

D.I.Y. Rainforest Terrarium

Join us for "DIY Rainforest Terrariums" to learn the importance of this diverse biome, and create your very own miniature rainforest. We'll GO WILD with this hands-on workshop that's fun, educational, and not to be missed!

Go Wild with Zovargo

How many different animal species call the rainforest home? Millions! Grab your magnifying glass and get ready to GO WILD as you discover some of the beautiful animals that make up the rainforest. You'll also learn what we can do to help these animals that are in danger of becoming extinct!

Minecraft: Go Wild & Explore the Rainforest!

Take a rollercoaster journey through time to visit charismatic extinct species & investigate the causes of their extinction; enter a rainforest biome to create an ecosystem and document the extinction and finally, use the MakeCode platform to help the environment by coding your character to automatically plant new trees. Using the power of Minecraft: Education Edition, learn about Biodiversity, and explore the effects that extinction has on the environment

Saving Conures Through Conservation

Learn all about San Diego's wild parrots, including three species of Conures that are native to the rainforests in South America. We will discuss ways to practice conservation in our everyday lives to help support wild parrots across the globe, and even create a fun enrichment pinecone treat for local birds to snack on!

Sounds of the Rainforest: Making a Manguaré

Learn how the Bora-Huitoto People, one of the many tribes living on the Amazon forest, make and use their drums to communicate among themselves and between villages. Create and decorate a small drum replica and learn rhythmic patterns for music and communication purposes. Take home your new drum along with a guide to rhythm-making patterns to communicate with your friends and family in a new way!

Name _____ 

GO WILD!

Under the Rainforest Canopy

This year's STEAM challenge includes 5 workshops. Complete each workshop and earn a paw print. Earn 3 or more paw prints and return your bookmark to your local library to claim your Go Wild binoculars!

All programs are geared towards students ages 9 – 12.

Registration required. Please visit our website for program extras, dates and for event registration:
