

RIVER KIDS DISCOVERY WETLANDS DAYS!

SATURDAY, MARCH 14 • 9AM - 12PM

WONDERFUL WETLANDS • FAMOSA SLOUGH

Wetlands like Famosa Slough provide an important ecological niche! For migrating and local birds, they provide a rich source of food, a place for resting and for nesting. It is estimated that 95 percent of California's historical wetlands have been lost to development, which is why we need your help caring for Famosa Slough! Volunteers will learn about this special ecosystem, help to care for native plants, and remove harmful invasive plant species.
