## Background

The Washington Street Maintenance Assessment District (District), originally known as the “Washington Street Landscape Maintenance District,” was established by the City of San Diego (City) on August 3, 1993 by City Council Resolution R-282452. The District was subsequently re-formed on July 28, 1998 by City Council Resolution R-290530 primarily for purposes of compliance with Proposition 218 and to permit future cost-indexing. The purpose of the District was, and still is, to fund specifically identified improvements and activities within the boundary of the District.

In conformity with §65.0221 of the “San Diego Maintenance Assessment District Procedural Ordinance,” the City adopted Resolution No. R-310618 on July 22, 2016, approving the annual budget and assessments for Fiscal Year 2017, and authorizing the levy of the assessments for the life of the District, consistent with the benefit findings and assessment apportionment method contained in the approved formational and all subsequently updated Engineer’s Reports (Engineer’s Reports). The Engineer’s Reports are on file with the City Clerk, and incorporated herein by reference.

The District is authorized and administered under the provisions of the “San Diego Maintenance Assessment District Procedural Ordinance.” This annual report has been prepared pursuant to the requirements of §65.0220 of the “San Diego Maintenance Assessment District Procedural Ordinance.”

---

## District Boundary

The District boundary is generally depicted in **Exhibit A**. The District Boundary Map and Assessment Diagram are on file in the Maintenance Assessment Districts section of the Parks and Recreation Department of the City, and, by reference, are made a part of this annual report.

---

## Project Description

The authorized assessments will be used to fund specifically identified improvements and activities within the District. The District improvements and activities generally consist of maintenance and servicing of landscaped medians, hardscaped medians, landscaped slopes, jacaranda trees, and sidewalks in the District. The approximate location of the improvements is generally shown **Exhibit A**.

For additional detail as to the location, type of improvements, and

activities performed by the District, please refer to the maps, improvement plans, engineering drawings, maintenance specifications, the Engineer's Reports and other associated documents on file with the Maintenance Assessment Districts section of the Parks and Recreation Department of the City. These documents, collectively, are incorporated herein by reference and made part of this annual report.

---

## Separation of General and Special Benefits

The identified improvements and activities provide benefits to the parcels located within the District. These benefits are “special benefits” to the extent that they are above and beyond the City’s standard level of service, and exclusive of those “general benefits” provided to the public at large or properties located outside the District. By law, only “special benefits” are assessable.

The assessments presented in this annual report are based on the cost of improvements and activities determined to provide “special benefits” in accordance with the Engineer’s Reports. For additional detail relative to the separation and quantification of general and special benefits for the District, please refer to the Engineer’s Reports, on file with the Maintenance Assessment Districts section of the Parks and Recreation Department of the City.

---

## Cost Estimate

The estimated annual budget (Revenue & Expense Statement) for Fiscal Year 2019 (July 1, 2018 to June 30, 2019 period) is included as **Exhibit B**. The “Other Contributions (Non Assessment Source)” revenue contained in the budget includes the value of improvements and activities determined to provide “general benefits.” The District budget with full detail is available for public reference in the Maintenance Assessment Districts section of the Parks and Recreation Department of the City.

### Annual Cost-Indexing

The maximum authorized assessment set forth in the Engineer’s Reports is permitted to increase annually based on the published change in the “San Diego Consumer Price Index for Urban Consumers” (SDCPI-U). The annual change in second half SDCPI-U values, as compiled by the *U.S. Bureau of Labor Statistics* (see [www.bls.gov](http://www.bls.gov)), for the prior year period was from 276.837 to 284.464 (a 2.76% increase). In accordance with the approved cost-indexing provisions, the maximum authorized assessment rates have been increased by 2.76%.

---

## Method of Apportionment

### Estimated Benefit of Improvements

The improvements maintained by the Washington Street Maintenance Assessment District are as previously described. In general, the improvements consist of landscaped/hardscaped medians, right-of-way areas, and other amenities along Washington Street and Goldfinch Street. The improvements lie along the primary access route used for inter-community and intra-community trips. Parcels within the District benefit from the improvements activities in terms of enhanced community image, aesthetics, and public safety.

### Apportionment Methodology

The total cost associated with District improvement and activities will be assessed to the various parcels in proportion to the estimated Equivalent Benefit Units (EBUs) assigned to a parcel, in relationship to the total EBUs of all the parcels in the District.

EBUs for each parcel have been determined as a function of three factors, a Land Use Factor, a Benefit Factor, and a Location Factor, related as shown in the following equation:

$$\text{EBUs} = (\text{Acres or Units}) \times \text{Land Use Factor} \times \text{Benefit Factor} \times \text{Location Factor}$$

Each of these factors is discussed below. Parcels determined to receive no benefit from maintenance of the District improvements have been assigned zero (0) EBUs.

### *Land Use Factor*

Since the District improvements and activities are primarily associated with the Transportation Element of the General and Community Plans, trip generation rates for various land use categories (as previously established by the City's Transportation Planning Section) have been used as the primary basis for the development of Land Use Factors. While these trip generation rates strictly address only vehicular trips, they are also considered to approximately reflect relative trip generation for other modes of transportation (e.g., pedestrian trips, bicycle trips, etc.), and are considered the best available information for these other transportation modes.

The special benefits of landscape and streetscape improvements and activities are linked to trip generation primarily by the public

safety and aesthetic enhancement enjoyed by travelers through the community. Trip generation rates provide the required nexus and basis for assigning ratios of maximum potential benefit to the various land use/zoning classifications as defined by the City’s Municipal Code.

Land use/zoning classifications have been grouped with averaged trip generation rates assigned to establish the Land Use Factors are summarized in **Table 1**.

**TABLE 1: Land Use Factors**

| <b>Land Use/Zoning</b>                 | <b>Code</b> | <b>Land Use Factor <sup>(1)</sup></b> |

| Undevelopable                          | UND         | 0.0 per acre                          |

<sup>(1)</sup> Proportional to vehicle trip generation per the City’s Transportation Element.

Designated Open Space serves primarily to preserve natural landscape and habitat. While access for study and passive recreation is sometimes permitted, these activities are usually allowed only to the limited extent consistent with the primary purpose of natural preservation. Since this land is essentially “unused” in the customary terms of land use, the trip generation rate by open space parcels is zero. Therefore, the designated Open Space receives no benefit from the Transportation Element and has been assigned a Land Use Factor of zero.

Several parcels within the District boundary have been classified as “undevelopable.” This is generally due to the topography of the parcel. Several canyons and steeply sloped areas exist within the boundary restricting the ability to develop or build upon a lot. Although not designated as open space, these parcels function as open space. Therefore, they have been assigned a Land Use Factor of zero similar to open space. Upon development of a parcel classified as “undevelopable,” the parcel’s land use classification

shall be revised and the parcel assessed according to its new land use classification.

While those traveling streets and roadways enjoy the District improvements and activities during their travel, the actual benefit of this enjoyment accrues to the lands at the origins and destinations of their trips, not to the lands of the streets and roadways, themselves. Accordingly, the Street/Roadway category receives no benefit and has been assigned a Land Use Factor of zero.

### **Benefit Factor**

The Land Use Factor described above reflects the relative intensity of use (or potential use) of the various parcels of land to be assessed. It does not address the relationship of this use to the specific District improvements and activities. This relationship is reflected in the Benefit Factor utilized in the assessment methodology.

In determining the Benefit Factor for each land use category, the subcomponents of the benefits of District improvements and activities considered may include some or all of the following: public safety, view corridors and aesthetics, enhancement of community identity, drainage corridors, and recreational potential. The components used for this District are: public safety and aesthetics/community identity.

As Benefit Factors and their subcomponents are intended to reflect the particular relationships between specific land uses within a district and the specific District improvements and activities, Benefit Factors will generally vary from one district to another, based on the specific character and nature of the applicable land uses and improvements maintained.

For a given land use, the composite Benefit Factor is equal to the sum of the subcomponent values. If a land use category receives no benefit from a subcomponent, then a value of zero is assigned to that subcomponent. A composite Benefit Factor of 1.0 indicates that full benefit is received. A decimal fraction indicates that less than full benefit is received.

The applicable benefit subcomponents and resultant composite Benefit Factors determined for the various land use/zoning categories within this District are as shown in **Table 2**.

**TABLE 2: Benefit Factors by Land Use**

**Public Safety.** All land uses are considered to receive the maximum available benefit from the public safety element of District improvements and activities (landscaped medians). Public safety is essential to all land uses, and even to lands, such as designated Open Space, held in stewardship with only incidental human use.

**Aesthetics.** The degree of benefit received from the aesthetic qualities of landscaped/streetscaped roadway, medians, and rights-of-way maintained by the District varies among land use categories. Generally, by nature of their use, residential lands receive the greatest benefit from the reduced traffic congestion, reduced noise levels, greater separation from traffic and generally more tranquil environment provided by landscaped and streetscaped roadways, medians, and rights-of-way. Residential property owners associate themselves with the community they live in differently than the community they work in. Resultantly the residential properties receive the highest degree of benefit from the improvements. Non-residential uses, on the other hand, often thrive on higher densities, greater traffic access, and a higher level of activity in the vicinity of their enterprises. These uses, accordingly, receive a lesser degree of benefit from the general insulation and separation provided by the aesthetic elements of District improvements.

Lands in the Open Space, Park and Undevelopable categories are considered to receive no significant benefit from the aesthetic elements of District improvements, as enhanced aesthetic quality of other lands in their vicinity does not affect their function, use, or value.

## Location Factor

The Location Factor is utilized to differentiate properties of similar land use which receive differing levels of benefit. Business owners within the Lewis Street Business District (designated as Zone 2) contribute to maintenance of similar improvements and activities within the public right-of-way in their business district area. Their contribution to maintenance of similar improvements has been recognized and credited as a partial in-lieu assessment toward enhancement of the community aesthetics. These few parcels have been assigned a Location Factor of 0.5. All other parcels within the District have been assigned a Location Factor of 1.0.

## Sample Calculations

As described above, the number of Equivalent Benefit Units (EBUs) assigned to each parcel in the District has been calculated based on each parcel's land use and the identified apportionment factors, as shown in the following equation:

$$\text{EBUs} = (\text{Acres or Units}) \times \text{Land Use Factor} \times \text{Benefit Factor} \times \text{Location Factor}$$

Shown below are sample EBU calculations for several common land uses found in the District.

- **1 Single-Family Residence in Zone 1**  
EBUs = 1 unit x 1.00 x 1.00 x 1.00 = 1.00 EBUs
- **1 Condominium in Zone 1**  
EBUs = 1 unit x 0.70 x 1.00 x 1.00 = 0.70 EBUs
- **10-unit Apartment Complex in Zone 1**  
EBUs = 10 units x 0.70 x 1.00 x 1.00 = 7.00 EBUs
- **½-acre Commercial Property in Zone 2**  
EBUs = 0.50 acres x 45.00 x 0.80 x 0.50 = 9.00 EBUs

The total assessment for each parcel in the District is based on the calculated EBUs for the parcel and the applicable unit assessment rate, as shown in the following equation:

$$\text{Total Assessment} = \text{Total EBUs} \times \text{Unit Assessment Rate}$$

Based on the above formula, the EBUs calculated for each property, can be found in the Assessment Roll (**Exhibit C**).

## Summary Results

The District Boundary is presented in **Exhibit A**.

An estimate of the annual costs of the improvements and activities provided by the District is included as **Exhibit B**.

The assessment methodology utilized is as described in the text of this annual report. Based on this methodology, Fiscal Year 2019 District assessment for each parcel were calculated and are shown in the Preliminary Assessment Roll (**Exhibit C**).

Each lot or parcel of land within the District has been identified by unique County Assessor's Parcel Number in the Preliminary Assessment Roll and on the Boundary Map and Assessment Diagram referenced herein.
