must be checked.

Occasionally, large amounts of money (over \$1,000) that are involved in narcotics cases are seized by the Narcotics Task Force from the Property Room. Only detectives from the San Diego Police Department that are assigned to N.T.F. are permitted to pick up seized money. The detective picking up the money must have a Property Release Form and DEA Form 12. The Property Release Form must be filled out by another detective, different from the detective picking up the money. The amount of money must be clearly indicated on the release form.

The detective picking up the money must present the proper paperwork at the Headquarters Property Room. Because the seizures usually involve large amounts of money, the detective may be escorted into the Property Room. Space and the money counter are provided to count the cash. After the sealed money is removed from the safe, the detective picking up the money counts it. As it is counted, the DEA Form 12 is completed listing the amount of each denomination. Upon verification of the money, the Property Specialist and the detective sign both the Property Release Form and DEA Form 12. The original Property Release Form and a copy of DEA Form 12 are attached to the white copy of the property tag and it is filed either in the dead or active, depending upon what remains on the tag. If the currency is a barcoded item that is on the EvidenceOnQ system, the signed copies of the property release form and DEA Form 12 are scanned and attached to the entry.

NARCOTIC PROCESSING

If narcotics are discovered among general impounded property, the following protocol will be followed:

- 1. The specialist will create a new barcode entry for the narcotics, prescription medication or used paraphernalia.
- 2. The specialist will make an entry in the Notes log for the original barcode and the newly generated barcode, that the narcotics were discovered, separated and given a new barcode.
- 3. The CATEGORY of the new barcode (narcotics) will be "OTHER".
- 4. The specialist will seal the narcotics in a narcotics envelope, place the new barcode on the envelope and deposit it into the narcotics mailbox.
- 5. The specialist will notify the impounding officer, via email, of the discrepancy. Specifically, that narcotics were found in an impound, they have been removed and impounded under a separate barcode as "OTHER" and transferred to the Narcotics Vault. A template for this email is available in the G drive/PROPERTY/PROCEDURES/PPED DUTIES/PROCESSING-BINNING/EMAIL TEMPLATE.
- 6. The specialist will send this email to their Property Unit Supervisor, the Impounding Officer, the Impounding Officer's Sergeant and the Narcotics Vault Supervisor.
- 7. The specialist will only send the initial email and all follow-up emails will be the responsibility of the Narcotics Vault. A copy of the initial sent email will be scanned and attached to the newly generated barcode record, by the Property Unit Specialist.

OFFICER CORRECTION LOCKER

Locker "A-5" by the staff lockers on floor P1 outside of the Impound Room is designated as the officer correction locker. Notify the officer that the impound that needs to be corrected and it will be in that locker with the combo set as the officer's ID number. Once the correction on the impound is made, **change the combo on the lock back to "0000"**. The instructions on how to change the combo lock is in the shared "G" file.

PAWN SHOP HEARINGS

Penal Code section 1413 (b) allows the manager of the property room in possession of stolen or embezzled property the power to determine who gets the property, but only after

- (1) satisfactory proof of ownership from the one claiming to own the property,
- (2) proof of proper personal identification,
- (3) making a photographic record of the item(s) by the property Unit specialist,
- (4) the person to whom the property is delivered must sign, under penalty of perjury, a declaration of ownership, which needs to be retained by the property room.

The person from whom custody of the property was taken is given:

(1) a notice of claim of ownership (with a copy of the owner's proof of ownership);

(2) 15 days from receipt of notice to respond, asserting a claim to the property; and

(3) a reasonable opportunity to be heard as to why the property should not be delivered to the person claiming ownership.

The Property Unit Manager's determination, however, is without prejudice to the parties' right to seek a review of the manager's decision before the judge before whom the criminal case was heard. (PC1413(b)&(c); Sanders v. City of San Diego, supra, at pp. 1431, 1434)

See DP 3.02 for Hearings: Release/Disposal of Pawned Property – Special Procedures.

See DP 3.22 Placing and Releasing Holds on Pawned Property.

PEST CONTROL

ANTS/COCKROACHES: Notify Facilities and a spraying will be arranged.

KNATS: No spraying is available for knats. A natural remedy is vinegar in a mason jar with holes punched in the top. There is also a poison bait that works in a similar manner. Knat strips may be hung in an area where there is a large volume of knats. Attempts should be made to locate the source of the knats and destroy the item(s) or if necessary, freeze the impound within a plastic bag to kill all living creatures.

RODENTS: All prisoner bulk impounds that are large, from homeless camps, or similar in volume and content are to be checked thoroughly for food items. They are to be placed in large plastic bags then contained within a 95 gallon trash can designed for storage purposes. Each trash can <u>MUST</u> close completely. If all of the

items can't fit within one can and close completely, items must be placed in additional can(s). If the impound has chairs, carts or other larger items, these items are to be stored separately, not within the trash can(s). The trash cans are designed to hold a large volume and protect the items from rodent access.

Rodents are drawn to the sally port area, due to the dumpster location. The exterior of the Supply Room will no longer be used to store evidence. Only prisoner bulk, secured in trash cans will be stored in this area.

It is imperative that officers check closely for food items prior to impounding these loads. See DP 3.02.

PRESERVATION OF EVIDENCE REQUESTS

When a Preservation of Evidence letter is received, a hold needs to be placed on all related evidence. The record needs to be clearly documented that a Preservation of Evidence letter was received.

Scan and attach a copy of the letter to the EvidenceOnQ impound record. There is a document type, "Preservation of Evidence Request". Make an entry in the Comments/Notes Log, with the header subject, "Preservation of Evidence". Enter a hold for all items of evidence and indicate the reason as "Preservation of Evidence letter."

PRNIB DISPOSALS – SUPERVISOR REVIEW

PRNIB = Property not in bin. If items have been authorized for disposition but they can't be located, after a thorough search, the PRNIB field will be updated with "yes". A supervisor or designated lead will search the entire EOQ record to see if there have been any record changes, documentation or errors that would assist in determining the location of the property.

- a) Search the audit trail for edits/record changes. Specifically watch for incident number and or item number modifications or property description modifications.
- b) Search the audit trail for past relocation transactions. Specifically other bin locations, manual transfer errors, releases, destruction.
- c) Search the documents attached for release or destruction transactions, property release forms, and property tag records.
- d) Search the bin locations that are similar, for example A-12 and AA-12.
- e) Review previous inventories of the bin location.

If after all of this research, the item is not located, the supervisor will:

a) Transfer the item to location "UTL - Impound"

- b) Change the retention code to "CE" to cease all future disposition review emails to the detective assigned.
- c) Remove the disposal authorization entry from the Request Monitor.
- d) Enter a complete update in the Comments/NoteLog for example– This property has not been located during the disposal pulling process, an extensive search has been made of the adjacent bins as well as similarly marked locations (state the locations). A secondary review of the audit trails, documents and records have been made to determine if there is any valid explanation for this property not to be present in the bin location indicated in EOQ. This record is transferred to UTL– Impound.

An inventory of the area location must be completed before any further action occurs. If the property is not found, the following will occur:

- a) The search will be thoroughly documented in the Comments/NotesLog.
- b) The documentation will include, "After an extensive physical search, record review of the property and inventory of the area location, it has been determined that this property has been destroyed."
- c) The item will be transferred to the location "DESTROYED".

PROPERTY RELEASE FORM (PD-184)

In order for a Property Release Form to be valid, it must have the signature or hand written name of the officer authorizing the release. If the name is typed in this field, the officer must sign or initial next to their typed name.

If the form is not signed or initialed and the impound is prisoner bulk, a supervisor may initial and approve the Property Release Form for processing.

Even if a detective enters a release authorization in the EvidenceOnQ system, **a printed PRF is required** to be mailed or given to the owner. When the detective enters code #2, it indicates, "Release SENT/GIVEN" If the owner does not come in and retrieve their property, that document is required in order to dispose of the item(s) not claimed. That is the verification of the date given by which to retrieve the items and verification that the individual was given notice that if the item(s) were not claimed by the required date, they would be destroyed. If the owner of the property is present, the detective's release authorization entry in EvidenceOnQ is sufficient.

RELEASE TO OTHER AGENCY

If a Deputy City Attorney wishes to pick up evidence for a civil trial, the assigned detective may enter a REQUEST to RELEASE to OTHER AGENCY. The specific name of the person picking up the evidence must be included in the release, along with their name, agency, phone number and address.
When processing the release to other agency, select the reason "COURT" and print a receipt. Provide the receipt along with the items so that if the evidence remains in the custody of the court, the receipt can be signed and returned to the Property Room.

Impounds entered in EvidenceOnQ and not paper property tags should have the Property Release form prepared through EvidenceOnQ. The EvidenceOnQ release includes the barcode for each item. It will eliminate the possibility of an error attempting to authorize a partial release on a barcode. It also provides a description of the item associated with each barcode.

Partial releases must not be processed on a single barcode. EvidenceOnQ requires that everything impounded under one barcode number go in one direction or location. Everything on one barcode must be released together or the investigator must check-out the evidence, separate out the items the Property Room is to retain, and the items they intend to release and barcode them separately. At that point, the release can be prepared on the appropriate barcode.

When a Property Release Form (PD-184) is received, the date the release expires is written in the upper right corner. (Evidence = 30 days, Prisoner Bulk = 90 days). The location of the property is written in the upper left corner. The original form is filed in the Property Release – Pending file by the public counter. The forms are separated by alpha dividers and then filed by expiration date within each alpha section. A copy of the form is attached to the original property tag. If the record is in EvidenceOnQ, the form will be scanned to the record at the end of the process. Either way, the Property Release Form provided to the owner, MUST be part of our permanent record.

A Property Release Form is required from the investigator, even if the citizen has a Court Order to Release Property.

If a member of the public comes in with a copy of the Property Release Form, the original will be pulled, signed by the person obtaining the property (with proper identification) and the items indicated will be released. The original release form will be attached to the original property tag. If all items are released, the property tag will go to the dead files. If only a portion of the impounded items are released, the tag will be re-filed in the active files.

If the impound was done through EvidenceOnQ, the person obtaining the property will sign the signature pad, which places the electronic signature in the EOQ record. The Property Release Form MUST still be scanned into EvidenceOnQ. This is the only way the actual PRF form will become part of the permanent record.

If the Property Release was issued for prisoner bulk property/safekeeping, and the owner of the property is currently in jail, they can make a request IN WRITING for an extension. Civil Code 2080.10 requires the Department to hold the property for

no longer than ten additional months, which would be a total of twelve months from the original impound date.

When the Property Release form expires, if the property has not been retrieved by the owner, it will be processed for disposal. The Property Release form must be scanned into EvidenceOnQ or attached to the paper property tag.

PROPERTY RELEASE FORM - UNABLE TO APPEAR TO CLAIM PROPERTY

If an individual receives a Property Release Form and they are in custody and unable to retrieve their item(s), they may have a family member or friend pick up their property IF

 they get a notary and have a release authorization notarized in the jail or
they obtain a San Diego County Jail stationery form and write out a release authorization. The document must include:

- The owner's name
- The name of the person to whom the property will be released
- A brief description of the item (bike, backpack, etc.)
- Signature of a Deputy

PROPERTY RELEASE FORMS – AFTER EXPIRATION

If an individual comes to the counter with a Property Release Form that has expired, if the item(s) are still in a bin and available, they may be released.

CASH – If the item is cash and has already been transferred to the City Auditor, it is no longer available for return. If there are extenuating circumstances, a manager can override the "disposal" (transfer to City Auditor).

PENDING AUCTION – If the item is still in the auction cage, effort will be made to get the item recovered and to the owner. If the item(s) have already been sent to an auction company, a manager can override the "disposal" and attempt to get the item returned. Unfortunately, not all items associated to the impound may have been placed in the auction case, for example an i-phone with ear buds or a charging cord. The ear buds may no longer be retrievable.

ITEMS DESTROYED – If the item has been transferred to the DESTROYED location, it will no longer be available for return. Many items are damaged or smashed during the disposal process.

FIREARM DESTROYED – If an owner contacts us about a firearm, if it has already been pulled from the bin location , it is no longer available for release. When the guns are being pulled, it is possible that parts have been removed, either for the

conversion process or for packaging for the destruction transport. Sliding guns into seabags, may cause damage to the firearm. It will not be available for return, once it is pulled from the bin.

DEPARTMENT ERROR – If a detective or someone within the Department informs us that an error was made and the item should be returned to the owner, all efforts will be made to get the item recovered and to the owner.

PROPERTY TAGS & LOGS:

Property Tags and Property Tag Logs are no longer used as new impounds are now entered into EvidenceOnQ, an automated system.

The Property Tag system consisted of NCR packets, the original tag (white) is the Property Unit working record. The originals remain in the Active Files until the impounded items are returned to the owner or a disposition is processed. At that time, the originals are moved to the dead files. The dead files are retained at least 10 years and then purged, with the exception of certain violation types. The pink copy is the Property Unit numerical file copy, which is retained permanently. The yellow copy is the Detective's copy. This copy is to be used to document an authorization for disposition, which is forwarded to the Property Unit.

Impound Logs will be maintained for reference. Log sheets and pink copies should be retained indefinitely but no less than seven (7) years.

PUBLIC COUNTER

When the door opens to the public waiting room there is a beeping sound. Staff assisting that area are to indicate "INCOMING" in a loud voice when a new customer arrives and needs assistance. When a customer is exiting the room, staff are to indicate "OUTBOUND" so that other staff members know that it is someone leaving and not a new customer entering and needing assistance.

The security room is to be used for transferring boxes, bags or large items to a customer. Basically, anything that will not fit in the transfer box will be released through the security room. Items are to be placed in the security room, which the customer waits outside the room. Once staff has exited the security room and our door into the security room is secured, the customer may enter the security room and retrieve their items. This will limit direct contact between staff and customers. It will also prevent direct access into the Property Room by the public.

Customers are not to go through their bags of returned items in the security room or in our waiting room. They are to be politely advised to take the items upstairs to go through them. The counter officer will only allow access to the waiting room to a few customers at a time.

PURGE CRITERIA FOR DEAD FILES:

The original property tags in the dead files are retained for 7 years, with the exception of specific violations, as indicated below, which are held for longer:

These violations are to be held for 20 years:

PC215 Car Jacking PC207 Kidnapping PC211 Robbery OIS – Officer involved shooting Special Investigations Death Investigations Lab Impounds Currency Impounds (any impounds stored in the SAFE)

These violations are to be held for 99 years: PC187 Homicide PC261, PC288, PC289, PC311.11 Sex Crimes

If the violation is not reflected on the tag, try to determine the type of incident by the detective assigned or other comments on the tag. In an abundance of caution, it would be better to hold it than destroy it.

QUALITY ASSURANCE:

If evidence or property is damaged while impounded in the Property Room, thorough documentation and notification is required.

- a. The EvidenceOnQ impound record for each barcode will be updated to include the date of the damage, description of the damage and what caused the damage. If the item requires repackaging, the details of that process will be clearly documented in EvidenceOnQ. The original packaging will be retained as part of that impound, whenever possible.
- b. The chain of command within the Property Unit will be notified.
- c. The detective assigned to the case will be provided written notification (e-mail) with the incident number and barcode numbers that were damaged. The detective will be responsible for updating their file and any other records that may be involved in the discovery process, should the matter go to trial.
- d. Any evidence previously reviewed or processed by the Lab requires written notification (e-mail) to the Quality Assurance Manager.

QUALITY CONTROL QUARTERLY INSPECTIONS:

The supervisors will conduct written quality control inspections, on a designated number of random impounds, on a quarterly basis. This documentation is used to assist in the performance evaluation process. The inspection includes review of bulk impounds, evidence impounds, check outs and releases. There are additional areas of focus depending on where the specialist was assigned that quarter and what special assignments may have been completed.

QUARTERLY MANAGEMENT REPORTS – Operational Support

The manager prepares the Property Unit section of the Quarterly Management Report for the Operational Support Unit. This report includes various statistics including but not limited to:

- The number of new impounds for the quarter
- Comparison to the number of new impounds for the same quarter last fiscal year
- Year to date total of new impounds
- Comparison of the year to date new impounds for the same quarter last fiscal year
- The number of dispositions this quarter
- Comparison to the number of dispositions the same quarter last fiscal year
- The year to date total of dispositions
- The year to date total of dispositions last fiscal year
- The number of items released for the quarter
- Comparison to the number of items released for the same quarter last fiscal year
- Year to date total of items released
- Comparison of the year to date items released for the same quarter last fiscal year
- Value of write offs, internet sales and metal recycling for the quarter
- Comparison to the value of write offs, internet sales and metal recycling for the same quarter last fiscal year
- Year to date value of write offs, internet sales and metal recycling
- Comparison of the year to date value of write offs, internet sales and metal recycling for the same quarter last fiscal year
- Number of Property Tags entered into EvidenceOnQ this quarter
- Comparison to the number of property tags entered into EvidenceOnQ the same quarter last fiscal year
- Comparison of the year to date number of property tags entered as of this quarter this year compared to last fiscal year
- Number of firearms impounded this quarter

- Number of firearms impounded this quarter during the last fiscal year
- Comparison of the year to date number of firearms impound as of this quarter this year compared to last fiscal year
- Number of firearms released this quarter
- Number of firearms released this quarter during the last fiscal year
- Comparison of the year to date number of firearms released as of this quarter this year compared to last fiscal year
- Number of firearms destroyed this quarter
- Number of firearms destroyed this quarter during the last fiscal year
- Comparison of the year to date number of firearms destroyed as of this quarter this year compared to last fiscal year
- Current issues, projects, challenges, etc.
- Overtime hours per project
- Staffing

RECORDS

Any document that would have previously been attached to the paper property tag should now be scanned as a document into EvidenceOnQ. An example is the Receipt for Weapons or Currency form.

On FIREARM IMPOUNDS, if there are numerous barcodes on an incident to which the document is related, it will be attached to the first related impounded item.

For example, if there is a Receipt for Weapons or Currency form that was completed for numerous firearms, it may be scanned and attached only to the first impounded firearm.

It is best to make an entry in the NotesLog on all barcodes that relate to a specific document and indicate that it is only scanned and attached to the first item. For example, "Court order scanned and attached to item #1 only, but it applies to all items on this impound."

RECORD REQUESTS (EVIDENCEONQ)

The District Attorney's Office and City Attorney's Office may request impound reports available in EvidenceOnQ. If not requested in person, with valid identification, confirm the email address or FAX number is associated with one of those offices. If a defense attorney calls requesting reports, they need to go through the District Attorney or City Attorney's Office or subpoena the record.

If an attorney wants to subpoena a record or subpoena a specialist to testify, refer them to the Records Division (Subpoena Clerk). If they appear at the counter, refer them to the Broadway Front Counter and have them ask for admittance to the Records Division, to speak with the Subpoena Clerk. Property Report (#1): Reflects all of the impounds

Chain of Custody (#13): Reflects the chain of custody, one page minimum for each barcode.

RELEASE PROCEDURE

No department member is authorized to release property to themselves. Property may be released to the public only upon the presentation of a Property Release form (PD-184) signed or electronically authorized by a Police Officer/Detective or in extremely rare instances, a property unit supervisor. Gun releases must come from the Gun Desk. The claiming owner must bring the release form to the property unit in order to secure their property. **This must be done within 30 days after the release is issued**. Prisoner bulk property will be held for 90 days from the date of the release form. Both evidence and prisoner bulk property authorized for release to the owner, if it is not claimed, it can be disposed of as unclaimed.

Evidence authorized for release to another agency, if not claimed, will remain active until a disposition is authorized.

When releasing property, the property specialist should always check the "pending" file first to determine if a copy of the release or a yellow copy of the property tag is on file. If the yellow copy of the property tag is on file and the release form authorizes release of everything on the tag, then everything may be released with proper identification. The owner must sign for their property. This must be captured on the release form or the Fileroom check-out feature used to release property. The property specialist releasing it will then initial and date the property release form. It is the property specialist's responsibility to check identification on all releases. Identification information must be marked on the property release form. In certain cases, a booking photo can be utilized for identification. If it is a complete release, the yellow copy of the property tag and the signed property release form shall be stapled to the white copy of the property tag and the two shall be filed in the "dead file". If it is not a complete release, the signed release form and the white original property tag will be re-filed in the active file. If the transaction involves property that has been impounded with the automated system, the completed release forms are set aside to be later scanned and attached to the entry to capture the officer/detective authorization for release.

When releasing items, either remove the barcode label or use a large black marker and cross through at least the scan portion of the label. On occasion, especially with prisoner bulk property, the items will be impounded again, in the same container. Crossing out the scan label will avoid the possibility of that old barcode label being scanned in error. To release an item of property to a law enforcement officer from another agency, the officer must have a Property Release form signed by an officer of the San Diego Police Department. Officers from other jurisdictions will not be allowed to examine property unless accompanied by a member of this Department unless special arrangements are made with a property unit supervisor. See "VIEWING OF PROPERTY PROCEDURE" section.

If a detective enters a request in EvidenceOnQ to release evidence to another agency, if that evidence is not picked up, after 90 days, the REQUEST will be deleted from the Request Monitor. All of the request information will be in the audit trail, so if a representative from that agency shows up after 90 days, the release may still be processed. The evidence will remain in our Active Files. The request is being deleted to keep the EOQ Request Monitor clear.

RESOURCES (TRAINING VIDEOS)

Access to on-line training videos are available through the Resource Library from the SDPD Intranet. Search "Online Property Room" under this query and there is another folder titled "Online Property Room", which contains videos and tutorials. It is also accessible by scrolling to the bottom of the Resource Library list and selecting "User Resource Guides", and then scrolling down to "Online Property Room" folder.

<u>RETENTION CODES</u> (Common codes that aren't automatically updated based on the charges)

CA Reject – City Attorney's Office Rejection List CE – Cease email notification for disposition review Disposal – Disposal Items DNA – DNA evidence FOUND – Found Property FPP – Firearms Processing Packet HFC – Hold for Department Conversion PRIS – Prisoner Bulk Property for Safekeeping PRO – Prosecution Notification Report REL- Pending Release TRNG – Training/Test Entry Vehicles – Impounded Evidence Vehicles (obsolete)

RETENTION OF PROPERTY UNIT RECORDS

See Records Disposition Schedule on SD City Net.

Locate the chart on SD City Net, You Should Know This, Records Retention, Department Specific Schedules, Police.

Pursuant to the Records Disposition Schedule, Conformance Chart for Police Department (10/2013)

Record Series #	Description	Retention
34	Police Pursuit w/Collision Files/Photographs	3 years
35 & 139	Original Property Tags	Inactive + 7 years – (unless 187, SC, serious felony, gun or money)
36	Property Tag Logs	2 years or until value ceases
50	Vehicle Abatement Files – Private Property, Photographs	5 years per SOL on trespassing
64	Agreement Files	Term + 5 years
79	Correspondence	2 years
99	Hazmat Files/Inspections	5 years
102	Homicide Lab Files/Latent Prints, etc. to Records for Filing with 187 cases	
108	Lab Reports – Property Tags Associated	7 years
108a	Lab Reports – Sex Crime Property Tags	99 years
113	Misdemeanor Citation Files	2 years
114 115	Solved Murder case files – photos, property tags and Unsolved latent prints	99 years
138	Property Logs/Property Transfer Logs	2 years – or when no value
165	Traffic Fatalities and or Traffic Felonies- photos	10 years
169	Traffic Accident Reports – Photographs	5 years
252	Homicide Case Files – photos, latent print cards	99 years
263	Operating License Permit Violation Files – photos	6 years

Area Station Impound Logs	Original – retain for 10
	years to coincide with
	inactive tag purging.
Area Station – Property Transfer Logs	Original – retain at HQ for 10
	years.
	Copy – retain at Area Station
	for 2 years.
Auction Records	10 years
Check Out Logs	10 years
Conversion Forms – PD823	Original – 10 years.
	The Receiving Unit must
	retain document two years
	after disposition.
Conversion Tool Log	2 years (DP 3.24)
Credit Card Transaction Logs	3 years for paper, keep
	electronic copies indefinitely.
DCR – Daily Cash Receipt Logs	10 years
Expendable Conversion Log	3 years
Firearm Records	Indefinitely
Impound Logs	Indefinitely
Management Reports (Audits, Inventories,	5 years
Inspections)	
Property Unit Entry Logs	10 years (IAPE
	recommendation)
Property Tag – Pink Copies	Indefinitely
Property Tag – Dead Files (filed by year of	7 years from disposition,
disposition)	purge files and retain serious
	felonies, money & guns (see
	Purge Criteria for Dead Files)
	– retain for 20 years.
	Homicides & Sex Crimes –
	retain for 99 years.
Safe Entry Logs	10 years
Weapons Disposal Logs	Permanent Record
	1

ROTATION OF PERMANENT PROPERTY & EVIDENCE SPECIALIST ASSIGNMENT LOCATIONS

All Property and Evidence Specialists are to start their shift at headquarters at 0630. The first assignment in the rotation was selected, based on seniority. The assignments include the following:

- 1. Intake HQ Items not Received
- 2. Intake HQ Received but not Binned
- 3. Administrative Assignment HQ Checkouts
- 4. Administrative Assignment HQ Scan and Attach
- 5. Administrative Assignment Inventory
- 6. Administrative Assignment Inventory
- 7. Disposals HQ Property Release Form Pending File
- 8. Disposals General Disposal Pulling
- 9 Sub Coverage SE/SO
- 10. Sub Coverage NO/NE/NW
- 11. Sub Coverage CE/MC
- 12. Sub Coverage WE/EA/OS

The sequence of the rotation is as follows:

Specialist 1 Specialist 9 Specialist 3 Specialist 7 Specialist 4 Specialist 4 Specialist 2 Specialist 10 Specialist 6 Specialist 11 Specialist 5 Specialist 12

Every 6 months, on February 1st and August 1st Specialists move down one space on the rotation sequence list.

If a permanent position is vacant, that specialist number will be temporarily removed from the rotation. When a position is filled, that specialist number will be added back into the rotation. These changes will slightly adjust the rotation on occasion.

ROTATION OF THE HEADQUARTER ASSIGNMENTS

ASSIGNMENT: INTAKE – HQ ITEMS NOT RECEIVED

The specialist assigned to this duty is responsible for reviewing the "HQ Impound Log Check" query on a daily basis. If items have been entered into EvidenceOnQ and have not been received in binned, they need to be investigated and accounted for in a timely manner. Prior to contacting an officer and sending any notice, the specialist is to check for the following:

- a) Duplicate Entries the officer may have entered the exact same item twice on an incident in error;
- b) Bin Location the item may have been processed and placed in a bin by a specialist without scanning it properly.
- c) Duplicate Labeling there may be duplicate barcode labels. If there are ten items on one incident, confirm there are ten items in the box or bag;
- d) Processing Shelf the item may have been placed on the processing shelf without being scanned first. It may be there and just hasn't been processed and binned yet.

If after thoroughly searching for the item or for an error, the item is still not located, the specialist is responsible for completing a delinquent notice to the officer. The delinquent notices are generated via email. There are standard templates for this purpose. The first notice is to be sent to the impounding officer and their supervisor. The procedures indicate the elevation process through the chain of command if resolution is not reached. All communication to and from officers are to be copied into the Notes Log. It is ultimately the specialists's responsibility to follow up with their supervisor until complete resolution is reached.

If the officer claims they did deposit the delinquent item(s), have a second specialist double check the records and assist in the search. If the item(s) missing is of high monetary value, a supervisor must be notified immediately.

Firearms and currency must be accounted for on the same day as the impound or on the next business day.

If item(s) are not located and an error is not identified, an ARJIS-9 may be required from the officer. Once their supervisor approves the A-9, a copy must be sent to Records and the other copy is to be scanned and attached to the EvidenceOnQ barcode record.

If the ARJIS-9 meets the approval of the Senior Supervisor, the item(s) may then to be scanned to UTLOFFICER/UTL-NOT RECEIVED IN BIN location. If the ARJIS-9 does not meet the approval of the Senior Supervisor or if the officer claims they did deposit the item(s) in a bin in a Property Room facility, the matter may need to be referred to Internal Affairs or the Professional Standards Unit.

ASSIGNMENT: INTAKE - HQ RECEIVED/NOT BINNED

The specialist assigned to this duty is responsible for reviewing the "HQ Not Put Away" query on a daily basis. Any item(s) that have been received and scanned to the processing shelf but not binned, need to be investigated and accounted for in a timely manner.

The first step is to check the processing shelf, as it may still be there to be binned. If the item is not on the processing shelf, the specialist is to determine if the item is a new impound or a return from a check-out. This can be determined from the audit trail. If the item is a new entry, the audit trail will reflect that the record was created by the impound officer and the only other entry would be when the item was received. If the item was returned from a check-out, the audit trail will reflect the previous bin locations in which the item was stored. The specialist is to check the last location, as it is possible the specialist returned it to the same location and neglected to scan the item.

Run the incident number to see if there are other barcoded items under the same incident number. If there are, search the bin location to see if the item was binned without being properly scanned.

Run an Ad Hoc Query for all items put away at HQ on the same day the missing item was received. Print out a "named list" from the external report section. Physically search the multiple bins to see if the missing item was binned along with another impound. Search inside of all boxes, bags and envelopes.

If the last location was "processed by", refer the barcode number to the specialist who processed the evidence and it will be their responsibility to locate the item.

The specialist is to document all searches in the NotesLog for future reference. If the item is not located, notification to the specialist's immediate supervisor is required. The supervisor will take over the search responsibility.

ASSIGNMENT: ADMIN. – HQ CHECKOUTS

The specialist assigned to this duty is responsible for reviewing overdue check-outs.

Lab personnel and ICAC detectives are allowed to check-out evidence for a total of 90 days. There are three queries that are used to monitor overdue Lab and ICAC check-outs.

An email is generated to the people with overdue check-outs. If there are multiple barcodes overdue for one person, only one email will be generated that includes all of the barcode numbers. There is a standard email template available in the Checkout Templates Folder.

Document the correspondence generated in the NotesLog. Copy and paste all checkout correspondence under the Checkout Notice Sent header in the NotesLog.

Follow up identified in the procedures is required until the check-out is returned.

If an extension on the check-out is requested, there are two options:

- The supervisor must provide an email giving the length of time for the extension. This email must be copied and an entry made in the NotesLog.
- The evidence can be returned and then immediately checked out again, which will reset the 90 day clock.

ASSIGNMENT: ADMIN. - HQ SCAN AND ATTACH

The specialist assigned to this duty is responsible for managing the documents, on a daily basis, that are required to be scanned into EvidenceOnQ. The following documents are required to be scanned into the corresponding record in EvidenceOnQ:

- Signed/Processed Property Release Forms
- Expired Property Release Forms

The staff member who receives the following documents is to scan and attach the record immediately and not place the document in the Scan and Attach box.

- Weapons/Current Receipts
- Court Receipts
- ARJIS-9 Narratives

All paperwork pertaining to firearm impounds must be forwarded to the Gun Desk.

Each document is to be scanned, dropped into the corresponding barcode Documents tab, while selecting the appropriate document type.

The specialist is responsible for confirming the current location is correct on all release forms and court receipts.

The items on a Court Receipt are to be scanned to RETAINED IN COURT location.

The items on a Property Release Form are to be scanned to one of the following locations: RETURNED TO OWNER RETURNED TO OTHER RELEASED TO OTHER AGENCY

ASSIGNMENT: ADMIN. - INVENTORY

The specialist assigned to this duty is responsible for completing the HQ inventory areas designated for the months during this quarter.

The specialist will use the MobileOnQ device and do an inventory of each designated area. If the area is not completed within the designated month, an effort will be made to complete the job prior to the end of the quarter. If the job is not completed by the end of the quarter. The inventory will cease, the remaining bins to inventory will be documented and the next inventory of that area will start where the specialist left off.

Once the inventory job is closed, two reports are to be generated.

Summary Report: This report lists all of the bins that were scanned and how many items were scanned in each of those bins. It reflects the number of items correctly in the bin and the number of items that should not have been in bin. It will not provide details, it is an overview only.

Detailed Report: This report shows the actual barcodes that were scanned in each bin. It lists separately the items scanned in a bin that the system reflects should be located in another bin and it provides that location based on the EvidenceOnQ database.

The specialist is to review these reports and attempt to reconcile any exceptions. As the exceptions are corrected, the specialist will place notes explaining the correction and his/her initials next to the notes on the Detailed Report. If after an exhaustive search any items cannot be located, those items must be flagged in the NOTES LOG by entering "PRNIB", which represents Property Received Not in Bin. This entry allows the unit to query evidence that cannot be located.

Once the reports are reconciled, the specialist is to turn over the reports to their supervisor. The supervisor is to complete a Supervisor's Inventory Cover Sheet and attach the reports to it, prior to filing them.

ASSIGNMENT: DISPOSALS - HQ PROPERTY RELEASE FORM PENDING FILE

The specialist assigned to this duty is responsible for reviewing the PRF pending file on a weekly basis. The property release forms that are beyond the expiration date that is listed on the top of the release form are to be pulled and processed.

While pulling forms, confirm that the files are sorted correctly based on the first letter of the recipient's last name. Within each letter divider, the tags are to be in order by the date listed on the top of the form, with the most current date in the front of each divider. This way all of the expired releases should be together in the back of each divided section.

While pulling the expired releases, keep an eye out for forms filed under the wrong letter of the alphabet. Also watch for releases without an expiration date at the top or without the bin location. If any of these errors are noticed, make the necessary corrections.

The pulled, expired releases need to be reviewed to confirm the following:

- An officer authorized the release. If these isn't an officer authorization, review the EOQ record and confirm there was a request for release entered in the audit trail. If not, the PRF is not valid.
- It isn't a partial release on a barcode (watch for key words like "only"). This is one of the reasons why officers are to be using the EvidenceOnQ system to generate their PRF's on barcoded impounds.
- The appropriate time period was calculated based on the type of impound: Prisoner Bulk Property = 90 days Found Property = 90 days Evidence/Other = 30 days

All correspondence is to be documented in the NotesLog.

The specialist will review the printed form and compare it to the EvidenceOnQ record to confirm the printed information matches the EOQ record and that the appropriate retention period was calculated. It is critical that the hard copy release be retained in EOQ in case the recipient ever disputes the dates or information on the PRF. This is one of the reasons the PRF must be scanned and attached to the corresponding incident/barcode.

The expired PRF's are to be scanned individually. Each one will be attached as a document, to the corresponding incident/barcode in EvidenceOnQ.

The specialist will enter a REQUEST using option #00 "DISPOSE, RELEASE FORM EXPIRED".

SAFEKEEPING (Prisoner Bulk):

Civil Code 2080.10 defines what a public agency shall do if it obtains possession of personal property from a person for temporary safekeeping. The Civil Code requires that the property be retained for <u>60</u> days. If the owner of the property is unable to retrieve the property, because he or she is in custody, the owner must notify the Department in writing, and request that the Department hold the property. If a person notifies the Department that he or she is unable to retrieve the property within 60 days, or have an authorized person retrieve the property, the agency SHALL hold the property for not longer than 10 ADDITIONAL months. (That would be a total of 12 months from the impound date).

Any written request to the Department to retain property is to be scanned and attached to the record in EvidenceOnQ. Any response to the written request is to be scanned and attached to the record in EvidenceOnQ.

San Diego Municipal Code 22.0603 requires that any unclaimed property be retained for a period of <u>90</u> days. It does not distinguish between safekeeping property and other unclaimed items. [We will be working with Legal to request that City Council modify this code section to not indicate a specific time period, but be consistent with the State Civil Code.]

The Department policy is to retain all prisoner bulk property (safekeeping) for a minimum of **90 days**.

The "Isaiah" civil case reached a settlement which requires that the SDPD retain prisoner bulk property (safekeeping) based on the current law.

SAFETY:

New employees or volunteers will not be permitted to drive or operate a City vehicle or piece of City equipment until they have read the City of San Diego Driver/Operator Manual and completed the Verification of Manual Receipt form included at the end of the manual.

Risk Management – Safety & Environmental Health Division Safety Officer (5/2015)

Cal/Osha General Industry Safety Orders (GISO)

GISO 3380 Personal Protective Devices. The employer shall provide and ensure that employees use protection suitable for the exposure.

GISO3385 Foot Protection. Appropriate foot protection shall be required for employees who are exposed to foot injuries from falling objects, crushing or penetrating actions, which may cause injuries. Employees should be wearing a Category IV Safety tow 6–8" leather shoe.

GISO 3384 Hand Protection. Employers shall select, provide and require employees to use appropriate hand protection when employee's hands are exposed to hazards such as those from cuts or lacerations, abrasions, and punctures. When working

with shredded metal at the recycling plant employees should be provided with leather gloves.

GISO3382 Eye Protection. Employees working in locations where there is a risk of receiving eye injuries such as punctures, abrasions, or contusions, as a result of contact with flying particles and projections which are inherent in the work or environment, shall be safeguarded by means of eye protection. Employees should be provided safety glasses. If the employee wears prescription glasses, prescription safety glasses should be provided.

Gloves and masks are stocked in the Property Room. Protective clothing is available upon request (lab coats). An eye wash station is located in each impound room. Information on purchasing safety shoes and prescription safety glasses can be obtained through Citynet, Risk Management, Safety and Environmental Health, Programs. Leather gloves and safety glasses can be found through Central Stores.

SALLY PORT MAIL BOX – HEADQUARTERS:

There is a mailbox up in the sally port, in which officers can place

SCANNING AND ATTACHING DOCUMENTS IN EOQ:

The only documents that do not need to be immediately scanned and attached to the EvidenceOnQ record as soon as the processing is completed are the Property Release Forms that are processed at the public counter. The signed Property Release Forms may be placed in the Scan and Attach box.

SEALING EVIDENCE:

The following types of impounded property are usually sealed prior to receipt by the property specialist. If they are not already sealed, they must be sealed prior to binning.

- A. Evidence marked "Hold for Prints"/DNA
- B. All evidence related to Sex Crimes cases (including child molestations)
- C. All evidence related to homicide cases
- D. All guns impounded as "evidence"
- E. All money impounds over \$20.00 and jewelry placed in the safe

F. Any impounds that may have evidence that will be evaluated by the Lab.

After sealing the evidence using the red sealing tape or the white evidence seals (PD-849), note in the comments section that the evidence is "sealed." The specialists must also sign their name or initials and ID number across the seal. This will enable anyone reviewing the impound to know if the property is sealed without having to check the property itself.

If the Lab requests to check out an item and notices that it was not sealed, they may ask the specialist to seal it. The specialist should seal the item and document in the EOQ Noteslog that they sealed the item.

SECURITY:

Lockers are provided directly outside the headquarters Property Room so that staff can secure their personal belongings including purses, bags, backpacks, etc. outside of the Property Room.

Card access, during business hours, to the Property Room is limited to Police Property & Evidence Specialists and the Gun Desk Officers. Special Event Traffic Controllers, Light Duty Staff and Volunteers are not provided card access to the Property Room. The chain of command above the Property Room is not provided card access to the Property Room.

Whenever someone, who is not a currently assigned Property Unit staff member (Property Specialist, Police Officer), enters a Property Room facility, the Entry Log must be completed, both at the time of entry and at the time of exit. These logs are scanned and retained in the Supervisor's File.

Anyone who is not assigned to work in the Property Room must be escorted to any necessary areas and accompanied, at all times. This includes all maintenance workers and law enforcement officers.

The security of impounded property is of utmost importance. At area stations, whenever the property specialist is not in the Property Room, the Property Room door must be locked. Procedures or after hour's entry must be followed. A supervisor must be notified of any after hour's entry to **any** property facility for **any** reason.

The property specialist must make sure that all exits are secure whenever they leave the Property Room. At headquarters, all doors leading to the E Street counter must be locked. When leaving for the day, the interior impound bin doors and all Property Room exterior doors must be locked. The back door to the warehouse must be dead bolted and boarded before the lights are turned out. No one should turn off the lights without confirming the door is secured first.

Limited access is allowed to the auction cage, safes and the gun rooms at headquarters. A limited number of keys have been issued for all hour access to the Property Room.

The following Property Unit employees have headquarters key access:

- Beverly Harris, Senior Property & Evidence Supervisor
- Ray Christian, Property & Evidence Supervisor
- Robert Lloyd, Property & Evidence Supervisor
- Victor Alonso, Property & Evidence Specialist
- Mark Sholan, Property & Evidence Specialist
- Paul Vasquez, Property & Evidence Specialist
- Jorge Alvarez, Parking Enforcement Officer (assists on overtime)

The following Property Room employees have the combinations to the safes:

- Beverly Harris, Senior Property & Evidence Supervisor
- Ray Christian, Property & Evidence Supervisor
- Robert Lloyd, Property & Evidence Supervisor
- Victor Alonso, Property & Evidence Specialist
- Paul Vasquez, Property & Evidence Specialist

Whenever entry is made into one of the safes, the person entering must have a witness present. The safe entry log must be completed by both people. The completed safe entry logs are scanned and retained in the supervisors file.

The following Property Unit employees have card access to the gun rooms:

- Beverly Harris, Senior Property & Evidence Supervisor
- Ray Christian, Property & Evidence Supervisor
- Robert Lloyd, Property & Evidence Supervisor
- Alejandro Quiroz de la Mora, PISO
- Cecy Noa, PISO
- Victor Alonso, Property & Evidence Specialist
- Mark Sholan, Property & Evidence Specialist
- Paul Vasquez, Property & Evidence Specialist

The following Property Unit employees have key access to the gun destruction pending closet:

- Beverly Harris, Senior Property & Evidence Supervisor
- Ray Christian, Property & Evidence Supervisor
- Robert Lloyd, Property & Evidence Supervisor
- Victor Alonso, Property & Evidence Specialist

The following Property Unit employees have the combination to the lock on the auction cage:

- Beverly Harris, Senior Property & Evidence Supervisor
- Ray Christian, Property & Evidence Supervisor
- Robert Lloyd, Property & Evidence Supervisor
- Alejandro Quiroz de la Mora, PISO
- Cecy Noa, PISO
- Victor Alonso, Property & Evidence Specialist

Specialists assigned to the area stations each have keys to those stations and the van they use to transport the evidence to headquarters.

An emergency access key is available in a secured location in the Watch Commander's Office. Whenever that key is checked out, it is with the approval of the Watch Commander and the Senior Property & Evidence Supervisor must be notified.

Security cameras have been installed in the most critical areas of the headquarters Property Room. The main system is located in the front gun room side closet. Both supervisors and the manager have access to the online viewing.

The Jerome's warehouse has card access. The Property & Evidence Specialists that have card access to headquarters, also have access to Jerome's. An alarm was installed in Jerome's warehouse for additional security, it includes motion detectors. The rolling door is secured with a combination padlock.

The long term storage buildings have key pad access. An alarm was installed in each of these buildings for additional security. They also have security cameras.

In order for any locks to be changed or added to a Property Room facility, a supervisor must authorize the request with the City locksmith in writing.

SHIPPING

The Property Unit is only responsible for shipping items that are impounded, property or evidence, and in the unit's custody. Each individual unit is responsible for shipping their own items associated with their duties, if it is not something impounded.

A Shipping Request Form must be completed on all items being requested for shipping. A Property Release Form and a self-addressed stamped envelope must be provided so that it can be shipped with the item(s). The recipient of the item(s) will sign the PRF and return it to the Property Unit in the envelope provided.

Certified Mail is delivered with the same speed as the underlying mail class. Firstclass and priority mail are typically delivered within 2 to 3 days, so certified mail would be delivered in the same time frame. Choose certified mail when you need proof of delivery and time is of the essence. **Registered Mail** is the Postal Service's most secure form of mail delivery, involving an unbroken chain of custody. Registered mail is protected in sealed containers, safes and cages, and held under lock and key. This extra level of security can cause delays and may require up to 14 days for delivery. Chose registered mail when the contents of the mail require additional security and time is not a factor.

Uses of Certified and Registered – Consider using registered mail when you need to send clients or vendors valuable negotiable or nonnegotiable items, including stock certificates, bonds, cash, checks, money orders, jewelry or precious metals. Registered mail may also be appropriate for items that have no specific monetary value but have high importance, such as contracts, deeds and other legal documents. Use certified mail service when proof is required that your mail was delivered to the recipient. This may include time-sensitive communications with debtors or creditors, signatory business documents or returned check notifications.

SHOT SPOTTER EVIDENCE

All shot-spotter cartridges are identified in EvidenceOnQ in the item type field. Currently, this evidence is only impounded in the Southeastern Area Station. This evidence is to be transported to headquarters as soon as possible, at the request of the Crime Lab.

STAFF DNA COLLECTION

STAFF DNA PROFILE DATABASE

For the purposes of this policy, "staff" and "employee" are inclusive of employees, contracted employees (such as janitorial personnel), volunteers, and interns.

A staff DNA database is a quality control tool that enables the laboratory to recognize when employee DNA is introduced onto evidence or into the DNA testing process. The purpose of the staff DNA database, therefore, is to ensure that the information provided to investigators regarding DNA on the items of evidence submitted for analysis is not compromised by the presence of staff DNA. It is only by checking DNA profiles obtained from evidence against staff DNA profiles that we can assure the integrity of both the evidence and the testing process.

STAFF DNA SAMPLE POLICIES

The San Diego Police Department Crime Laboratory will maintain a staff DNA database for elimination purposes. The staff DNA database will contain samples contributed voluntarily by laboratory, narcotics vault, and property Unit employees. Forensic Biology and Crime Scene Unit volunteers and interns will be <u>required</u> to provide their DNA samples.

Reference DNA samples for the database will be collected by the Quality Manager with the consent of the employee. Signed consent forms will be kept on file with the Quality Manager. Reference DNA samples will be uniquely coded, and provided to the Forensic Biology Unit as anonymous samples for DNA profiling.

The staff DNA database, containing the numeric code and DNA profile of each staff sample, will be maintained by the Forensic Biology Unit. Only the Quality Manager will possess the key that correlates each unique code with the employee's name.

With permission of the employee, samples may be kept indefinitely for validation purposes. The use of samples in validations will be tracked.

Samples for which no consent has been obtained for use in validations will be destroyed after the Quality Manager has been informed of the successful DNA profiling and uploading to the staff database. The Quality Manager will mark the sample as destroyed on the key containing the unique code and employee name.

An employee's DNA profile will be removed from the staff database upon <u>written</u> <u>request</u> of the employee.

The samples from employees no longer with the Department will be coded for anonymity and used in the database.

STAFF DNA MATCHES

Staff Match Summary Reports

Should a DNA profile from an employee appear in casework, the DNA case analyst will write a Staff Match Summary report. The Staff Match Summary details the employee sample by its code number, the evidence item on which the employee's DNA profile was detected, whether the interpretation of the sample was affected, and any other pertinent details. The Staff Match Summary report will be submitted to the DNA Technical Manager for review to determine if any further action or information is required. The Staff Match Summary report will then be forwarded to the Quality Manager. The Quality Manager will review the report, and appropriate actions will be taken to ensure a root cause analysis of the incident. A Quality Incident Report will be written if the contamination has affected the interpretation of the case.

If the contamination source is internal to the Forensic Biology Unit, the root cause analysis will be conducted jointly by the DNA Technical Manager and Laboratory Quality Manager. The name of the contaminating donor will be shared with the DNA Technical Manager to ensure that in addition to the root cause analysis, appropriate corrective actions internal to the Forensic Biology Unit are taken.

If the source of the contamination is external to the Forensic Biology Unit, then the root cause analysis will be conducted by the Laboratory Quality Manager.

Staff Match Summary reports will be maintained in the Forensic Biology Unit.

Quality Incident Reports (QIR)

The contaminating profile will be identified only by its code number in any Quality Incident Report.

All contamination incidents will be logged for tracking purposes into the QA Incident Log spread sheet. A Quality Incident Report will be written by the Laboratory Quality Manager if the contamination has affected the interpretation of the DNA test results. Likely causes of staff contamination will be included in the QIR.

If the root cause analysis reveals no obvious reason for the presence of the staff profile, the input of the Crime Laboratory Manager and/or the DNA Technical Manager may be required. An investigation of the incident will be conducted, and the Crime Laboratory Manager along with the Quality Manager will make a decision regarding any additional course of action.

Quality Incident Reports are maintained by the Quality Manager while a copy of the report is placed in any relevant case files.

ANNUAL CONTAMINATION SUMMARY REPORT

Each year a summary report will be prepared detailing the number of staff contamination events that occurred during the year. The data will be assessed for any significant trends suggesting retraining is required. If necessary, the Forensic Biology Unit will conduct training at the direction of the Quality Manager or Crime Laboratory Manager.

RELEASE OF NAMES OUTSIDE OF THE LABORATORY

Names associated with any staff contamination will not appear in the Quality Incident Report, but may appear in the background documentation prepared by the Quality Manager. The release of donor names outside the laboratory will be at the discretion of the Crime Laboratory Manager. These instances will be restricted to court orders and investigations where the Crime Laboratory Manager decides the proper course of action is to release the name to the investigators.

RECODING THE SAMPLE

The release of a name does not mandate the recoding of the sample. Each circumstance surrounding the release of a name will be evaluated to determine if recoding is necessary to preserve anonymity.

SAMPLE STAFF DNA COLLECTION CONSENT FORM:

SAN DIEGO POLICE DEPARTMENT STAFF DNA COLLECTION CONSENT FORM

- 1. I recognize that in the course of my work with the San Diego Police Department, I may come into contact with a case in which deoxyribonucleic acid (DNA) analysis may be required, or in contact with operational areas where DNA testing is performed. As such, there is a possibility that I could inadvertently deposit my own DNA on items/operational areas which could lead to misleading results that could compromise DNA results used in a criminal investigation.
- 2. I therefore understand that I am providing an appropriate sample to determine my DNA profile for inclusion into the Staff DNA Database as a Department employee working in a section at risk of contaminating actual evidence or the environment where testing is conducted.
- 3. I understand that my sample, once submitted, will be marked with a numeric code prior to testing and that my DNA profile will be entered into the Staff DNA Database using this code. After the successful upload of my sample into the Staff DNA Database, my sample will be discarded unless I otherwise indicate. The Quality Manager, the Crime Laboratory Manager, and when necessary, the DNA Technical Lead, are the only individuals that will have access to my name in the event my profile contributes to DNA staff contamination.
- 4. I agree the purpose of the Staff DNA Database is to routinely check all profiles generated for evidentiary purposes to exclude the possibility that I may have inadvertently deposited my DNA on items/operational areas. This information will be used, in part, to help separate my DNA profile from DNA profiles generated from casework.
- 5. I understand that my profile will remain in the Staff DNA Database until I request it be removed <u>in writing</u>.
- 6. I understand that by including my profile in the Staff DNA Database, should a match occur to evidence, the profile will not be categorized as a forensic unknown and therefore will not be uploaded to the state CODIS database.
- 7. I understand my DNA sample will be used for forensic purposes only, and that the information about my identity will be used only if my DNA profile hits to a profile generated from forensic casework.
- 8. *I understand that should a* forensic profile search hit to a DNA profile in the Staff DNA Database, an internal quality assurance investigation will be conducted and could result in further action. I understand that as a result of this investigation, the Quality Manager and the Crime Laboratory Manager will have access to my name. The DNA Technical Manager will be given access to my name if the contamination event is internal to the Forensic Biology Unit.

9. I understand and agree to the above and recognize that my DNA profile may be subject to disclosure in a criminal trial process.

After reading the attached policy:

I hereby authorize SDPD personnel to obtain a sample of my DNA for profiling using standard SDPD protocols for inclusion in the Staff DNA database.

I hereby <u>do not</u> authorize SDPD personnel to obtain a sample of my DNA for profiling for inclusion in the Staff DNA database.

I hereby agree to allow my sample to be retained for use in validation studies for an indefinite period of time.

SUPPLIES – IMPOUND ROOMS

The impound rooms must be stocked with an adequate amount of supplies. Review of the supplies should take place on a daily basis.

The following supplies must be stocked in the Impound Rooms:

- Gloves several sizes
- Brown bags several sizes
- Hand gun boxes
- Knife boxes
- Wire tags
- Envelopes several sizes
- Money envelopes
- CD's blank CD's and CD envelopes (Headquarters copy machine available)
- Sealing labels/CD Sealing Labels
- Sealing Red Tape
- Biohazard labels
- Large Plastic Bags (trash size) for Prisoner Bulk loads
- Blank Zebra barcode labels
- Ribbons for Zebra barcode printers
- Ruler and Yardstick
- Tape Measure
- Pens
- Note Paper
- Felt Markers
- Staplers (extra staples)
- Scotch Tape (extra tape)
- White copy paper (Copy machine/printer available)
- Property Release Form MASTER (with instructions how to prepare through EOQ, sign indicating the master may be copied and used only for old property tag impounds or if the system is down)
- Blank EOQ data sheets (In case system goes down, MTS impounds at HQ)

TEMPERATURE CONTROLLED EVIDENCE – TRANSFER TO

FREEZER TRANSFERS:

Remove all DNA, 3 years after impound, EXCEPT:

- **DNA EXTRACTS** Any incident number that includes reference to DNA extract, or any impound with the description of DNA extract
- HOMICIDE (PC187) DNA Anything assigned to the Homicide command, or that references the charge PC187 or Homicide (excluding the ZZ codes 920000, 921000, 951000)
- **OIS (Officer Involved Shooting)** Anything assigned to the Homicide command or with the charge of any indication of OIS.

DO NOT remove the following items, search the additional description field:

- HUMAN REMAINS fetus, bones, flesh
- **FECAL MATTER** in substantial quantity that could attract rodents or insects (diaper with fecal matter)
- **FOOD RELATED** burritos, nuts, etc. Food will spoil and will also attract rodents, even if it is packaged

REFRIGERATOR TRANSFERS:

SART kits are eligible for temperature controlled storage after 3 years from impound date **EXCEPT**:

- SART's related to homicide charge (PC187) see above, same criteria for 187
- Any liquid-food related evidence that will spoil and attract rodents, for example a baby bottle with formula

TRAFFIC DIVISION – CONEX BOX (Large car parts, equipment, etc.)

There is a conex box (shipping container) up at the Traffic Division, between the two long term storage buildings. Items may be impounded at this station location and left outside the box if they are large, heavy or awkward to impound in a property room location. For example: electric carts, large vehicle parts, lawn mowers, etc. See DP 3.02 for requirements regarding gasoline powered equipment.

UNABLE TO LOCATE ITEMS

PROPERTY TAGS

ACTIVE PROPERTY TAGS – Unable to Locate

When looking for an active impound that was processed on a paper property tag, if the item(s) can't be located, check the most likely miss-binned locations.

- Review the bin above the correct location and the bin below the correction location.
- Transpose the numbers and check that bin.
- Based on the size and the type of the item, is there another bin location that would be logical.
- Check with more experienced property specialists to see if they have suggestions on where to search based on the information on the tag.
- If the items can still not be located, contact a supervisor.

DISPOSITION AUTHORIZED ON PROPERTY TAG - Unable to Locate

- Review the bin above the correct location and the bin below the correct location.
- Transpose the numbers and check that bin.
- Based on the size and type of the item, is there another bin location that would be logical?

- Check with more experienced property specialists to see if they have suggestions on where to search based on the information on the tag.
- If the items can still not be located, contact a supervisor.

EOQ IMPOUNDS

ACTIVE EOQ IMPOUND – Unable to Locate

When searching for active evidence, if item(s) can't be located, check the most likely miss-binned locations.

- Review the bin above the correct location and the bin below the correct location.
- Transpose the numbers and check that bin.
- Check the audit trail for any edits to the incident number. The incident number may have been changed and the packaging label might reflect the old number.
- Review the packaging details to see the type of external packaging to assist with the search. Has all of the other items within the external package been destroyed?
- Review the documents attached and the audit trail. Has the item been released or converted to Department use but hasn't been transferred to a release or conversion location?
- What type of transfer occurred? Was it manual? Look for locations that are similar (if you are looking for an item in bin A-11, also search A-1, A-111, A-10, A-9)
- Review the most recent inventory report to determine if the item was recently in the bin?
- Generate an Ad Hoc search to query all of the items binned on the same day as the UTL item. Search these other impounds and locations for errors.
- Based on the size and type of the item, is there another bin location that would be logical?
- Check with more experienced property specialists to see if they have suggestions on where to search based on the information on the tag.
- If the items can still not be located, contact a supervisor.

If the item is unable to be located, in the **PRNIB** (**Property not in bin**) field, enter "YES".

If the item is unable to be located after an extensive search, the item will be updated in EOQ with a "YES" in the **PRNIB (Property not in bin)** field.

The PRNIB query must be reviewed regularly and independent searches conducted, not just when completing inventory of the area. Once the property is located, the "YES" must be removed from the PRNIB field. If the item is not located after extensive searching, a supervisor may transfer the item to the "UTL-Impound" location.

DISPOSITION AUTHORIZED ON EOQ IMPOUND - Unable to Locate

When pulling evidence for disposal, if item(s) can't be located, check the most likely miss-binned locations.

- Review the bin above the correct location and the bin below the correct location.
- Transpose the numbers and check that bin.
- Check the audit trail for any edits to the incident number. The incident number may have been changed and the packaging label might reflect the old number.
- Review the packaging details to see the type of external packaging to assist with the search. Has all of the other items within the external package been destroyed?
- Review the documents attached and the audit trail. Has the item been released or converted to Department use but hasn't been transferred to a release or conversion location?
- What type of transfer occurred? Was it manual? Look for locations that are similar (if you are looking for an item in bin A-11, also search A-1, A-111, A-10, A-9)
- Review the most recent inventory report to determine if the item was recently in the bin?
- Generate an Ad Hoc search to query all of the items binned on the same day as the UTL item. Search these other impounds and locations for errors.
- Based on the size and type of the item, is there another bin location that would be logical?
- Check with more experienced property specialists to see if they have suggestions on where to search based on the information on the tag.
- If the items can still not be located, contact a supervisor.

If the item is unable to be located after an extensive search, the item will be updated in EOQ with a "YES" in the **PRNIB (Property not in bin)** field.

The PRNIB query must be reviewed regularly and independent searches conducted, not just when completing inventory of the area. Once the property is located, the "YES" must be removed from the PRNIB field. If the item is not located after extensive searching, a supervisor may transfer the item to the "UTL-Impound" location.

VEHICLES TOWED WITH EVIDENCE HOLD - VC22655.5A

March 2017, this procedure has been rescinded. Department Policies and Procedures are being modified. This section remains in the manual for historical purposes only.

If a towed vehicle is to be held for evidence per VC22655.5a, that vehicle will to be entered in EvidenceOnQ for lab tracking purposes only. "IMPOUNDED VEHICLE" will be selected for station impounded. The vehicle identification number (VIN) will be entered in the SN (serial number) field. The other applicable description fields will be completed.

The Property Unit is not responsible for the storage, releasing or tracking of these vehicles. The Lab is using EvidenceOnQ for tracking purposes only.

VIEWING OF PROPERTY – PROCEDURE

Members of the Department may need to examine impounded property in the property room and not need to take it with them. City Attorneys, City Attorney Investigators, District Attorneys and District Attorney Investigators with agency photo identification may check-out evidence that has not been sealed, for the purpose of their investigation, for viewing, photographing and making copies. (CD's are an exception to the sealed evidence rules). If they want to view an item that has been sealed, they will need a signed Property Release form from the assigned investigator. When checking out items to these individual that are not part of the San Diego Police Department, obtain their business card or at a minimum, their full name, phone number and email address. A property unit employee will bring the requested impound to the counter where the requestor will sign the section designated "Viewed at Property Room" on the chain of custody record of the property tag. The property unit employee who brings the property out will initial on the left side of the chain of custody. The property tag is then placed on a clip located on the right side of the files while the property is being examined. Once the viewing is completed, the property is returned to a property Unit employee who will initial the right side of the property tag and place the property back in its storage bin. The property Unit employee who puts the property back in its bin will then file the property tag back in the appropriate "active" file.

The Harbor Police Department agrees to this policy for allowing viewing of evidence on their cases by City Attorneys, City Attorney Investigators, District Attorneys and District Attorney Investigators.

For all EvidenceOnQ viewing transactions, the specialist will use the Fileroom/Check-out feature and select the reason for check-out as "Viewing" to distinguish this type of transaction. Any business cards or additional information available from another agency will be scanned into EvidenceOnQ or entered in the NotesLog for future reference. When the property is returned, the signature is again captured with the check in.

VIEWING ROOM

When a detective is using the viewing room to display evidence to a prosecutor, defense attorney and or victim, the parties present are to sign the viewing room log. The chain link side of the room is to be locked, with a pad lock, to secure the property room access from the viewing room.

WARRANTS – SEARCH WARRANT OR WARRANT TO SEIZE PROPERTY

If law enforcement comes to the Property Room to serve a search warrant or to serve a warrant to seize property, contact our Legal Department (619) 531-2755 to review the warrant. Confirm that the investigator assigned to the case is aware of the warrant and has no objection to items being released. If a Property Release or disposition has already been completed by the investigator, there is no need to contact Legal.

WEEKLY MANAGEMENT REPORTS

The captain over Operational Support requires that a weekly management report, similar to the QMR, be forwarded to her and the Admin. Lieutenant over Operational Support each Monday. This report will contain the current "hot topics" in the Property Unit the previous week (Saturday through Friday). This weekly report will assist the Captain in keeping the Assistant Chief over Support Operations advised of current issues.
