# Old Logan Heights Library Renovation Project

## Project Background

The Old Logan Heights Library building located at 811 S. 28th Street was built in 1927 and used as a branch library until 2009 when the new Logan Heights Library opened. The approximately 2,960 square foot building is situated in an urban environment with no designated onsite parking. It is in need of extensive upgrades, including electrical, mechanical, plumbing, roofing, windows and adaptations to allow access for people with disabilities.

## Project Description

This project will rehabilitate the Old Logan Heights Library building. The City of San Diego will work with community members and other stakeholders to gather feedback through forums, focus groups and surveys to determine the best future use of the building and if the project scope will extend beyond the previously mentioned upgrades.

## Budget & Anticipated Schedule

The Old Logan Heights Library Renovation Project is in the early planning stages, so a budget and anticipated schedule are not yet available. Those details will be added to this page as they become available.
