

Information for Contractors and Vendors

ISO 14001 Environmental Management System Orientation

Water Construction and Maintenance Division and Water System Operations Division has committed to provide reliable water utility services that protect the health of our communities and the environment. In support of our mission, the Divisions have implemented the ISO 14001 Environmental Management System which requires that we maintain yearly certification to this environmental standard, communicate the Environmental Policy, and inform relevant environmental impact procedures and information to our contractors and vendors.

The Public Utilities Department requests your help in supporting our Environmental Management System. Please inform your staff who work for or on behalf of the Public Utilities Department, and sign and return a copy of this page to MChandler@sandiego.gov.

Our Environmental Policy:

- Continually improve the Divisions work processes and practices to control, minimize and eliminate adverse impacts to San Diego’s rural, urban and coastal environment.
- Comply with applicable legal and regulatory requirements, and water industry standards.
- Prevent environmental pollution attributable to operations, minimize waste and impacts to natural resources.
- Communicate to all stakeholders the efforts to protect environmental health and public safety.
- To develop and execute work practices to support environmental sustainability.

Contractors and Vendors working for or on behalf of Public Utilities Department

1. Notify PUD facility staff immediately of any spills, leaks, or other potential environmental concerns.
2. Use appropriate spill and storm water pollution prevention measures.
3. Ensure chemicals and hazardous materials are properly stored.
4. Comply with all applicable environmental laws, rules and regulations.
5. Properly dispose of all waste.
6. Share your ideas and suggestions with us in our commitment to protect environmental health.

Contact Environmental Management Representative Mark Chandler at 619-527-3947 for assistance and additional information.

I have reviewed the ISO 14001 Environmental Management System Info Sheet.
