- 1. Fiscal Year 2021 Actual is based on third and fourth quarter results only. Data from first and second quarters unavailable due to COVID-19 impacts.
- 2. Fire deaths can vary significantly from year to year.
- 3. This measure has been adjusted from 7:30 to 6:30 beginning Fiscal Year 2020 to reflect that the measure now focuses on the interval from the time the first responder is assigned to the time the first responder arrives on scene. The previous measure included dispatch processing time (measured now separately) which was not a function of first responder arrival time. Also refer to footnote #6.
- 4. First responder (fire engines and trucks) response time has been changed to more appropriately measure the response time of the individual unit (and not include dispatch processing time). The dispatch component is now measured in as measure #4. This metric was revised beginning in Fiscal Year 2020 to narrow the focus to "E" level emergencies which are time critical. This metric was revised from 1 minute to 1:30 minutes beginning in Fiscal Year 2021.
- 5. Fiscal Year 2021 Actual is based on third and fourth quarter results only. Data from first and second quarters unavailable due to COVID-19 impacts. Additionally, Fiscal Year 2021 Actual percentage was impacted by Fire Company Inspections Program (FCIP) inspections not being conducted as a result of COVID-19.
- 6. The Department's inability to meet response time goals is heavily influenced by an insufficient number of geographically distributed resources to reach all communities within the desired response time goals. A comprehensive assessment of the Fire-Rescue Department's Standards of Response Coverage Deployment was conducted in 2011, and updated in 2017, which identified communities where additional resources are needed to achieve compliance.
- 7. The Department was unable to meet target primarily due to COVID-19 impacts in addition to unfilled positions.
