

The City of San Diego's Recycling Ordinance requires all special events to have recycling and trash collection. If your event has food distribution, organic waste recycling collection is also required. Recycling and trash containers must be set up side by side, and an organic waste recycling container set up next to them, when applicable. All containers must include a sign/label listing the acceptable items. You may select from any of the service providers below or another service provider of your choice based on your event's waste needs.

Company	Website	Phone Number	Services Offered			Equipment Type
